G. E. Spear, M. D. Fourth Assistant Physician.

To His Excellency, John H. Mickey, Governor of Nebraska:

Dear Sir.—In harmony with the legal and customary requirements I have the honor to submit herewith this, the Ninth Biennial Report of this Institution, The State Hospital for Insane, for the biennial period ending November 30th, 1906.

At the beginning of this biennial period, Dec. 1st, 1904, there were nine hundred eighty-seven (987) patients in the Institution, of whom six hundred sixty-seven (667) were males and three hundred twenty (320) were females. During the biennium, one hundred ninety-eight (198) have been admitted, of whom one hundred sixty-three (163) were males and thirty-five (35) were females. Of these six (6) were discharged as recovered, seventeen (17) improved, two (2) unimproved, thirty-three (33) paroled and one hundred seventy-one (171) died. During this period, two (2) patients have been transferred to the Lincoln Asylum.

During the period covered by this report the general health of the inmates has been exceptionally good. The modern sanitary and other appliances tending toward the health and comfort of the patients have been improved in many ways, and the Institution is nearer accomplishing that for which it was established, than ever before.

The per capita cost for the biennial period was two hundred eighty-seven dollars and fifty cents (\$287.50), or an average daily per capita of thirty-nine and three-eighths cents (39 $\frac{3}{8}$ c).

OCCUPATION.

The great value of suitable occupation and employment for those who have passed the first stage of mental disease is well recognized, and a strong effort has been made in this hospital to provide such employment for those willing to be employed. A large number of patients have been regularly employed on the farm and in the gardens, dairy, laundry, sewing room, and other industrial departments. For the past few years we have been able to manufacture practically all the mattresses used in the Hospital. The sewing room has not only supplied all the clothing for the female department of the Institution, but for the

past two years practically all the underwear required in the male department as well.

IMPROVEMENTS.

During the biennial period just closed many substantial improvements have been made, the most important of these are as follows:

A new amusement hall building, on the first floor of which is located a general store room, drug room and sewing room. This is a handsome building and furnishes the Institution with an elegant auditorium sixty by one hundred feet, an improvement very much needed. A new farm cottage has been located one-half mile southwest of the Hospital which accommodates twenty-five (25) male patients, most of these being employed in the dairy department.

From a special appropriation made by the last legislature, two new greenhouses (each 24x120 ft.) have been built, and two new marine boilers, each two hundred fifty (250) horse power, have been installed; also one additional dynamo, 100 K. W. added to our lighting plant; and two additional Kirker-Bender fire escapes installed.

The entire exterior of the main building has recently been re-painted, and has not only materially benefited the buildings, but has greatly improved the general appearance of the Institution. The sewer has been extended about twenty-one hundred (2100) feet, and at this time empties at a point more than three quarters of a mile from the Institution. The lawn has been vastly increased in size during the biennium, and a large number of additional shade, fruit, and ornamental trees added. Forty thousand (40,000) square feet of manufactured stone walks have been laid and is one of the very noticeable and substantial improvements. Our gardens this year represented approximately one hundred thirty (130) acres and the yield was very abundant.

ENTERTAINMENTS.

More than the usual amount of amusement and entertainment has been provided during the biennium, and especially so since the opening of our new amusement hall; usually one or two dances and one musical recital each week, in addition to frequent chapel services.

NEEDS OF THE INSTITUTION.

The Institution is very much in need of another building for the care of female patients, and in addition to this, a good modern isolation cottage with a capacity of from seventy to one hundred beds, for the care of tubercular and other contagious and infectious diseases. Additional coal bins, or room for storing coal, is greatly needed and for the purpose of erecting such a building, an appropriation of five thousand dollars (\$5,000) is asked.

The offices in the Administration Building being quite inadequate for an Institution of this size, it is certainly advisable to provide additional room in this department, hence it is recommended that a suitable cottage be erected to be used as a residence by the superintendent and his family and the rooms at present used for this purpose be converted into offices. The number of night watches, night nurses and other night employes has of necessity increased in number until it is very necessary to provide desirable apartments for them and a detached building of suitable size to be used as a night watch cottage is also recommended and very much needed.

CONCLUSION.

In conclusion I wish to express my earnest appreciation of the loyalty and fidelity of our esteemed steward, Mr. H. C. Haverly, whose valuable assistance is most highly appreciated. Also to extend my sincere thanks to those constituting the assistant physicians on our medical staff, who have so faithfully and intelligently performed their respective duties; and to the various heads of the departments and other employes who have lent much valuable assistance in the success of the Institution.

To Your Excellency, the Governor, and the Board of Public Lands and Buildings, I desire to assure you of my appreciation of your kindly and loyal assistance and your constant and valuable advice.

Respectfully,

W. B. KERN, M. D., Superintendent.
