## OUR WEBSITE

**Detailed Labor Market Information for Nebraska can be found at [networks.nebraska.gov/analyzer](http://networks.nebraska.gov/analyzer)**

The **Left Links** provide a variety of valuable data.

[Labor Market Facts](#) answers the most commonly asked labor market questions. If you are unsure where to start, the answer may be here. Each question has a direct link to the data that will provide you with the correct answers.

[Area Profile](#) provides information for the entire state, specific regions, counties, metropolitan, or micropolitan areas. View demographic make-up, occupation and wage information, unemployment rate, businesses, and more.

[Occupation Profiles](#) provides data specific by occupations. View number of potential candidates in a field, labor supply and market demands, education, training and work experience, typical job duties, employment and wage data, forecasts, and more.

[Industry Profile](#) provides information by industry. View employment data, industry and occupational projections, staffing patterns, and numbers and regions for employers in the area.

[Employers](#) provides site-specific information about employers in a selected area. Find specific local employer sites and their corporate headquarters, and view lists of employers based on the number of jobs they are posting.

[Historic Data Analysis](#) provides trends in industry, occupation, and labor force over time. Access commuting patterns, population, income, and economic indicators.

# SOURCES

## **U.S. Census Bureau**

The Census Bureau is continually gathering data throughout the Nation and making it available for anyone to use at [census.gov](http://census.gov)

[Population Estimates](#) provides up-to-date estimates on age, sex, race, and Hispanic origin.

[Local Employment Dynamics](#) provides several tools to analyze local labor force information. [OnTheMap](#) provides a visual makeup of the area you choose and [Quarterly Workforce Indicators](#) displays crosstabs of data based on your search criteria.

[American FactFinder](#) provides tables from Census data and American Community Survey 1, 3, and 5 year estimates.

## **Bureau of Labor Statistics**

The Bureau of Labor Statistics of the U.S. Department of Labor is the principal Federal agency responsible for measuring labor market activity, working conditions, and price changes in the economy.

## OVERVIEW FREMONT MC

**D**odge County Nebraska lies at the eastern end of the state. As the sole constituent county of the Fremont Micropolitan Statistical Area (MC), Dodge contains 36,773 Nebraskans and 534.4 mi<sup>2</sup> of Nebraska, 9.1 mi<sup>2</sup> of which make up Fremont, the state's sixth most populous city. It is also host to multiple post-secondary education institutions, enormous meatpacking enterprises, scout camps, festivals and historic sites. The Fremont MC's economy is significantly influenced by two primary factors: a strong manufacturing industry and geographic proximity to the much larger and more populous Omaha Metropolitan Statistical Area (MSA). These factors entwine with others to create a varied but stable economy in the Fremont MC.

The pages that follow will explore data that dissects and lays bare this economy. Current figures and analysis on demographic composition, labor supply and commuting patterns, compensation and benefits data for industries and occupations, past employment trends and future employment projections will construct a picture of Fremont's economic position. This picture will show an MC facing the problems of an aging population and slow growth familiar to many of Nebraska's communities, but also unique in its burgeoning diversity, high-volume flows of labor in and out with nearby communities, and very highly concentrated employment in the manufacturing industry.

	Fremont MC	Nebraska
2011 Population	36,773	1,842,641
2010 Population	36,691	1,826,341
Land Area (Square Miles)	534.4	76,824.17
2011 Persons Per Square Mile	68.8	24.0
2010 Median Age	40.1	36.3
2010 Median Household Income	\$42,849	\$49,342
2011 Labor Force	19,945	1,005,455
2011 Industry Employment	19,363	896,889
2011 Largest Industry	Education & Health Services	Education & Health Services
2011 Largest Industry Empl.	4,365	212,869

Fremont MC

Census Bureau programs define age as the length of time in completed years that a person has lived. For the most recent decennial census, age was the length of time in completed years that a person had lived as of Census Day--April 1, 2010. The Census Bureau's national surveys compute age as of the interview date.

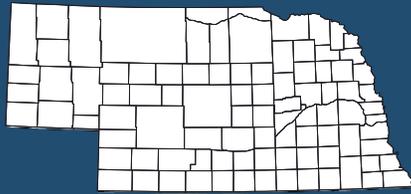

POPULATION CHANGE BY AGE GROUP 2000-2010

Source: US Census Bureau, Population Estimates, Released 2010

Age	2000 Population	2010 Population	Change	Percent Change
Under 20	10,115	9,654	-461	-4.6%
20-29	4,297	4,406	109	2.5%
30-39	4,811	4,165	-646	-13.4%
40-49	5,153	4,757	-396	-7.7%
50-59	3,944	4,898	954	24.2%
60-69	3,149	3,753	604	19.2%
70 and Over	4,752	5,058	306	6.4%
<b>Total</b>	<b>36,221</b>	<b>36,691</b>	<b>470</b>	<b>1.3%</b>

- The most dramatic increases in population in the Fremont MC were seen in the baby boom generation. The number of 50-59 year olds increased 24.2% and 60-69 year olds increased 19.2%. No other age group experienced such dramatic growth and the area as a whole only experienced 1.3% growth.
- The effects of the Baby Boom can also be noted in the 30 and 40 year old age cohorts, groups the boomers exited between 2000 and 2010. The 'echo boomer' 20-29 year old age cohort saw growth as well.

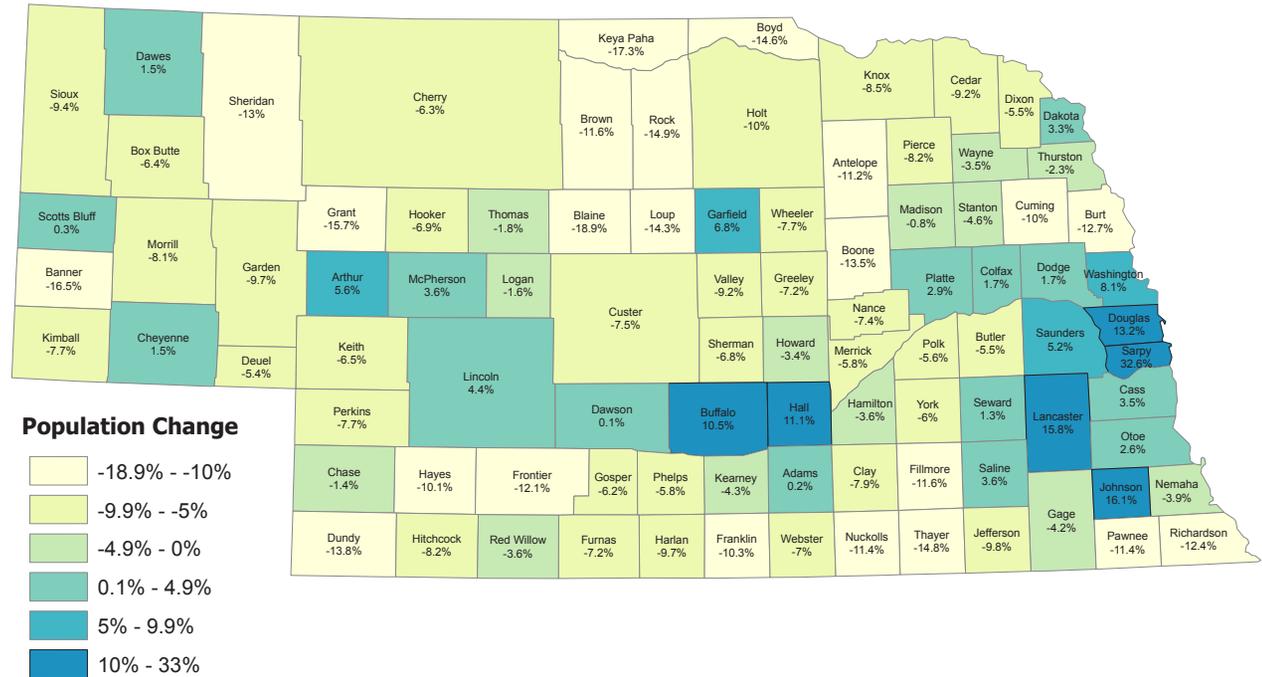

## Nebraska Statewide

The Census Bureau's Population Estimates Program (PEP) produces estimates of the population for the United States, its states, counties, cities, and towns, as well as for the Commonwealth of Puerto Rico and its municipalities. Demographic components of population change (births, deaths, and migration) are produced at the national, state, and county levels of geography. Additionally, housing unit estimates are produced for the nation, states, and counties.

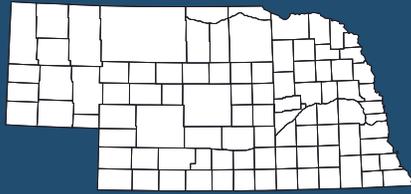

These estimates are used in federal funding allocations, as survey controls, as denominators for vital rates and per capita time series, and as indicators of recent demographic changes.

# POPULATION CHANGE BY COUNTY 2000-2011

Source: U.S. Census Bureau, Population Estimates, Released 2012

- In general, counties with large cities saw the highest rates of growth: all but one county in the highest growth rate grouping contains one of the state's 5 most populous cities.
- Rural counties saw the highest rates of population attrition: many of the counties in the group with the highest rate of population decline have under 1,000 residents.

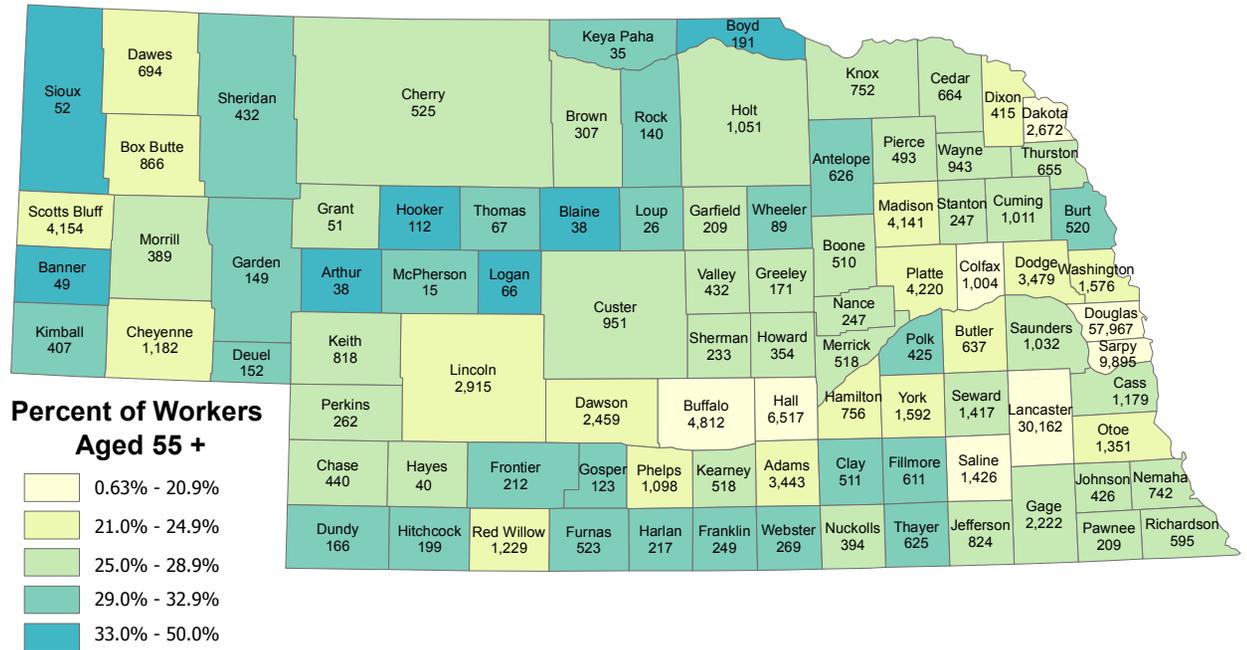

### Nebraska Statewide

With the aging of the baby-boom generation, defined as persons born between 1946 and 1964, the older age cohorts are expected to make up a much larger share of the labor force. In 2008, the baby-boom cohort was 44 to 62 years of age. By 2018, almost all the baby boomers will be in the 55-years-and-older age group. Age is a major factor in labor market behavior, and the aging of the labor force will dramatically lower the overall labor force participation rate and the growth of the labor force.

## WORKERS AGED 55 AND OLDER BY COUNTY 2011

Source: U.S. Census Bureau, Local Employment Dynamics, Quarterly Workforce Indicators, Released 2012

- The counties with the greatest percentages of their workforce aged 55 and older are clustered in the central and western portions of the state.
- All of the counties containing Nebraska’s largest cities were in the lowest percentage grouping.

## Fremont MC

Bureau of Labor Statistics nationwide projections imply that over the next decade, 40 million people will enter the workforce, about 25 million will leave the workforce, and 109 million will remain. Although only a modest reduction will take place in the overall growth in the workforce (from 1.3 percent per year to 1.1 percent per year), the composition of growth will generate rising shares of young (under 25) and older (45 and over) workers and a decline in the share of middle-age workers.

Over the next decade, instead of having nearly all increases in employment coming from the 25- to 54-year-old age group, fewer than one in three (31 percent) of the added workers will be in this category. Nearly half of the additional workers will come from the 55-and-older category, while about one in five will come from the youth labor force.

## OLDER WORKERS BY INDUSTRY

Industry	Employment		% 55 & Older
	55 & Older	Total	
Agriculture, Forestry, Fishing and Hunting	42	133	31.6%
Mining, Quarrying, and Oil and Gas Extraction	6	12	50.0%
Utilities	45	124	36.3%
Construction	100	550	18.2%
Manufacturing	546	3034	18.0%
Wholesale Trade	201	745	27.0%
Retail Trade	519	2361	22.0%
Transportation and Warehousing	192	501	38.3%
Information	35	245	14.3%
Finance and Insurance	140	405	34.6%
Real Estate and Rental and Leasing	25	135	18.5%
Professional, Scientific, and Technical Services	69	221	31.2%
Management of Companies and Enterprises	7	31	22.6%
Administrative and Support and Waste Management	106	692	15.3%
Educational Services	543	1731	31.4%
Health Care and Social Assistance	586	2525	23.2%
Arts, Entertainment and Recreation	29	143	20.3%
Accommodation and Food Services	151	1262	12.0%
Other Services (except Public Administration)	120	579	20.7%
Public Administration	171	469	36.5%

Source: U.S. Census Bureau, Local Employment Dynamics, QWI Table Released 2011

- Mining, Quarrying, and Oil and Gas Extraction had the highest percentage of workers 55 and older at 50%.
- Transportation and Warehousing was the number two industry employing workers 55 and older, at 38.3%.

Fremont MC

Office of Management and Budget standards on race and ethnicity:

White – A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.

Black or African American – A person having origins in any of the Black racial groups of Africa.

American Indian or Alaska Native – A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment.

Asian – A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.

Native Hawaiian or Other Pacific Islander – A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. The 1997 OMB standards permit the reporting of more than one race.

POPULATION BY RACE AND ETHNICITY 2010

	Fremont MC		Nebraska	
	Total	%	Total	%
<b>Total population</b>	<b>36,691</b>	<b>100.0%</b>	<b>1,826,341</b>	<b>100.0%</b>
Hispanic or Latino	3,689	10.1%	167,405	9.2%
Not Hispanic or Latino	33,002	89.9%	1,658,936	90.8%
White alone	33,337	90.9%	1,499,753	82.1%
Black or African American alone	205	0.6%	80,959	4.4%
American Indian and Alaska Native alone	180	0.5%	14,797	0.8%
Asian alone	191	0.5%	31,919	1.7%
Native Hawaiian and Other Pacific Islander alone	75	0.2%	966	0.1%
Two or More Races	520	1.4%	28,426	1.6%
<b>Total Minority</b>	<b>3,354</b>	<b>9.1%</b>	<b>326,588</b>	<b>17.9%</b>

Source: U.S. Census Bureau, Population Estimates, Released 2012

- Fremont is slightly more ethnically homogenous than the state as a whole.
- Fremont is racially more homogenous than the state with nearly all minority races constituting a smaller percentage of Fremont’s population than they do of the State’s population.

Fremont MC

The U.S. Office of Management and Budget (OMB) requires federal agencies to use a minimum of two ethnicities in collecting and reporting data: Hispanic or Latino and Not Hispanic or Latino. OMB defines “Hispanic or Latino” as a person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin regardless of race. Hispanic origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person’s parents or ancestors before their arrival in the United States. People who identify their origin as Hispanic, Latino, or Spanish may be any race.

POPULATION CHANGE BY RACE & ETHNICITY 2000-2010

	2000 Population	2010 Population	Change	Percent Change
<b>Total:</b>	<b>36,221</b>	<b>36,691</b>	<b>470</b>	<b>1.3%</b>
Hispanic or Latino (of any race)	1,418	3,689	2,271	160.2%
Total Not Hispanic or Latino	34,803	33,002	-1,801	-5.2%
White Alone	34,205	33,337	-868	-2.5%
Black or African American Alone	150	205	55	36.7%
American Indian and Alaska Native Alone	95	180	85	89.5%
Asian Alone	181	191	10	5.5%
Native Hawaiian and Other Pacific Islander Alone	25	75	50	200.0%
Two or more Races	147	520	373	253.7%
<b>Total Minority (Population excluding non-Hispanic Whites)</b>	<b>2,016</b>	<b>3,354</b>	<b>1,338</b>	<b>66.4%</b>

Source: U.S. Census Bureau, Population Estimates, Released 2012

- While the Fremont MC was primarily white, the Minority population saw a dramatic increase between 2000 and 2010. With all minority groups experiencing growth, some at very high levels.

Fremont MC

In the United States, State laws require birth certificates to be completed for all births, and Federal law mandates national collection and publication of births and other vital statistics data. The National Vital Statistics System, the Federal compilation of this data, is the result of the cooperation between the National Center for Health Statistics (NCHS) and the States to provide access to statistical information from birth certificates.

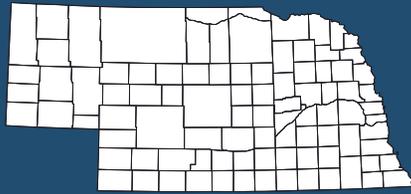

Mortality data from the National Vital Statistics System (NVSS) are a fundamental source of demographic, geographic, and cause-of-death information. This is one of the few sources of health-related data that are comparable for small geographic areas and are available for a long time period in the United States. The data are also used to present the characteristics of those dying in the United States, to determine life expectancy, and to compare mortality trends with other countries.

POPULATION CHANGE: NATURAL INCREASE AND MIGRATION 2011

Area	Population change	Changes Due to Natural Increase			Net Migration		
		Total	Births	Deaths	Total	International	Domestic
Fremont MC	88	87	491	404	4	27	-23
Nebraska	12500	11113	25991	14878	1408	2508	-1100

Source: US Census Bureau, Population Estimates, Table 10, Released 2012

- The Fremont MC was one of the 4 Micropolitan areas to experience growth between July 1, 2010 and July 1, 2011.
- The Lincoln and Omaha Metropolitan areas experienced population increase, while 6 out of 10 of the Micropolitan areas experienced a decrease.

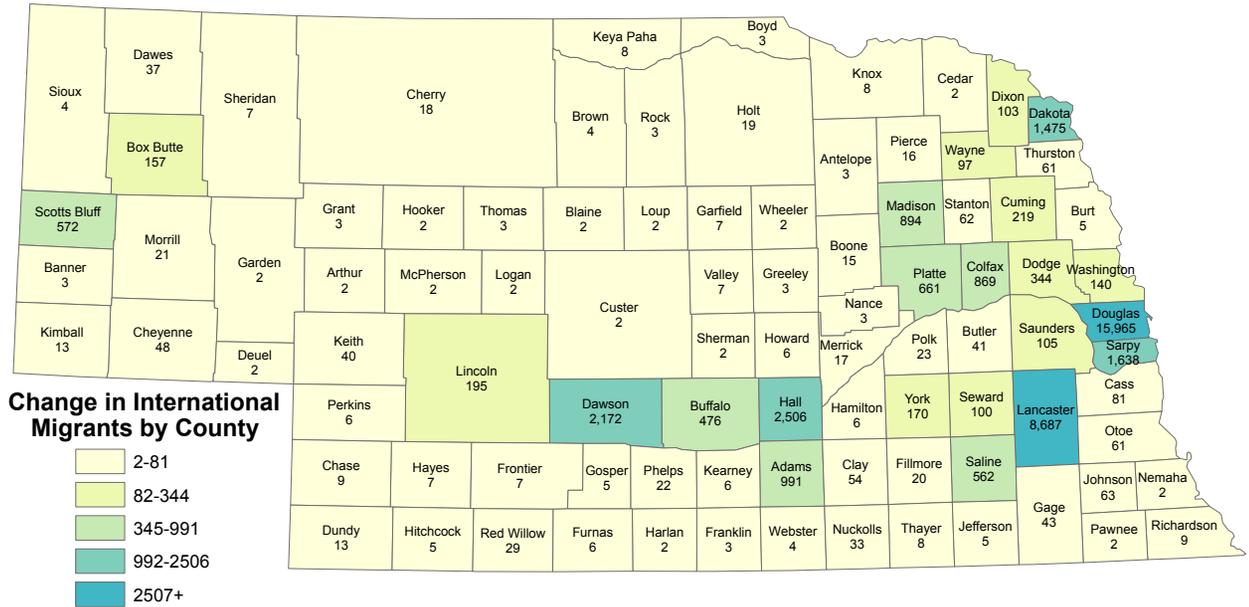

### Nebraska Statewide

International Migration is the movement of people across a national border. This includes both immigration (migration to a country) and emigration (migration from a country) or the combination of the two (net international migration). The U.S. Census Bureau produces annual estimates of net international migration for the nation, states, and counties in the United States. These estimates are based in part on data collected in censuses and surveys. Projections of the U.S. population are also made using assumptions about net international migration.

## NET INTERNATIONAL MIGRATION BY COUNTY 2011

Source: U.S. Census Bureau, Population Estimates, Released 2012

- More populous counties saw greater volumes of international migration.
- Although many of Nebraska’s counties saw reductions in overall population during this time period, none of them experienced negative net international migration.

### Fremont MC

In general discussions, the concept of gender is often confused with the concept of sex, and the terms are used interchangeably. The meanings of these two concepts are not the same: sex is based on the biological attributes of men and women (chromosomes, anatomy, hormones), while gender is a social construction whereby a society or culture assigns certain tendencies or behaviors the labels of masculine or feminine. These assignments may differ across cultures and among people within a culture, and even across time. Gender may or may not correspond directly to sex--depending on the society or culture or period. That means, for example, that people may associate themselves with femininity (as defined by their culture) while being biologically male. At the Census Bureau, the sex question wording very specifically intends to capture a person's biological sex and not gender. Ambiguity of these two concepts interferes with accurately and consistently measuring what we intend to measure--the sex composition of the population.

## SEX DISTRIBUTION BY INDUSTRY 2010

Industry	Female		Male	
	Employees	% of Industry	Employees	% of Industry
Agriculture, Forestry, Fishing, and Hunting	32	5.7%	527	94.3%
Mining, Quarrying, and Oil and Gas Extraction	0	0.0%	31	100.0%
Utilities	93	32.3%	195	67.7%
Construction	40	4.4%	861	95.6%
Manufacturing	1001	27.8%	2600	72.2%
Wholesale Trade	87	20.3%	341	79.7%
Retail Trade	873	49.0%	908	51.0%
Transportation and Warehousing	137	28.8%	339	71.2%
Information	56	31.8%	120	68.2%
Finance and Insurance	447	76.8%	135	23.2%
Real Estate and Rental and Leasing	28	32.2%	59	67.8%
Professional and Technical Services	188	57.0%	142	43.0%
Management of Companies and Enterprises	0	-	0	-
Administrative and Waste Services	100	29.0%	245	71.0%
Educational Services	375	67.4%	181	32.6%
Health care and Social Assistance	1282	92.6%	102	7.4%
Arts, Entertainment, and Recreation	0	0.0%	104	100.0%
Accommodation and Food Services	171	53.6%	148	46.4%
Other Services	190	42.2%	260	57.8%
Public Administration	209	47.1%	235	52.9%
<b>Total</b>	<b>5,309</b>	<b>36.7%</b>	<b>7,533</b>	<b>63.3%</b>

Source: US Census Bureau, American Community Survey 3 year Estimates, Table S2404 Released 2010

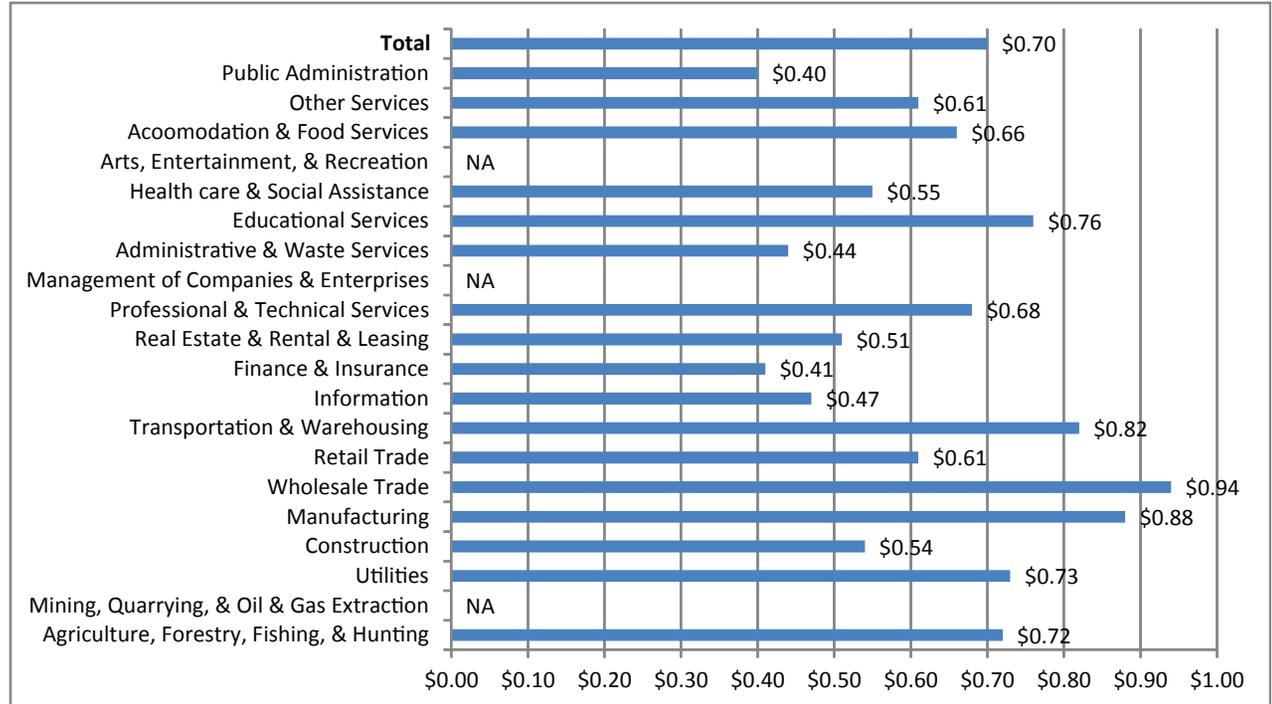

- The most male dominated industries in the Fremont MC were Mining, Quarrying, and Oil and Gas Extraction and Arts, Entertainment, and Recreation, with 100% of those employed being male.
- The most female dominated industry was Health Care and Social Assistance, with 92.6% of those employed being female.

Fremont MC

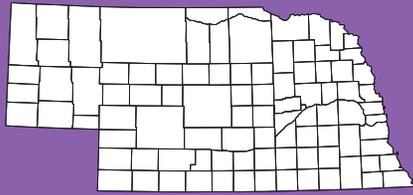

The past several decades have been marked by notable changes in women’s labor force activities. Women’s labor force participation is significantly higher today than it was in the 1970s, particularly among women with children under 18 years of age. A larger share of women work full time and year round than in the past. In addition, women have increasingly attained higher levels of education: Among women aged 25 to 64 who are in the labor force, the proportion with a college degree roughly tripled from 1970 to 2010. Women’s earnings as a proportion of men’s earnings also have grown over time. In 1979, women working full time earned 62 percent of what men did.

AVERAGE EARNINGS BY INDUSTRY:  
FEMALE EARNINGS PER \$1.00 MALE EARNINGS 2010

Source: US Census Bureau, American Community Survey 3-Year Estimates 2010, Table S2404

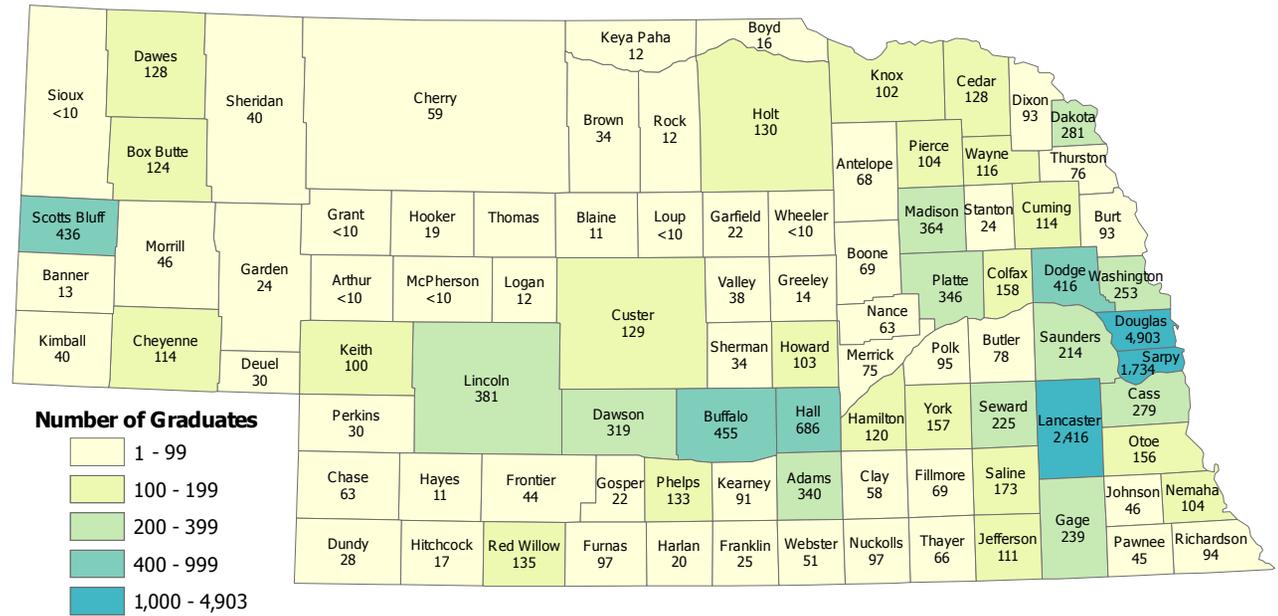

- Fremont MC females were making less than the average cents on the dollar compared to the rest of the state.
- No industry in the Fremont MC was paying females as much as they were paying males.

### Nebraska Statewide

Graduation rates are a fundamental indicator of whether or not the nation’s public school system is doing what it is intended to do: enroll, engage, and educate youth to be productive members of society. Since almost 90 percent of the fastest-growing and highest-paying jobs require some postsecondary education, having a high school diploma and the skills to succeed in college and the workplace are essential. Yet nationally, one-third of students—about 1.3 million each year—leave high school without a diploma, at a high cost to themselves and society at large.

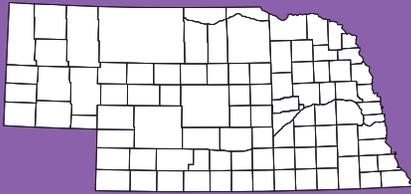

## PUBLIC HIGH SCHOOL GRADUATES BY COUNTY 2011

Source: Nebraska Coordinating Commission for Postsecondary Education, Progress Report, Released 2012

- More than one-third (38%) of Nebraska’s counties had fewer than 50 public high school graduates in 2008-2009.
- Many of the counties with lower numbers of high school graduates are also counties that saw a decrease in population over the past decade.

Source: [http://www.all4ed.org/files/Nebraska\\_wc.pdf](http://www.all4ed.org/files/Nebraska_wc.pdf)

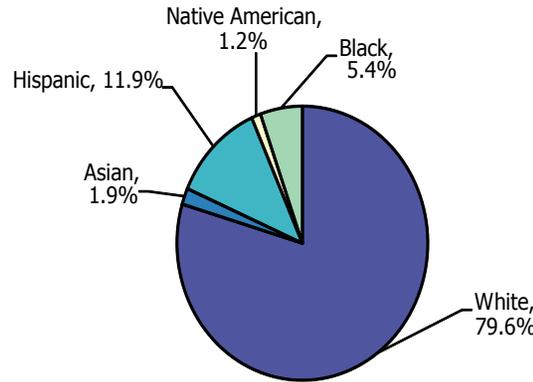

Nebraska Statewide

The number of graduates from Nebraska public high schools is projected to decrease and then increase over the next decade. By 2020–2021, minority students, especially Hispanics, are projected to account for much higher percentages of the state’s public high school graduates than they did in 2002–2003. This is projected to be the case, despite the fact that Hispanic students tend to graduate from high school at lower rates than white and Asian students. Conversely, white non-Hispanics are projected to account for a significantly lower percentage of the students who will graduate from Nebraska’s public high schools in 2020–2021.

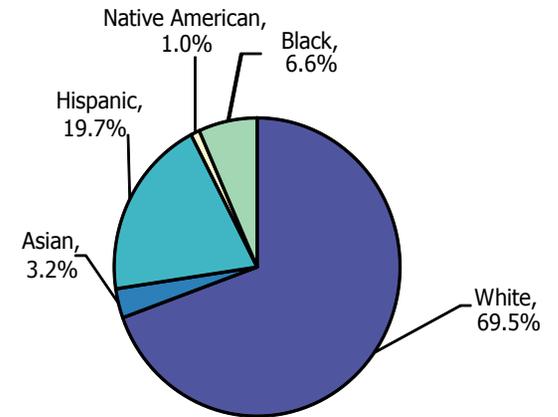

PUBLIC HIGH SCHOOL GRADUATES BY RACE & ETHNICITY

**Actual Percentages of Graduates:  
2010 - 2011**

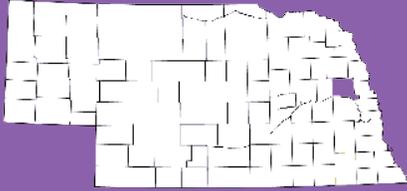

**Projected Percentages of Graduates:  
2020 - 2021**

Source: Nebraska Coordinating Commission for Postsecondary Education, Progress Report, Released 2012

- Hispanic graduates are projected to grow from 11.9% to 19.7% of the state’s public high school graduating class in 2021.
- Whites are projected to remain the largest racial/ethnic demographic within public high school graduates in 2021. However, their percentage of total graduates is projected to decrease by 10.1%

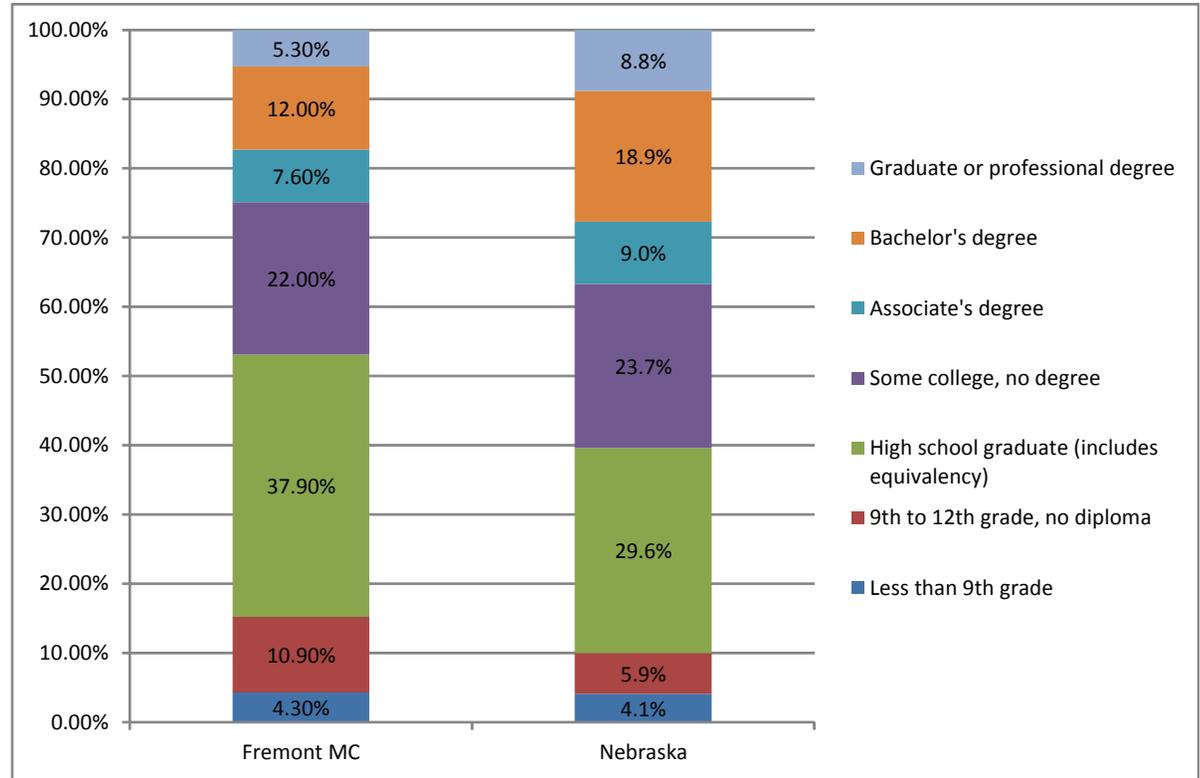

Fremont MC

Educational attainment refers to the highest level of education that an individual has completed. This is distinct from the level of schooling that an individual is attending.

Data on educational attainment are derived from a single question that asks, “What is the highest grade of school...has completed, or the highest degree...has received?”

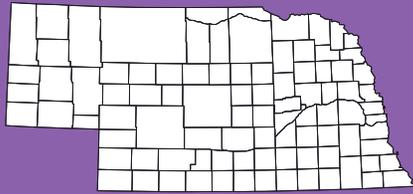

Depending on the survey, the educational attainment question may be asked only of adult household members. Even when data are collected from all household members regardless of age, the U.S. Census Bureau generally publishes data only for adults. Most publications focus on adults age 25 years and over, when education has been completed for most people.

EDUCATIONAL ATTAINMENT  
POPULATION AGE 25 AND OLDER 2010

Source: US Census Bureau, 2010 American Community Survey

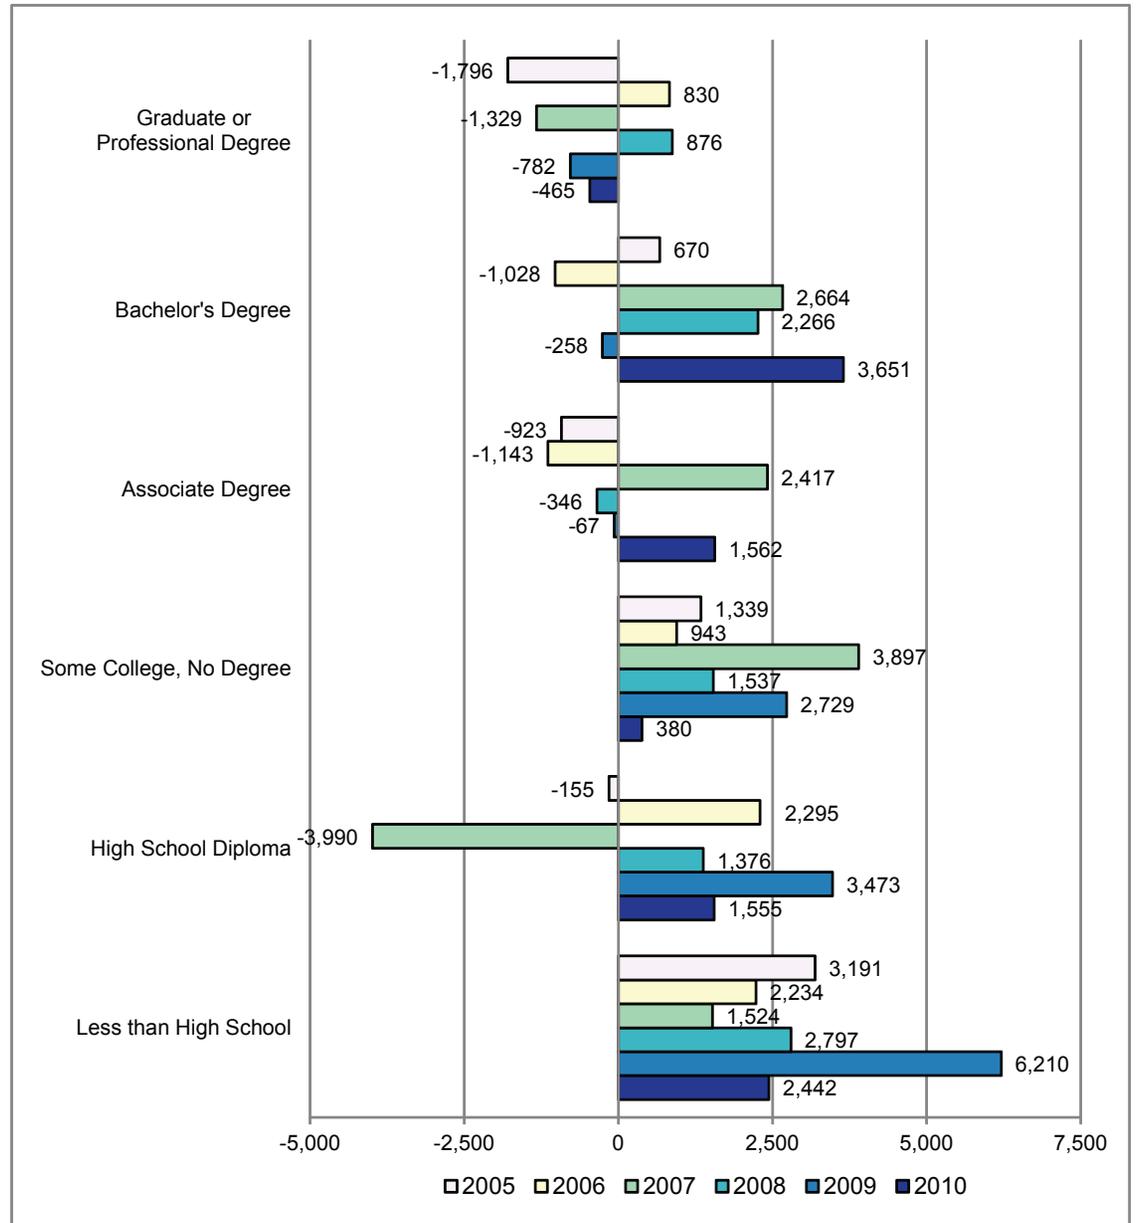

- The percentage of Fremont MC residents with a college degree was 11.8% lower than the percentage of Nebraskans with a college degree.
- The percentage of high school graduates and below in the Fremont MC was 16.2% higher than Nebraska as a whole.

Nebraska Statewide

The chart to the right summarizes the net-migration estimates for Nebraska by education level, based on the results of the American Community Survey (ACS) conducted annually from 2005 to 2010. As shown in this chart, the estimates of net migration based on one year of ACS data vary significantly from one year to another. When the estimates based on the six years of ACS data are compared, as shown in the chart, an overall migration pattern is not clearly revealed. Based on these estimates, Nebraska consistently attracted more working-age adults with less than a high school education than it exported over the six-year period. In addition, the estimates of net migration shown in the chart consistently attracted working-age adults with some college, but no degrees, between 2005 and 2010.

NET EDUCATIONAL MIGRATION:  
POPULATION AGED 22-64

Source: Nebraska Coordinating Commission for Postsecondary Education, Progress Report, Released 2012

### Nebraska Statewide

Nebraska’s Coordinating Commission for Postsecondary Education (CCPE) is a state constitutional agency, whose mission is to promote sound policies for Nebraska’s state and community colleges and the University of Nebraska. The CCPE balances the best interests of taxpayers, students and Nebraska’s postsecondary institutions.

Responsibilities include:

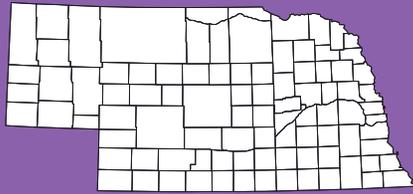

- Collaborating with the state’s public colleges and universities to implement a plan that will guide Nebraska’s higher education system
- Administering student aid programs
- Conducting research and publishing reports on higher education issues
- Authorizing academic programs
- Approving proposals for facilities
- Reviewing institutions’ budget proposals and making recommendations to the State Legislature
- Approving applications from out-of-state institutions

## POSTSECONDARY GRADUATES WORKING IN NEBRASKA 2012

	Community Colleges Associates Degrees	State Colleges Bachelors Degrees	UN- Kearney Bachelors Degrees
Number of Graduates	3,833	1,157	853
Number of Graduates Working in Nebraska	2,784	685	538
Percent of Graduates Working in Nebraska	73%	59%	63%
Estimated Average Annual Earnings	\$24,034	\$25,097	\$23,927
Estimated Median Annual Earnings	\$22,219	\$24,936	\$24,221

Source: Nebraska Department of Labor, Graduate Outcomes in Nebraska, Released 2012

- Community College graduates are more likely to be found working in Nebraska than State College graduates. This may be partly due to the geographic location of the State Colleges near bordering states. State College graduates may also continue on to graduate school rather than enter the workforce.
- The labor market for University of Nebraska – Kearney and State College bachelor’s degree and higher graduates tends to be more national than state specific.

Nebraska Statewide

The Legislature has established four instructional and service priorities for Nebraska’s community colleges.

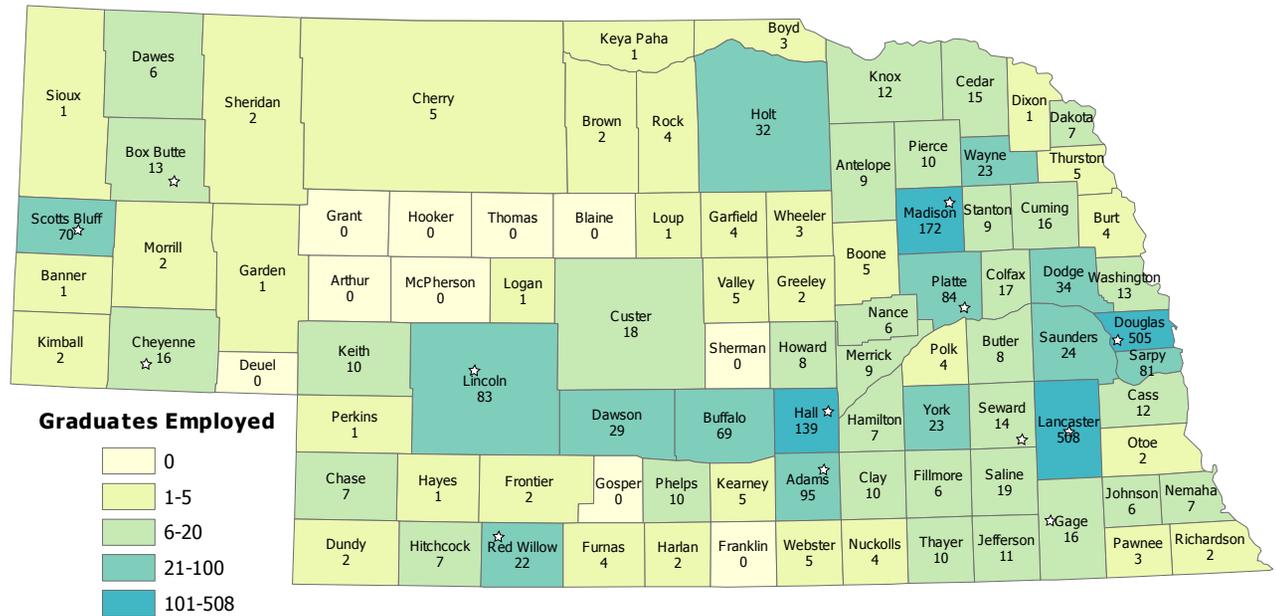

Applied technology and occupational education and, when necessary, foundations education;

Transfer education, including general academic transfer programs, or applied technology and occupational programs which may be applicable to the first two years of a bachelor’s degree program;

Public service, particularly adult continuing education for occupations and professions, economic and community development focused on customized occupational assessment and job training programs for business and communities, and vocational and personal development courses;

Applied research.(Applied research activities of the community college areas shall be directly related to the enhancement of the instructional programs, student achievement, institutional effectiveness, public service activities, and to the professional development of the faculty.)

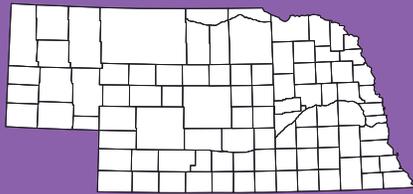

COMMUNITY COLLEGE GRADUATES WORKING IN NEBRASKA 2012

Institution	Number of Graduates	Number of Graduates Working in Nebraska	Percentage of Graduates Working in Nebraska	Estimated Average Annual Earnings for Associates Degree Graduates	Estimated Median Annual Earnings for Associates Degree Graduates
All Community Colleges	5,182	3,799	73%	\$24,034	\$22,219

Source: Nebraska Department of Labor: Graduate Outcomes in Nebraska, Released 2012

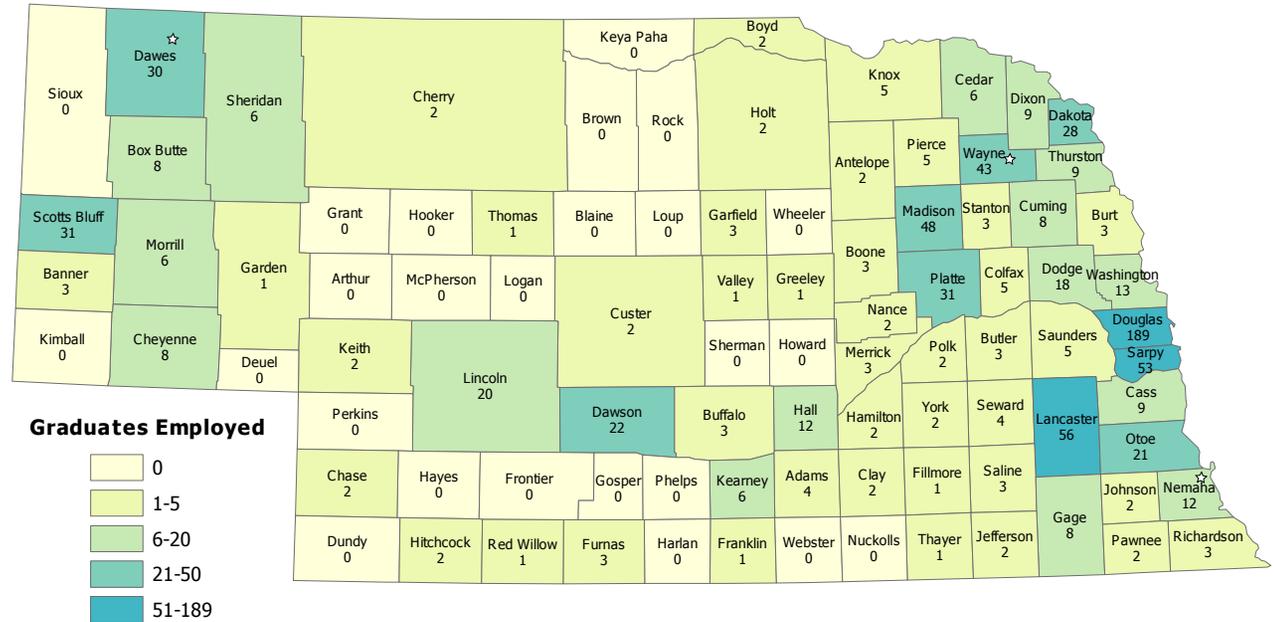

- Only 10 of Nebraska’s 93 counties did not have at least one graduate employed in the county. These counties have some of the lowest populations in the state.
- Each year, about three-fourths of Community College graduates are found working in Nebraska about a year after graduation.

### Nebraska Statewide

The Nebraska State College System serves close to 9,000 students from Nebraska and surrounding states through three geographically diverse institutions: Chadron State College, Peru State College and Wayne State College. Combined, the three colleges offer more than 200 degree, certificate, and pre-professional programs that are accessible on the three campuses, via the internet, and in several satellite locations throughout the state. With more than 250 credentialed faculty and 50,000 successful graduates, the NSCS provides significant human and intellectual capital that contributes to the current and future economic strength of the State of Nebraska.

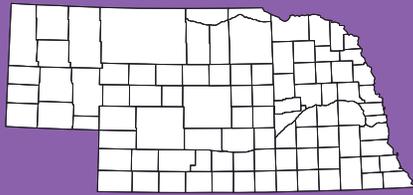

# STATE COLLEGE GRADUATES WORKING IN NEBRASKA 2012

Institution	Number of Graduates	Number of Graduates Working in Nebraska	Percentage of Graduates Working in Nebraska	Estimated Average Annual Earnings for Bachelor's Degree Graduates	Estimated Median Annual Earnings for Bachelor's Degree Graduates
All State Colleges	1,735	1,083	62%	\$25,097	\$24,936

Source: Nebraska Department of Labor: Graduate Outcomes in Nebraska, Released 2012

- Slightly over half (51%) of all State College graduates working in Nebraska graduated in an Education field of study.
- State College graduates with a post-baccalaureate degree or certificate were more likely to be working in the state (69%) than bachelor's degree graduates (59%).

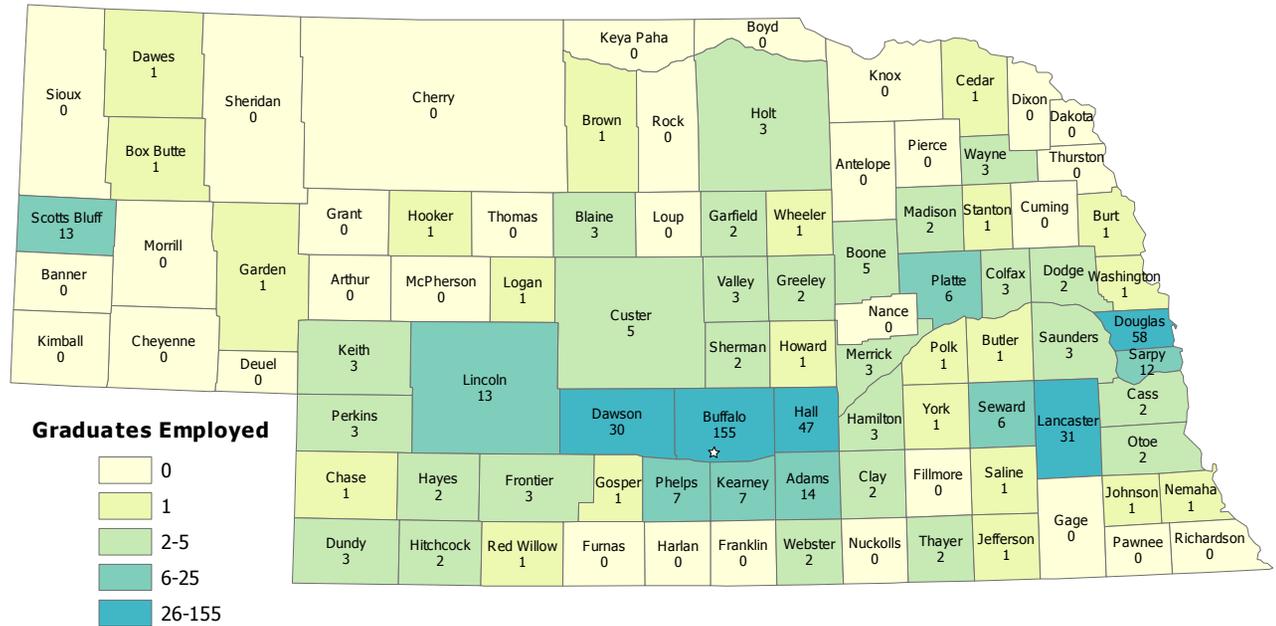

### Nebraska Statewide

The public, residential University of Nebraska at Kearney is an affordable, student-centered regional hub of intellectual, cultural and artistic excellence that has been a prominent part of Nebraska’s higher education landscape for more than a century.

As one of four campuses of the University of Nebraska, UNK offers:

- Access to all the opportunities and choices of a major public university.
- A wide range of academic programs that lead to exciting careers.
- Nationally-renowned faculty.
- A rich and diverse campus life.
- A home away from home.

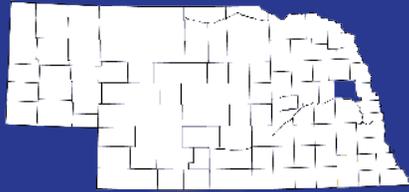

## UNK GRADUATES WORKING IN NEBRASKA 2012

Institution	Number of Graduates	Number of Graduates Working in Nebraska	Percentage of Graduates Working in Nebraska	Estimated Average Annual Earnings for Bachelor's Degree Graduates	Estimated Median Annual Earnings for Bachelor's Degree Graduates
University of Nebraska - Kearney	1,167	745	64%	\$23,927	\$24,221

Source: Nebraska Department of Labor: Graduate Outcomes in Nebraska, Released 2012

- Many UNK programs have a job placement rate that’s almost 100%, including Graphic Arts, Industrial Technology, Speech and Hearing Disorders, Accounting, Education, and Computer Science and Information Technology.
- 25%-30% of all teachers, school administrators, speech pathologists, school counselors, and school psychologists in Nebraska are UNK graduates.
- Graduates of UNK’s College of Education account for 33% of all Nebraska high school principals and 35% of all public school superintendents appointed in Nebraska every year.

## Fremont MC

The Local Area Unemployment Statistics (LAUS) program is a Federal-State cooperative effort in which monthly estimates of total employment and unemployment are prepared for approximately 7,300 areas nationwide.

These estimates are key indicators of local economic conditions. The Bureau of Labor Statistics (BLS) of the U.S. Department of Labor is responsible for the concepts, definitions, technical procedures, validation, and publication of the estimates that State employment security agencies prepare under agreement with BLS.

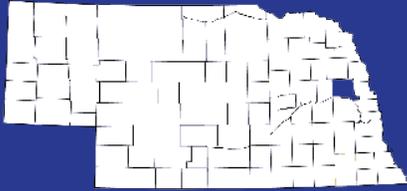

<b>Nebraska Statewide 2011</b>			
<b>Civilian Labor Force</b>	<b>Employment</b>	<b>Unemployment</b>	<b>Unemployment Rate (%)</b>
1,005,455	960,830	44,625	4.4%
<b>Fremont MC</b>			
<b>Civilian Labor Force</b>	<b>Employment</b>	<b>Unemployment</b>	<b>Unemployment Rate (%)</b>
19,905	18,981	924	4.6%

Note: Annual Average, Not Seasonally Adjusted

Source: Nebraska Department of Labor, Local Area Unemployment Statistics, Released 2012

- The unemployment rate in the Fremont MC is very comparable to the Nebraska rate.
- The Fremont MC accounts for  $\approx 1.9\%$  of the total State civilian labor force and  $\approx 2.1\%$  of the total State unemployment.
- The Nebraska Department of Labor develops labor force estimates for 127 different areas within the state.

## Fremont MC

## Definitions of Labor Force Concepts:

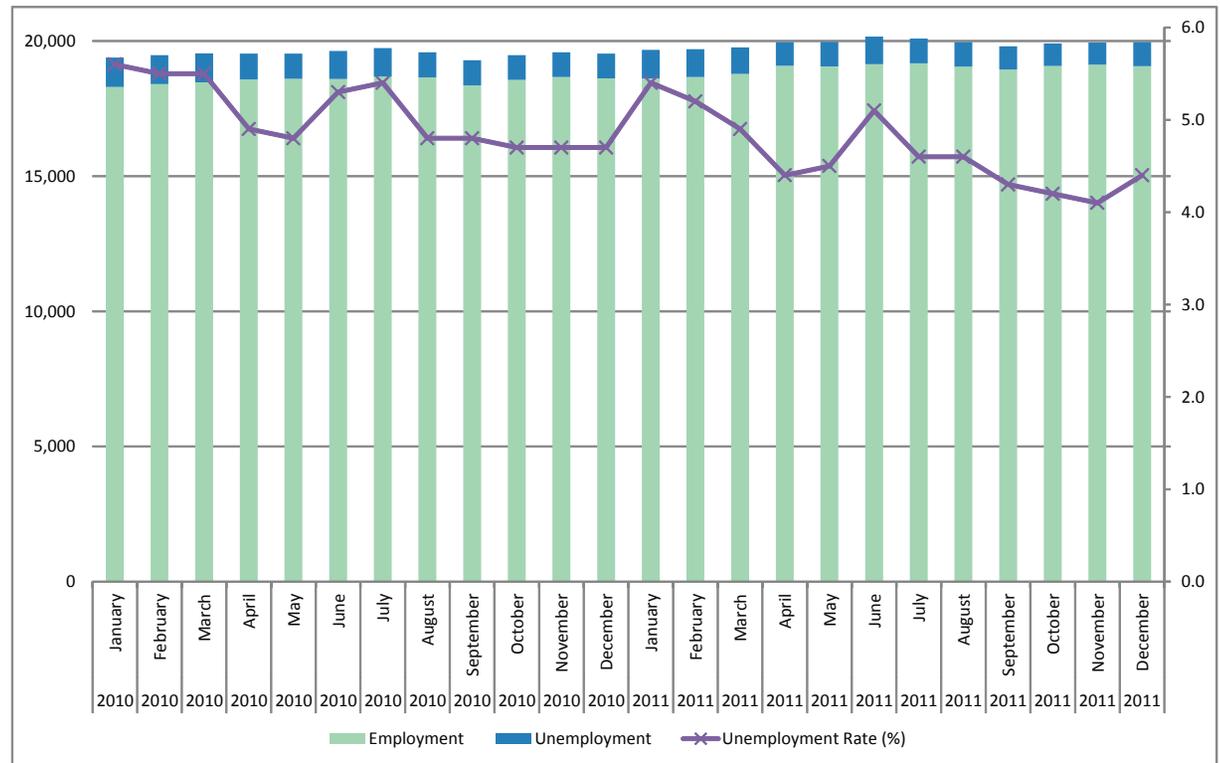

**Civilian labor force:** Included are all persons in the civilian noninstitutional population classified as either employed or unemployed.

**Employed persons:** These are all persons who, during the reference week, (a) did any work as paid employees, worked in their own business or profession or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of their family, or (b) were not working but who had jobs from which they were temporarily absent. Each employed person is counted only once, even if he or she holds more than one job.

**Unemployed persons:** Included are all persons who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment some time during the 4 week-period ending with the reference week.

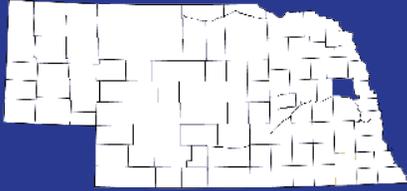

**Unemployment rate:** The ratio of unemployed to the civilian labor force expressed as a percentage.

## UNEMPLOYMENT RATE MONTHLY TRENDS 2010-2011

Source: Nebraska Department of Labor, Local Area Unemployment Statistics, Released 2012

- Over 2010 and 2011, the Fremont MC unemployment rate has trended along the same path as the Nebraska rate.

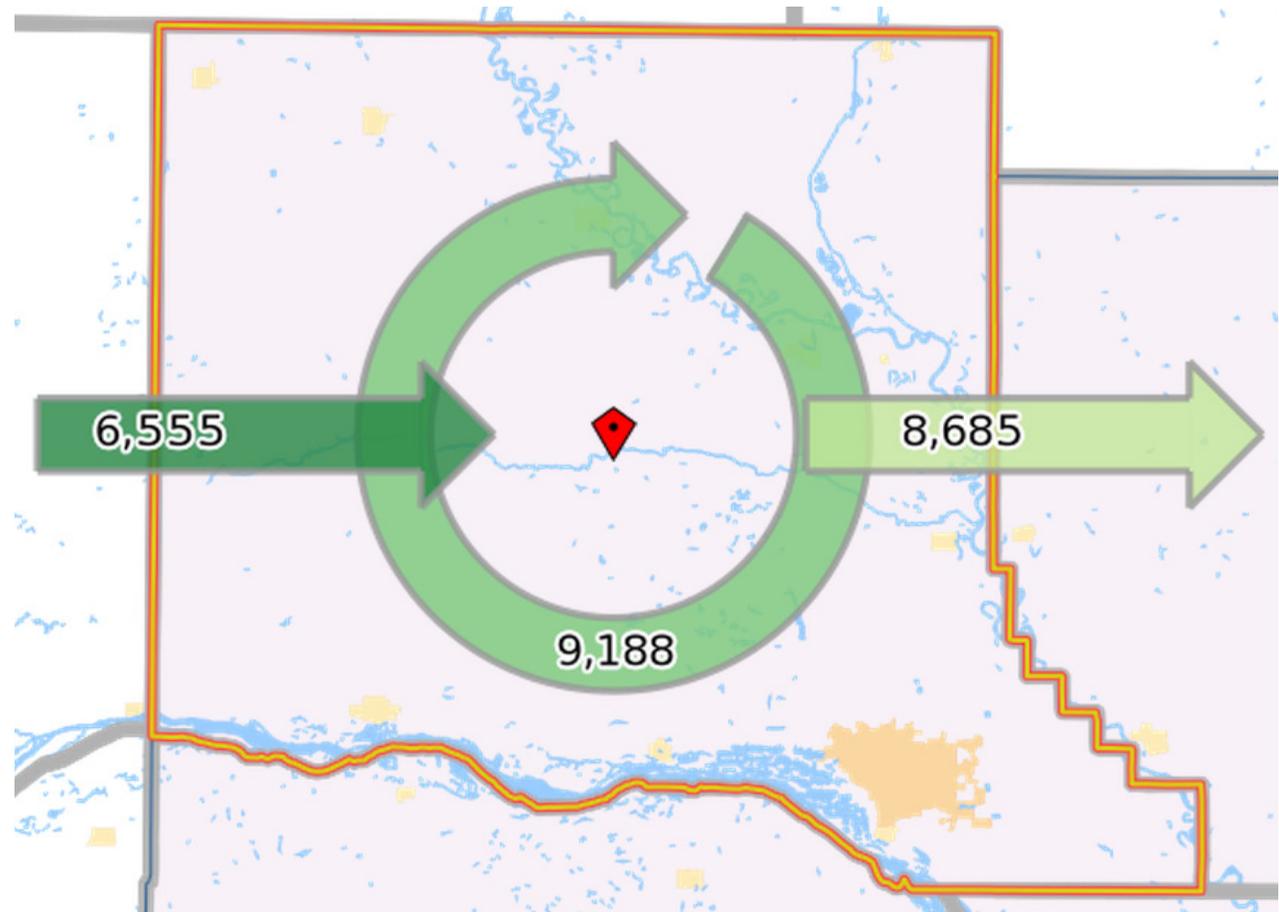

### Fremont MC

Local Employment Dynamics (LED) is a voluntary partnership between state labor market information agencies and the U.S. Census Bureau to develop new information about local labor market conditions at low cost, with no added respondent burden, and with the same confidentiality protections afforded census and survey data.

OnTheMap provides an easy-to-use interface for creating, viewing, printing and downloading workforce related maps, profiles, and underlying data. Based on 2002-2010 Longitudinal Employer-Household Dynamics (LEHD) Origin Destination Employment Statistics (LODES), OnTheMap is a unique resource for mapping the travel patterns of workers and identifying small-area workforce characteristics.

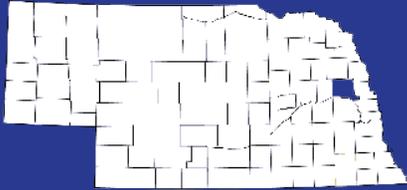

The project is supported by the Employment and Training Administration (ETA) at the U.S. Department of Labor.

## COMMUTING PATTERNS 2010

Source: U.S. Census Bureau, Local Employment Dynamics, Released 2012

- Fremont sees a high degree of out-commuting, 49% of workers living in Fremont work outside of the Fremont MC.

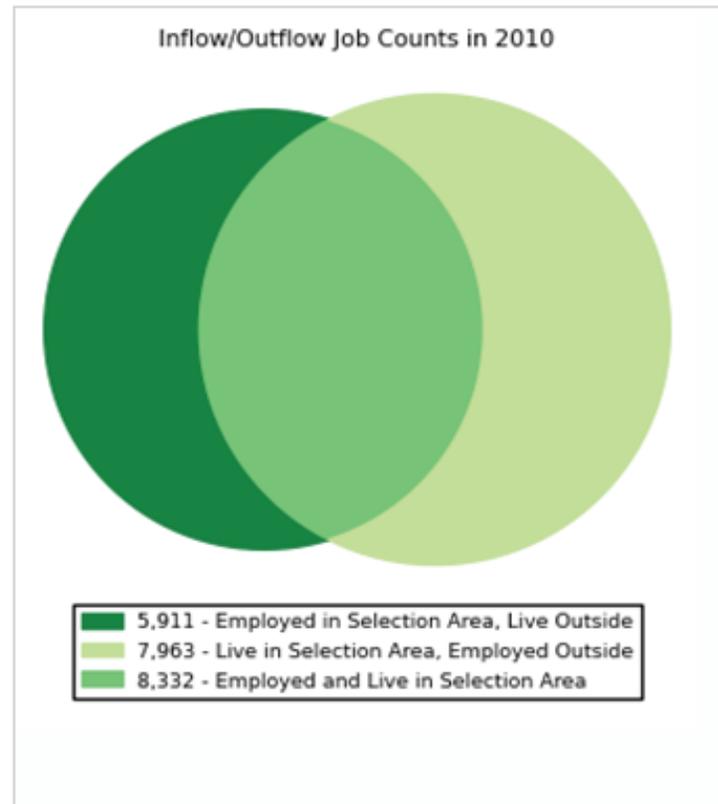

Fremont MC

Commuting (Journey to Work) refers to a worker’s travel from home to work. Place of work refers to the geographic location of the worker’s job. Work at home refers to a worker who does not commute to a different geographic area from work, meaning their place of work is their home. Daytime population refers to the estimated number of people who are residing and working in an area during the “daytime” working hours.

There are several surveys conducted by the Census Bureau that ask questions related to commuting including means of transportation, time of departure, mean travel time to work, vehicles available, distance traveled, and expenses associated with commuting.

WORKER INFLOW/OUTFLOW 2010

Source: U.S. Census Bureau, Local Employment Dynamics, Released 2012

Inflow/Outflow Job Counts (All Jobs)	2010	
	Count	Share
Employed in Fremont MC	15,743	100%
Employed in Fremont MC but Living Outside	6,555	42%
Employed and Living in Fremont MC	9,188	58%
Living in Fremont MC	17,873	100%
Living in Fremont MC but Employed Outside	8,685	49%
Living and Employed in Fremont MC	9,188	51%

- Omaha, Valley, Blair and Lincoln are the primary destinations for out-commuters from the Fremont MC.

Fremont MC

Wages for the OES survey are straight-time, gross pay, exclusive of premium pay.

Included in the collection of wage data are:

- base rate,
- cost-of-living allowances,
- guaranteed pay,
- hazardous-duty pay,
- incentive pay, including commissions and production bonuses, and tips.

Excluded from the wage data are:

- back pay,
- jury duty pay,
- overtime pay,
- severance pay,
- shift differentials,
- nonproduction bonuses, and tuition reimbursements.

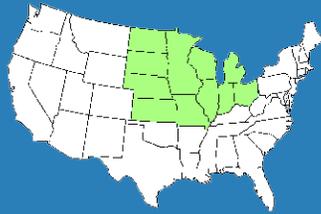

WAGES BY OCCUPATION FIRST QUARTER 2012

SOC Code	Standard Occupational Code Title	Hourly Average	Hourly Entry Wage	Hourly Experienced	Annual Average Fremont MC	Annual Average Nebraska
11-0000	Management Occupations	\$41.04	\$21.09	\$51.01	\$85,358	\$96,018

00-0000	Total all occupations	\$16.47	\$8.97	\$20.22	\$34,260	\$39,409

Source: Nebraska Department of Labor, Occupational Employment Statistics, Released 2012

- The occupations with the highest average earnings in the Fremont MC were Management Occupations, with workers making an average \$85,358 per year.
- The occupations with the lowest average earnings were Food Preparation and Serving-Related Occupations, with workers making an average \$18,588 per year.

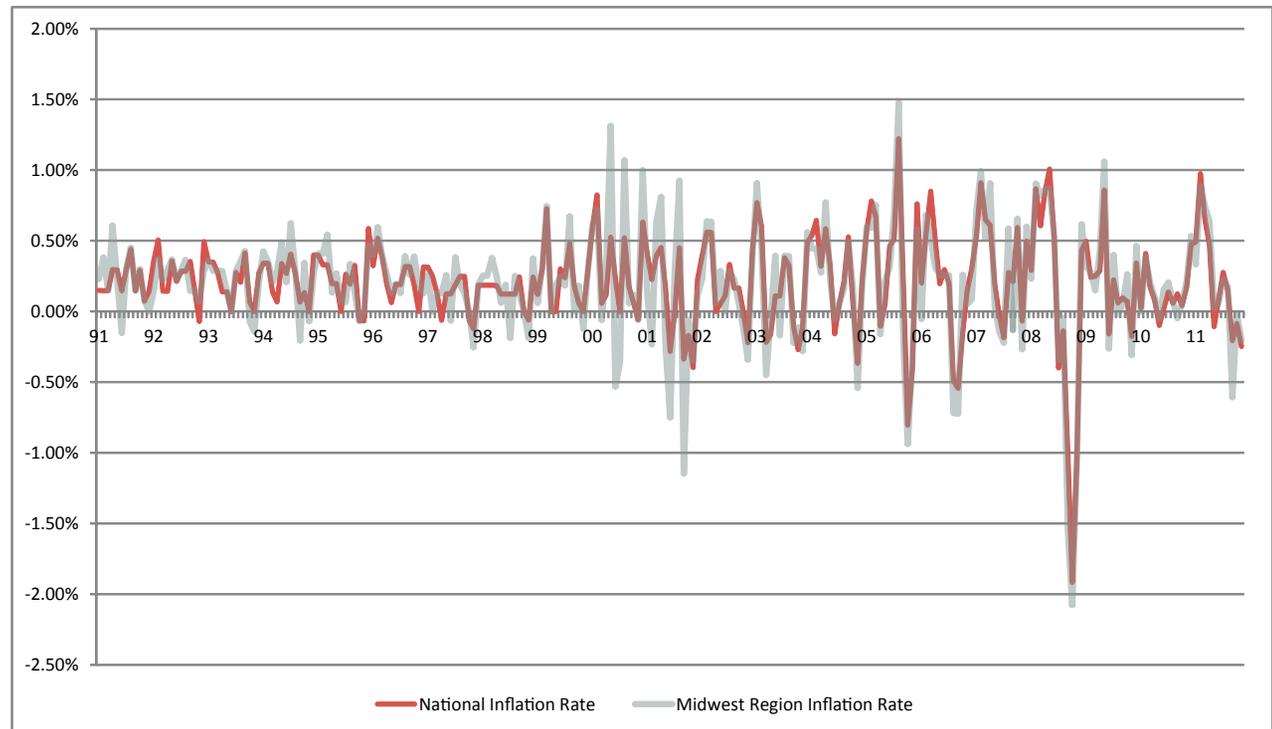

## Midwest Region

The Consumer Price Index (CPI) represents changes in prices of all goods and services purchased for consumption by urban households. User fees (such as water and sewer service) and sales and excise taxes paid by the consumer are also included. Income taxes and investment items (like stocks, bonds, and life insurance) are not included.

The CPI-U includes expenditures by urban wage earners and clerical workers, professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, retirees and others not in the labor force. The CPI-W includes only expenditures by those in hourly wage earning or clerical jobs. As the most widely used measure of inflation, the CPI is an indicator of the effectiveness of government policy. In addition, business executives, labor leaders and other private citizens use the index as a guide in making economic decisions.

## MONTHLY INFLATION RATE MIDWEST VS. U.S. 1991-2011

Source: Bureau of Labor Statistics, Released 2012

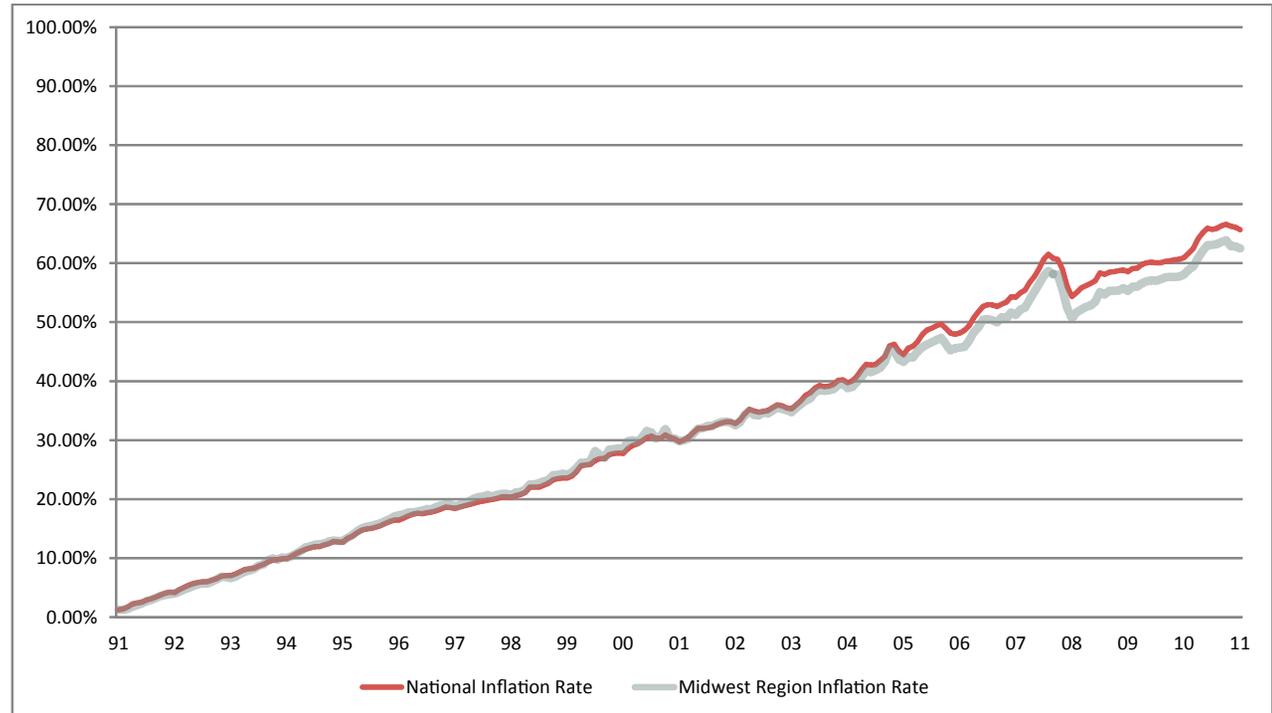

- If prices for these goods rise, the Consumer Price Index will rise and if prices decrease the index will drop.
- The percent changes in the CPI should be directly related to the price changes consumers experience for the time period for everything they buy.

### Midwest Region

The CPI and its components are used to adjust other economic series for price change and to translate these series into inflation-free dollars. Over 2 million workers are covered by collective bargaining agreements which tie wages to the CPI. The index affects the income of almost 80 million people as a result of statutory action: 47.8 million Social Security beneficiaries, about 4.1 million military and Federal Civil Service retirees and survivors, and about 22.4 million food stamp recipients. Changes in the CPI also affect the cost of lunches for the 26.7 million children who eat lunch at school. Some private firms and individuals use the CPI to keep rents, royalties, alimony payments and child support payments in line with changing prices. Since 1985, the CPI has been used to adjust the Federal income tax structure to prevent inflation-induced increases in taxes.

## INFLATION: MIDWEST VS. U.S. 1991-2011, BASE YEAR 1991

Source: Bureau of Labor Statistics, Released 2012

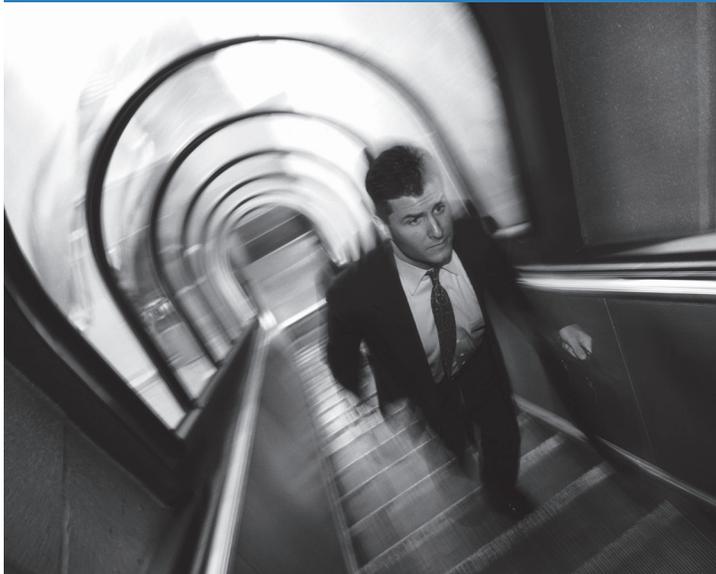

- Overall price levels increased by 65.7% over the past 20 years in the United States.
- The Midwest Region was slightly slower at 62.5% over that same period.
- This way of calculating inflation allows a person to track how a specific price, for example annual wages, have kept up with the rest of prices in the economy over the past two decades.

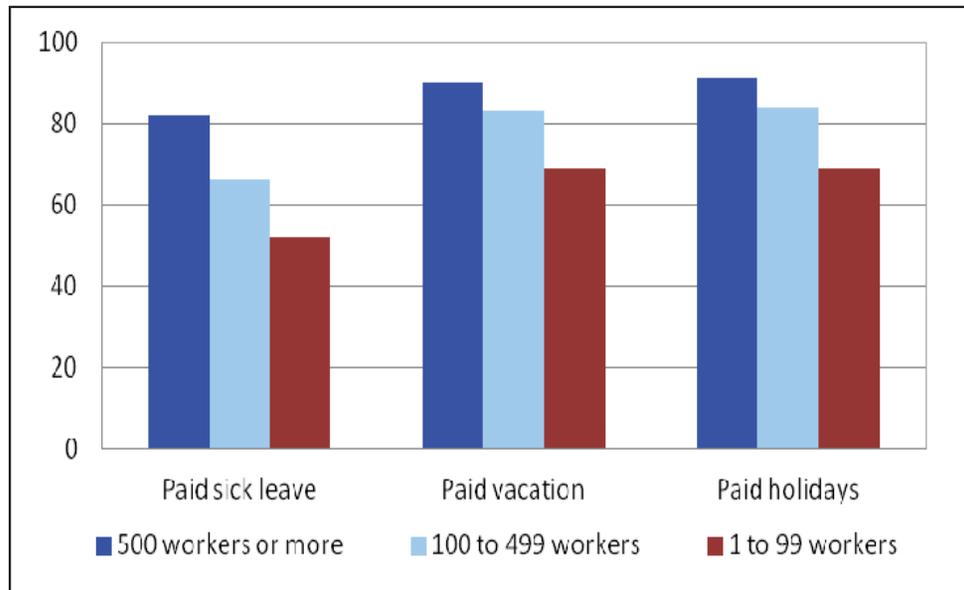

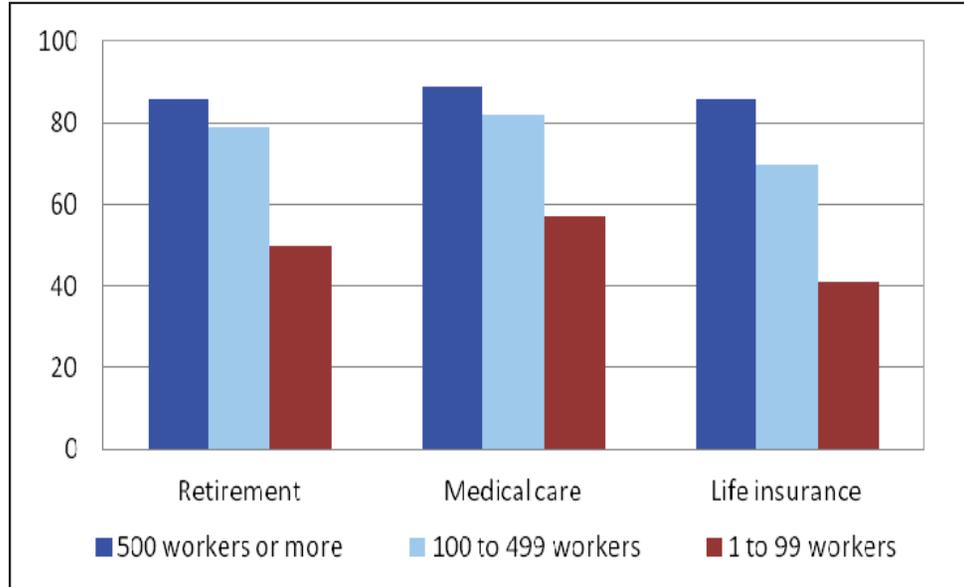

United States of America

The National Compensation Survey (NCS) covers the incidence and detailed provisions of selected employee benefit plans in private establishments. The data are presented as the percent of employees who have access to or participate in certain benefits, or as average benefit provisions (for example, the average number of paid holidays provided to employees each year).

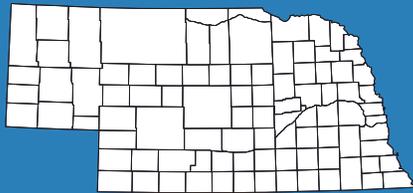

The NCS provides incidence and extensive provisions data for two major benefit areas: Health insurance and Retirement (both defined benefit and defined contribution components).

EMPLOYERS OFFERING BENEFITS 2012

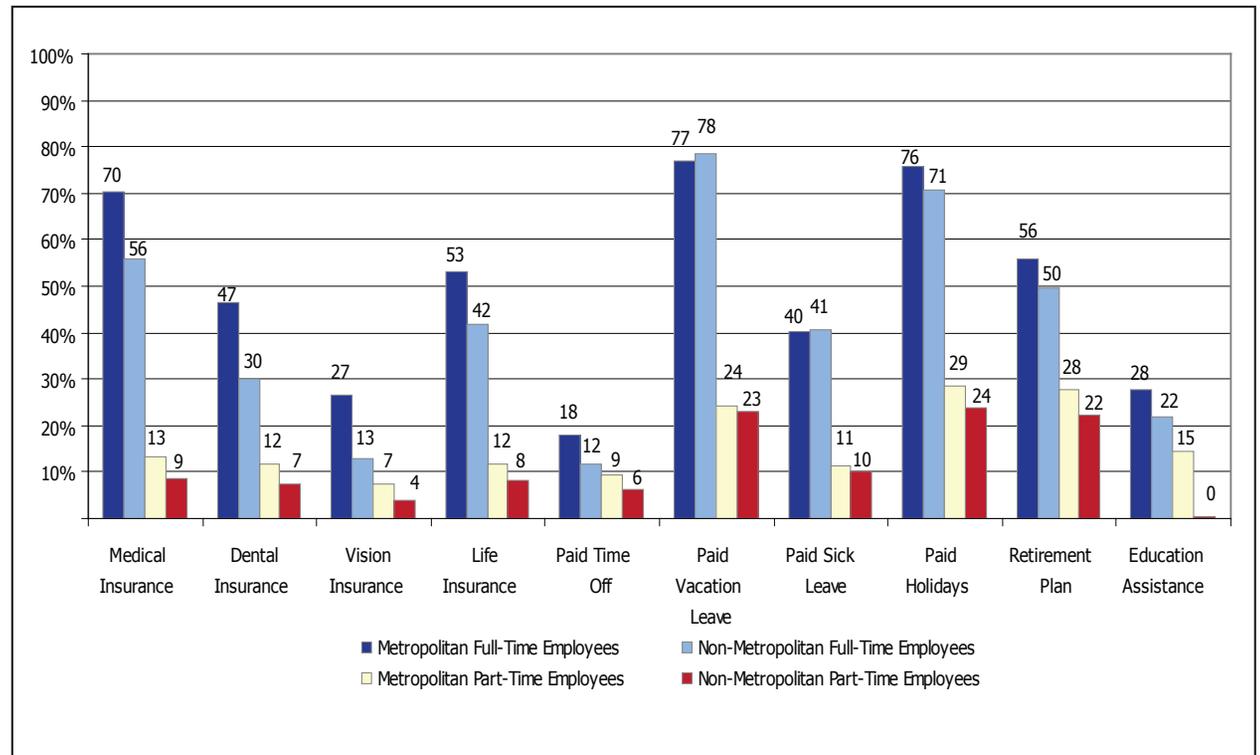

Source: Large, medium, and small establishments: Access to selected benefits, private industry, March 2012

### Nebraska Statewide

The 2006 Nebraska Employee Benefits Survey aimed to understand the type of benefits provided by businesses in Nebraska to their employees and the prevalence of employers offering these benefits. This information is important to both employers and employees since benefits can account for a significant portion of an employee's compensation package. This was the fourth time the Department of Labor conducted an employee benefits survey.

## EMPLOYERS OFFERING BENEFITS 2006

Source: Nebraska Department of Labor, Benefits Survey, Released 2007

	1-4 Employees	5-9 Employees	10-19 Employees	20-49 Employees	50-99 Employees	100-249 Employees	250+ Employees	All Sizes
Medical Insurance	30.3%	52.6%	67.3%	79.7%	92.6%	97.4%	98.6%	63.8%
Dental Insurance	13.0%	24.1%	36.9%	53.5%	72.6%	90.0%	94.4%	39.0%
Vision Insurance	6.0%	13.1%	19.0%	26.1%	39.2%	48.1%	64.1%	20.2%
Life Insurance	15.9%	33.5%	49.4%	64.4%	81.7%	93.8%	97.2%	48.1%
Paid Time Off	7.0%	10.7%	14.0%	18.4%	21.6%	36.0%	38.5%	14.8%
Paid Vacation	59.7%	79.5%	80.6%	82.7%	85.4%	77.6%	81.9%	77.7%
Paid Sick Leave	30.9%	41.7%	42.3%	42.8%	48.1%	39.7%	50.7%	40.8%
Paid Holidays	57.0%	74.6%	76.0%	76.5%	83.1%	80.3%	92.3%	73.6%
Retirement Plan	27.3%	46.5%	55.6%	62.5%	77.0%	85.1%	83.2%	53.3%
Educational Assistance	11.0%	20.2%	22.9%	28.8%	43.8%	61.1%	84.0%	25.6%

- Full-time employees were more likely to receive paid vacation leave than any other benefit on the survey.
- Part-time employees received paid holidays more often than any other benefit.
- Vision insurance was the least likely to be provided of any of the health insurance categories on the survey.

Nebraska Statewide

This table indicates the percentage of employees in each industry who have health insurance, broken down by the size of the firms which they work for.

EMPLOYERS OFFERING HEALTH INSURANCE 2006

	1-4 Employees	5-9 Employees	10-19 Employees	20-49 Employees	50-99 Employees	100-249 Employees	250+ Employees	All Sizes

Other Services	24.8%	48.0%	70.2%	72.4%	81.3%	100.0%	100.0%	52.6%

Source: Nebraska Department of Labor, Benefits Survey, Released 2007

- Medical Insurance is most common in the Information industry, where 83.1% of employees receive the benefit.
- Small firms provide medical insurance at much lower rates than very large ones in every industry.
- Leisure and Hospitality is the industry which is least likely to provide medical coverage, at 38.5%.

## Fremont MC

The North American Industry Classification System (NAICS) was developed under the direction and guidance of the Office of Management and Budget (OMB) as the standard for use by Federal statistical agencies in classifying business establishments for the collection, tabulation, presentation, and analysis of statistical data describing the U.S. economy. Use of the standard provides uniformity and comparability in the presentation of these statistical data. NAICS is based on a production-oriented concept, meaning that it groups establishments into industries according to similarity in the processes used to produce goods or services.

## EMPLOYMENT AND WAGES BY INDUSTRY 2011

	ESTABLISHMENTS	AVG EMPLOYMENT	AVG WEEKLY WAGE	TOTAL WAGES

- The occupations with the highest average earnings in the Fremont MC were Management Occupations, with workers making an average \$85,358 per year.
- The occupations with the lowest average earnings were Food Preparation and Serving-Related Occupations, with workers making an average \$18,588 per year.

## Fremont MC

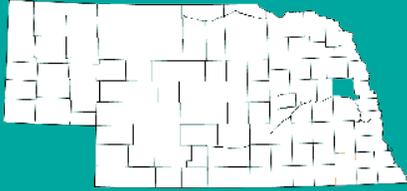

The Quarterly Census of Employment and Wages (QCEW) Program is a cooperative program involving the Bureau of Labor Statistics of the U.S. Department of Labor and the State Employment Security Agencies. The QCEW program produces a comprehensive tabulation of employment and wage information for workers covered by State unemployment insurance laws and Federal workers covered by the Unemployment Compensation for Federal Employees program. Publicly available files include data on the number of establishments, monthly employment, and quarterly wages, by NAICS industry, by county, by ownership sector, for the entire United States. These data are aggregated to annual levels, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (national, State, and Metropolitan Statistical Area (MSA)).

## EMPLOYMENT CHANGE BY INDUSTRY 2001-2011

INDUSTRY	2001 EMPLOYMENT	2011 EMPLOYMENT	EMPLOYMENT CHANGE	% CHANGE
Agriculture, Forestry, Fishing and Hunting	117	134	17	14.53%

<b>All Industry</b>	<b>16,709</b>	<b>16,199</b>	<b>-510</b>	<b>-3.05%</b>

Source: Nebraska Department of Labor, Quarterly Census of Employment and Wages, Released 2011

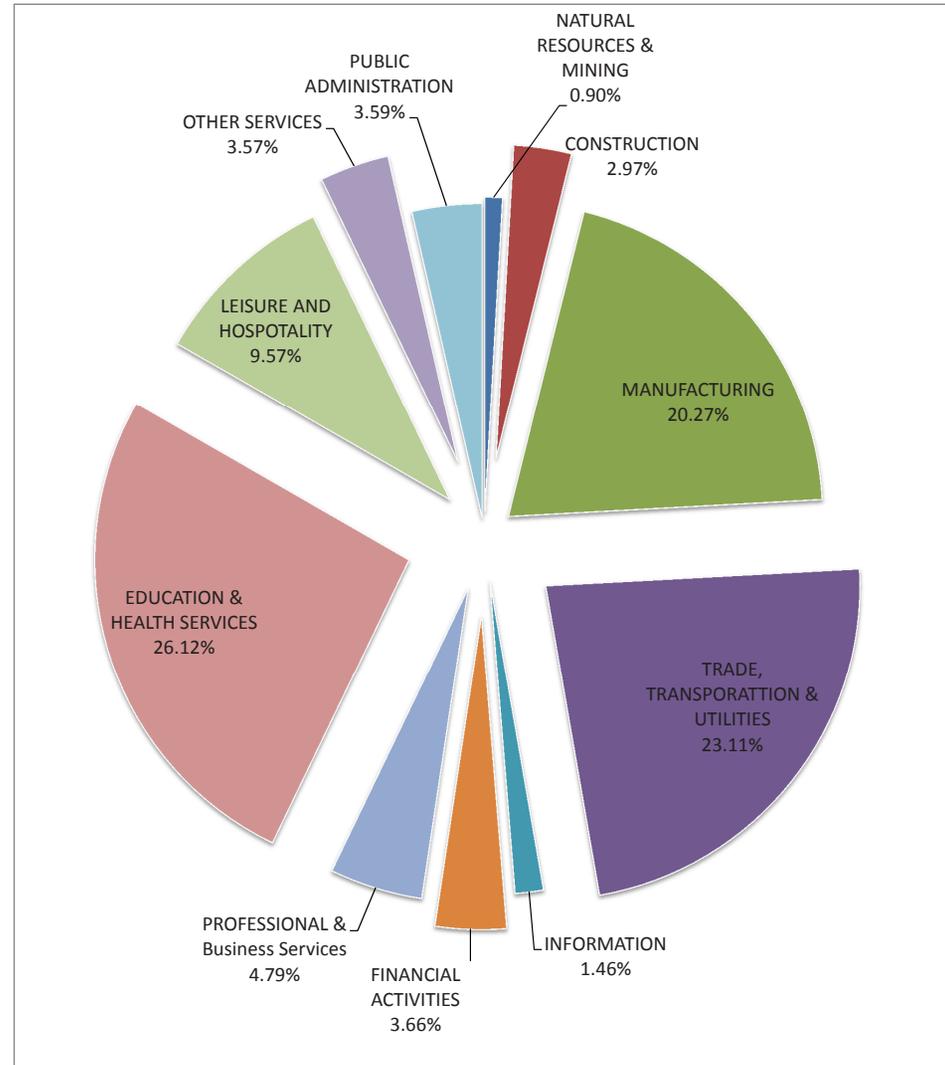

- The Information industry saw the biggest percentage growth between 2001 and 2011 at 58.78%.
- However, Health Care and Social Assistance was the biggest gainer in numbers, gaining 549 employed in the industry.

Fremont MC

Employment data under the QCEW program represent the number of covered workers who worked during, or received pay for, the pay period including the 12th of the month. Excluded are members of the armed forces, the self-employed, proprietors, domestic workers, unpaid family workers, and railroad workers covered by the railroad unemployment insurance system. Wages represent total compensation paid during the calendar quarter, regardless of when services were performed. Included in wages are pay for vacation and other paid leave, bonuses, stock options, tips, the cash value of meals and lodging, and in some States, contributions to deferred compensation plans (such as 401(k) plans). The QCEW program does provide partial information on agricultural industries and employees in private households.

INDUSTRY EMPLOYMENT DISTRIBUTION 2011

Source: Nebraska Department of Labor, Quarterly Census of Employment and Wages, Released 2011

- The three biggest industries in the Fremont MC share a fairly equal percentage of the workforce. Education and Health Services, Trade, Transportation, and Utilities, and Manufacturing taking 26.12%, 23.11%, and 20.27% respectively.

### Fremont MC

A location quotient measures the concentration of employment in a given industry (relative to a base total, in this case all industries) within a geographical area relative to the concentration of employment within that same industry for a larger geographical area, of which the first geographical area is a subset. Location Quotients demonstrate disparity in the relative proportional composition of industry employment. For example one might imagine that Detroit MI the ‘Motor City’ would have a high location quotient in the manufacturing industry sector compared the US.

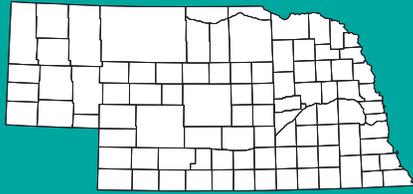

Location Quotients can be used in determining which industry sectors are ‘basic’ to an area. This metric has been used to predict what sorts of economic goods an area might export or import. It also sheds light on which industry sectors are most vital to a community’s economic wellbeing.

## INDUSTRY LOCATION QUOTIENT 2011

Industry	LQ: NE TO	LQ: FREMONT TO
	USA	NE
Agriculture, Forestry, Fishing and Hunting	1.53	0.60
Mining, Quarrying, and Oil and Gas Extraction	0.20	****
Utilities	1.63	0.07
Construction	1.03	0.66
Manufacturing	1.14	1.94
Wholesale Trade	1.06	1.06
Retail Trade	1.02	1.33
Transportation and Warehousing	1.25	0.66
Information	0.88	0.76
Finance and Insurance	1.37	0.46
Real Estate and Rental and Leasing	0.67	0.89
Professional, Scientific, and Technical Services	0.82	0.24
Management of Companies and Enterprises	1.25	0.08
Administrative and Support and Waste Management	0.79	0.72

Health Care and Social Assistance	1.00	1.18
Arts, Entertainment and Recreation	0.80	0.59
Accommodation and Food Services	0.87	1.12
Other Services (except Public Administration)	0.83	1.24
Public Administration	0.97	0.65

Source: Nebraska Department of Labor, Quarterly Census of Employment and Wages, Released 2011

- Fremont has a high concentration of employment in the Manufacturing industry relative to the rest of the state.
- Several of the industries in which the Fremont MC has a low concentration of employment have high concentrations in the nearby Omaha and Norfolk MCs.

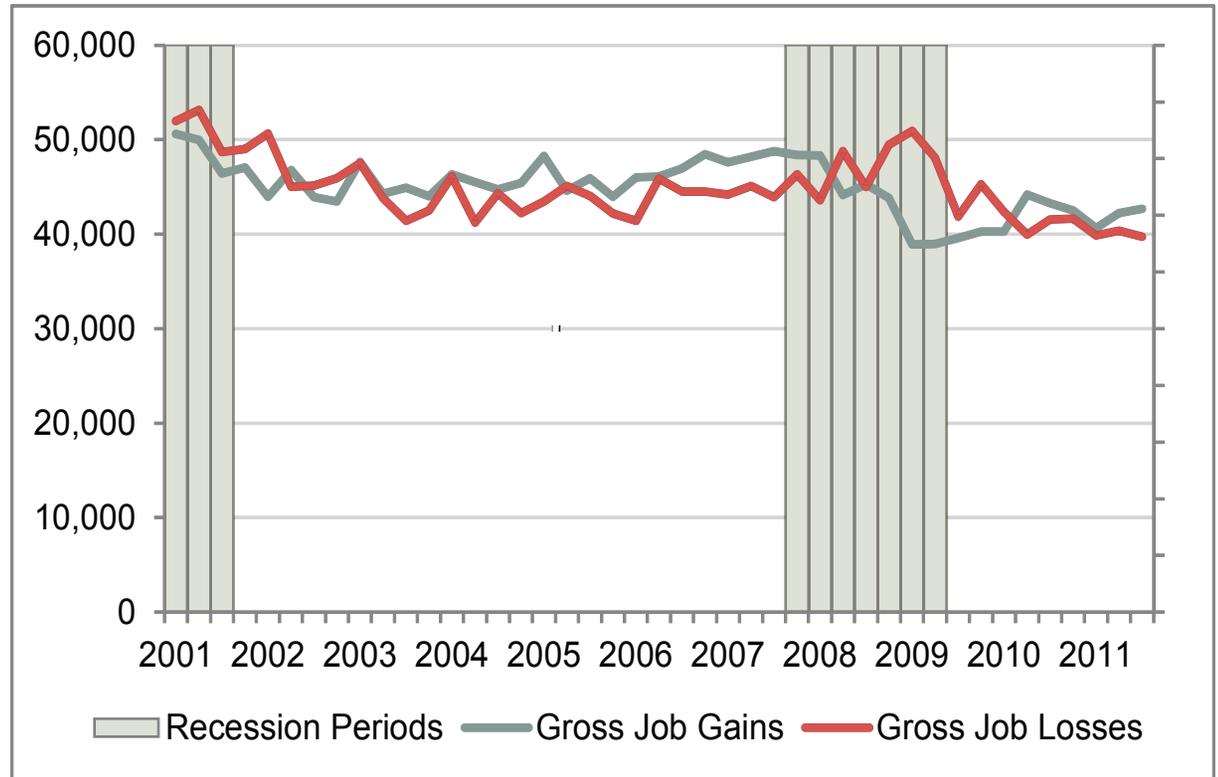

Nebraska Statewide

Business Employment Dynamics consist of a quarterly series of statistics on gross job gains and gross job losses. Gross job gains and gross job losses reveal some aspects of business dynamics, including establishment openings and closings and establishment expansions and contractions.

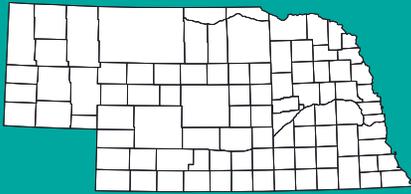

BUSINESS EMPLOYMENT DYNAMICS: GAINS AND LOSSES  
2001-2011

Note: Seasonally Adjusted Data

Source: Bureau of Labor Statistics, Business Employment Dynamics, Released 2012

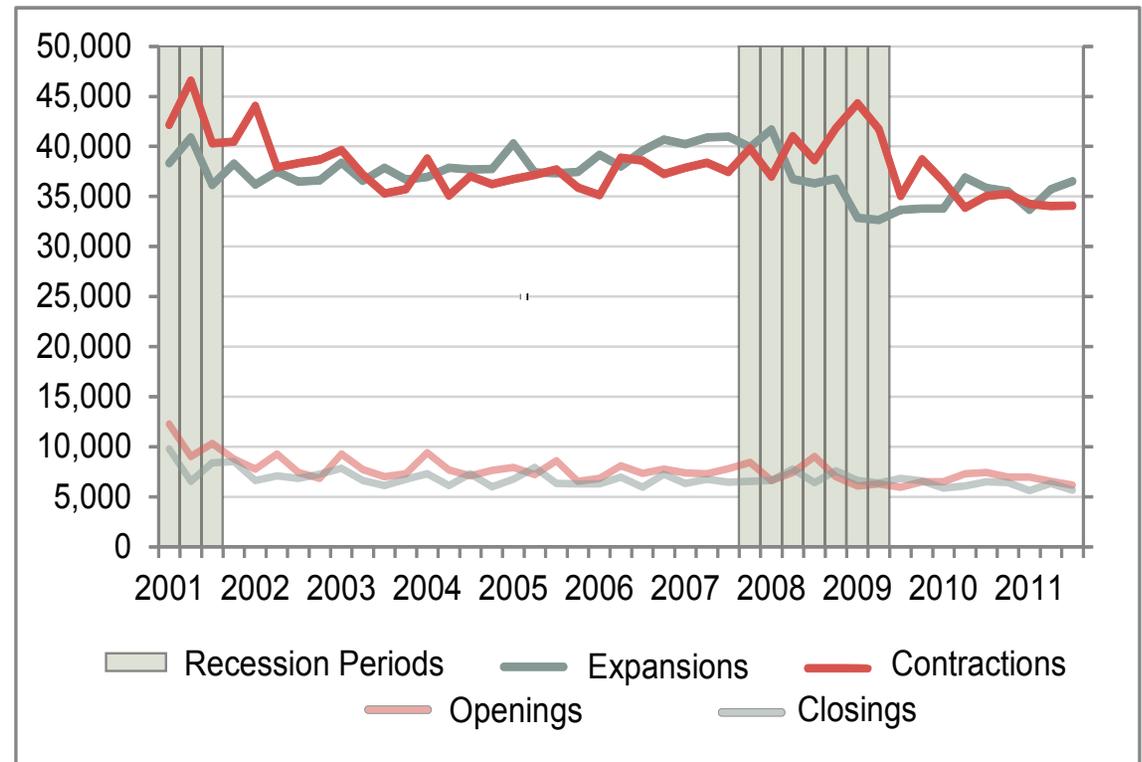

- Job gains have outpaced job losses every month since the second quarter of 2010.
- Government employees, private households, and establishments with zero employment are not included in any BED data.
- There was a net gain of 2,951 jobs during the month of third quarter of 2011, the last month data was available for this publication.

### Nebraska Statewide

The microdata used to construct the gross job gains and gross job losses statistics are from the Quarterly Census of Employment and Wages (QCEW), or ES-202, program. These data include all establishments subject to State unemployment insurance (UI) laws and Federal agencies subject to the Unemployment Compensation for Federal Employees program. Each quarter, the State agencies edit and process the data and send the information to BLS in Washington, DC. The data cover approximately 98 percent of all employment; the major exclusions from UI coverage are the self-employed and certain nonprofit organizations. Establishments report employment for the pay period including the 12th of the month. The job flow estimates report employment changes between the third month of each quarter.

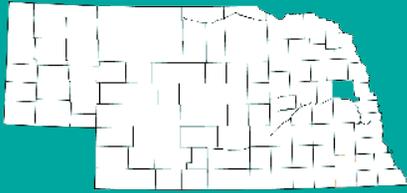

## BUSINESS EMPLOYMENT DYNAMICS: EXPANSIONS AND CONTRACTIONS 2001-2012

Note: Seasonally Adjusted Data

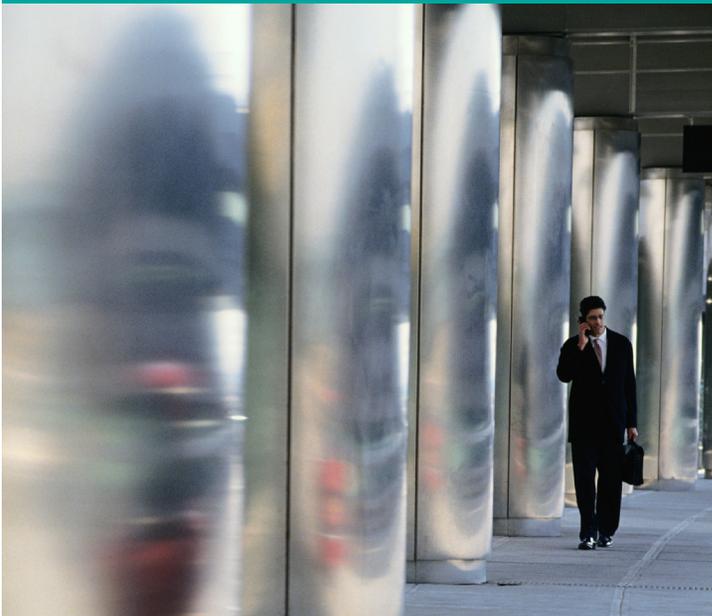

Source: Bureau of Labor Statistics, Business Employment Dynamics, Released 2012

- Expansions outpaced contractions in the state for the 3rd quarter of 2011.
- 44,299 contractions occurred in the first quarter of 2001, this was the highest level of contraction during the most recent recession.
- 6,157 openings occurred in the state in the third quarter of 2011.

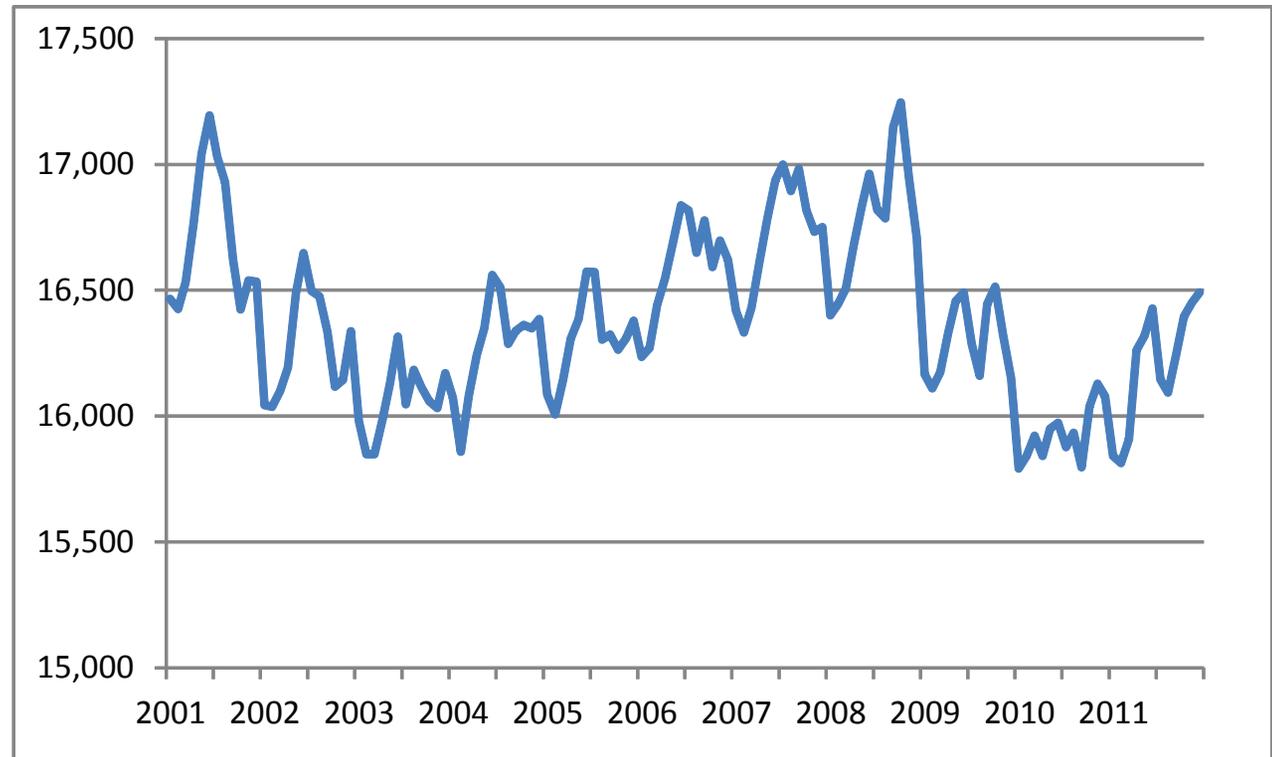

### Fremont MC

QCEW is the Quarterly Census of Employment and Wages. The program originated in the 1930s, and was known as the ES-202 program until 2003 when the current QCEW name was adopted. The primary economic product is the tabulation of employment and wages of establishments which report to the Unemployment Insurance (UI) programs of the United States. Employment covered by these UI programs represents about 99.7% of all wage and salary civilian employment in the country.

## TOTAL EMPLOYMENT TRENDS 2001-2012

Source: Nebraska Department of Labor, Quarterly Census of Employment and Wages, Released 2012

- Employment in the Fremont MC trended up from 2003 to 2008 and experienced a couple of big drops in employment in 2008 and 2009.

## Fremont MC

The Quarterly Workforce Indicators (QWI) are a set of economic indicators -- including employment, job creation, wages, and worker turnover -- that can be queried by different levels of geography -- state, county, metro, and workforce investment area -- as well as by detailed industry, gender, and age of workers. You can query the data directly by using the QWI Online tool on this site.

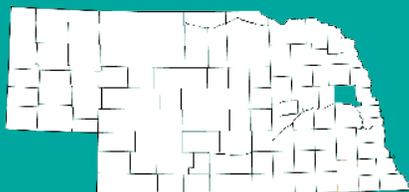

The QWI are built upon wage records in the Unemployment Insurance (UI) system and information from state QCEW data. The universe of QWI data is UI-covered earnings. UI coverage is broad, covering about 99.7% of total wage and salary civilian jobs.

## QUARTERLY WORKFORCE INDICATORS 2011

	Employment	Net Job Flows	Job Creation	New Hires	Separations	Turnover	Avg Monthly Earnings	Avg New Hire Earnings
Agriculture, Forestry, Fishing & Hunting	128	-5	26	39	89	4.30%	\$3,518	\$2,121
Mining, Quarrying, & Oil & Gas Extraction	12	-1	1	0	0	5.90%	2,733	2,342
Utilities	130	-5	37	22	57	3.18%	\$4,589	\$2,692
Construction	520	45	214	427	467	8.75%	3,035	2,174
Manufacturing	3,102	-52	341	967	1,137	5.60%	\$3,181	\$2,512
Wholesale Trade	735	11	141	342	398	6.78%	4,897	2,992
Retail Trade	2,284	164	377	1,385	1,327	8.50%	\$2,127	\$1,264
Transportation & Warehousing	481	43	93	248	238	7.35%	3,516	2,853
Information	231	22	55	199	203	8.90%	\$2,589	\$1,668
Finance & Insurance	405	3	54	97	107	4.95%	3,452	2,106
Real Estate & Rental & Leasing	134	-3	28	100	114	10.95%	\$1,627	\$1,050
Professional, Scientific, & Technical Services	225	22	89	89	133	6.53%	3,588	3,263
Management of Companies & Enterprises	31	-14	0	6	28	12.18%	\$2,970	\$1,039
Administrative & Support & Waste Management	599	80	255	918	993	15.68%	3,114	2,029
Educational Services	1,585	6	266	533	887	7.55%	\$3,110	\$1,374
Health Care & Social Assistance	2,509	53	252	1,012	1,083	7.30%	2,792	1,943
Arts, Entertainment & Recreation	140	32	88	97	116	15.15%	\$1,318	\$902
Accommodation & Food Services	1,286	7	279	1,209	1,331	14.53%	971	689
Other Services (except Public Administration)	586	-1	134	382	470	10.68%	\$1,485	\$903
Public Administration	526	-36	175	148	370	5.58%	3,233	1,540
<b>All Industry</b>	<b>15,646</b>	<b>370</b>	<b>2,879</b>	<b>8,225</b>	<b>9,551</b>	<b>8.08%</b>	<b>\$2,803</b>	<b>\$1,720</b>

Source: Nebraska Department of Labor, Quarterly Workforce Indicators, Released 2012

- The industry with the lowest turnover rate also had the highest average monthly earnings. Utilities had a 3.2% turnover rate and \$4,589 average monthly earnings.
- The industry with the highest turnover rate was Administrative and Support and Waste Management, with a 15.7% rate.

## Fremont MC

The Occupational Employment Statistics (OES) program conducts a semi-annual mail survey designed to produce estimates of employment and wages for specific occupations. The OES program collects data on wage and salary workers in nonfarm establishments in order to produce employment and wage estimates for about 800 occupations. Data from self-employed persons are not collected and are not included in the estimates. The OES program produces these occupational estimates by geographic area, and by industry and ownership. Estimates based on geographic areas are available at the National, State, Metropolitan, and Nonmetropolitan Area levels. The Bureau of Labor Statistics produces occupational employment and wage estimates for over 450 industry classifications at the national level.

## EMPLOYMENT BY OCCUPATION: 2010-2011

SOC Code	Standard Occupational Code Title	Est	Est	Employment Difference
		Employment May 2010	Employment May 2011	
<b>00-0000</b>	<b>Total all occupations</b>	<b>15270</b>	<b>14830</b>	<b>-440</b>
11-0000	Management Occupations	400	360	-40

51-0000	Production Occupations	2120	2560	440
53-0000	Transportation and Material Moving Occupations	1160	1140	-20

Source: Nebraska Department of Labor, Occupational Employment Statistics, Released 2012

- Fremont saw an overall loss in occupational employment between 2010 and 2011. This loss was driven by significant reductions in employment in Food Prep/Service and Office Administration Occupations .

## Fremont MC

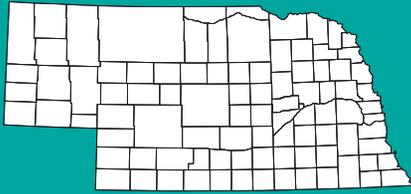

The 2010 Standard Occupational Classification (SOC) system is used by Federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating, or disseminating data. All workers are classified into one of 840 detailed occupations according to their occupational definition. To facilitate classification, detailed occupations are combined to form 461 broad occupations, 97 minor groups, and 23 major groups. Detailed occupations in the SOC with similar job duties, and in some cases skills, education, and/or training, are grouped together.

## EMPLOYMENT BY OCCUPATION: FIRST QUARTER 2011

SOC Code	Standard Occupational Code Title	Estimated Employment May 2011	Hourly Median Wages	Annual Median Wages
41-2011	Cashiers	620	\$9.31	\$19,379.00
31-1012	Nursing Aides, Orderlies, & Attendants	440	\$11.92	\$24,808.00
41-2031	Retail Salespersons	440	\$9.58	\$19,924.00
29-1111	Registered Nurses	400	\$25.67	\$53,391.00
35-3031	Waiters & Waitresses	350	\$8.44	\$17,548.00
41-4012	Sales Representatives, Wholesale & Manufacturing, Except Technical & Scientific Products	340	\$23.24	\$48,352.00

51-4121	Welders, Cutters, Solderers, & Brazers	140	\$12.34	\$25,652.00
53-7011	Conveyor Operators & Tenders	140	\$13.99	\$29,099.00

Source: Nebraska Department of Labor, Occupational employment Statistics, released 2012

- 15 of the top 20 occupations in the Fremont MC paid median wages of over \$10 per hour.

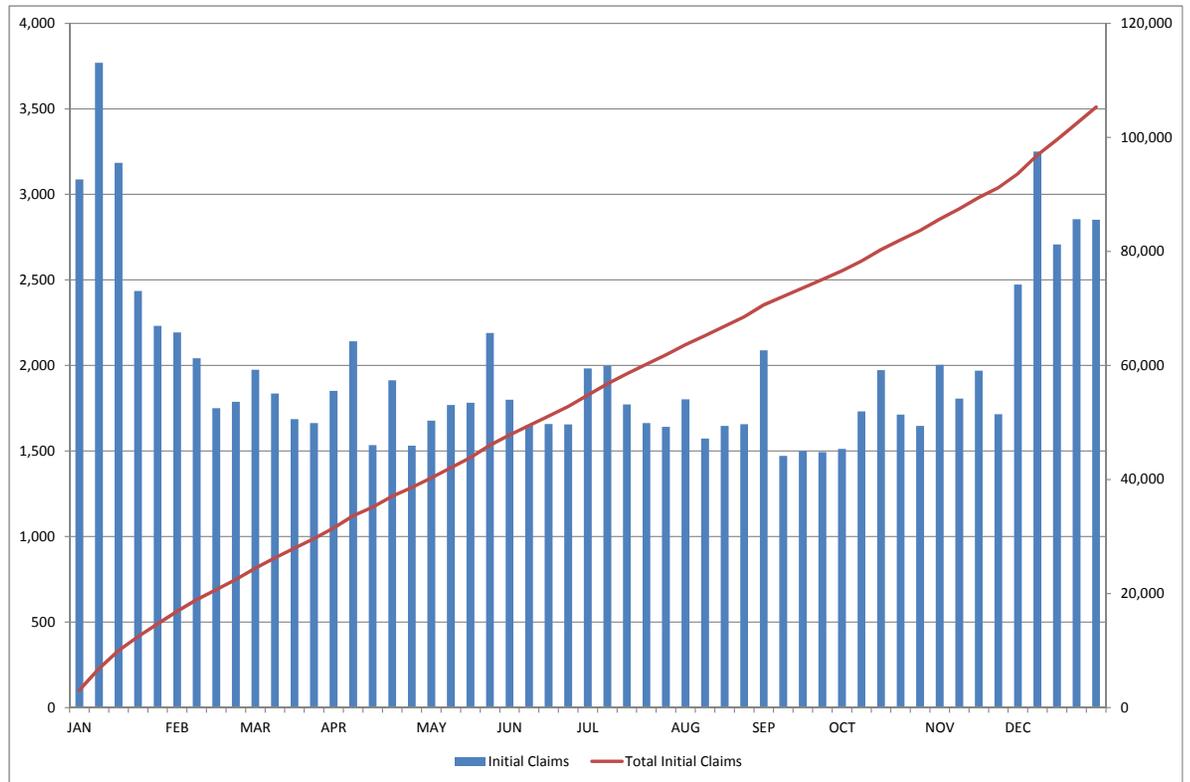

### Nebraska Statewide

The Unemployment Insurance weekly claims data are used in current economic analysis of unemployment trends in the Nation, and in each State. Initial claims measure emerging unemployment and continued weeks claimed measure the number of persons claiming unemployment benefits.

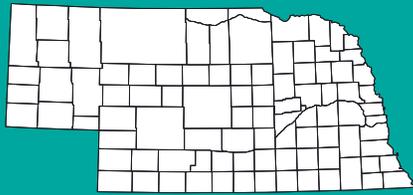

## UNEMPLOYMENT INSURANCE: INITIAL CLAIMS 2011

Source: Nebraska Department of Labor, Unemployment Insurance Program, Released 2012

- The labor force in Nebraska hit over one million in April of 2011 and has remained above one million through August 2012, latest available at the time of publication.
- Nebraska’s unemployment consistently ranks among the lowest in the nation, pointing to a strong stable economy.

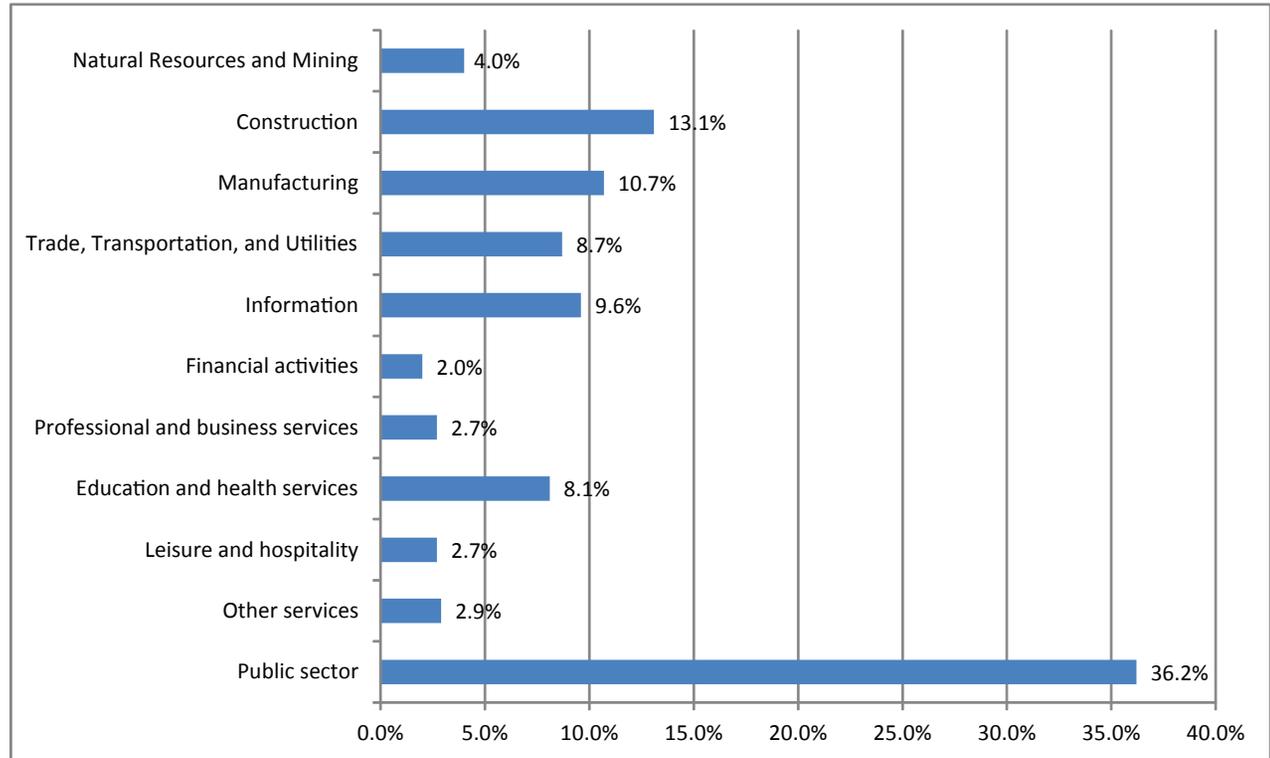

### Nebraska Statewide

The chart on the right contains U.S. Nationwide data. The chart below contains Nebraska statewide data.

The estimates in this release are obtained from the Current Population Survey (CPS), which provides the basic information on the labor force, employment, and unemployment. The survey is conducted monthly for the Bureau of Labor Statistics by the U.S. Census Bureau from a scientifically selected national sample of about 60,000 eligible households. The union membership and earnings data are tabulated from one-quarter of the CPS monthly sample and are limited to wage and salary workers. All self-employed workers are excluded.

	2010	2011
Total Employed	813,000	828,000
Total Union Members	75,000	65,000
Percent Union Members	9.3%	7.9%
Total Representation by Unions	96,000	83,000
Percent Represented by Unions	11.8%	10.0%

## UNIONIZATION BY INDUSTRY 2010-2011

Notes: Includes wage and salary workers age 16 and older.

Source: Bureau of Labor Statistics, Union Members in 2010-2011, released 2012

- Union participation within Nebraska declined by 10,000 employees from 2010 to 2011.
- The public sector has the highest unionization of any industry in the nation.
- Financial Activities had the lowest percent of union members for any industry.

### Northeast Economic Development Region

Projections by Industry category creates an estimate for the number of job openings which are expected to occur in each field for the next 10 years throughout the state. Industry employment projections are based on historical, statistical and subjective analysis of industry trends. Long-term industry projections are produced every two years and the results are then used as an input into occupational projections.

## LONG TERM INDUSTRY EMPLOYMENT PROJECTIONS 2010-2020

Industry	2010 Annual Employment	2020 Projected Employment	Change in Employment 2010-2020	Percent Change (%)	Compound Annual Growth Rate (%)
Agriculture, Forestry, and Fishing	15,777	15,572	-205	-1.3%	-0.13%

<b>Total</b>	<b>127,189</b>	<b>136,071</b>	<b>8,882</b>	<b>7.0%</b>	<b>0.68%</b>

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

- Manufacturing is expected to see the most growth between 2010 and 2020, adding 1,509 jobs to the Northeast Economic Region.
- Information is expected to take the biggest percentage hit, losing 9.8% of the jobs between 2010 and 2020.

### Northeast Economic Development Region

Projections by Occupation give estimates for the number of jobs which will open in each type of position in the next 10 years throughout the state. Applying industry staffing patterns from the most recent Occupational Employment Statistics survey to industry projections provides forecasts for occupational demand by industry for as many as 750 different job titles.

## LONG TERM OCCUPATIONAL EMPLOYMENT PROJECTIONS 2010-2020

	2010 Est. Employment	2020 Proj. Employment	Growth Openings	Replacement Openings	Total Openings	Numeric Change	Percent Change (%)
Management Occupations	7,234	7,256	160	1,480	1,640	22	0.3%

Production Occupations	18,856	20,702	1,910	4,396	6,306	1,846	9.8%
Transportation and Material Moving Occupations	11,190	11,900	732	2,749	3,481	710	6.3%
<b>Total, All Occupations</b>	<b>134,935</b>	<b>143,860</b>	<b>9,812</b>	<b>32,940</b>	<b>42,752</b>	<b>8,925</b>	<b>6.6%</b>

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

- Production occupations are expected to be the biggest gainers, gaining 1,173 jobs between 2010 and 2020.
- Transportation and Material Moving Occupations are expected to be the number two mover, of course to go along with ramped up Production.

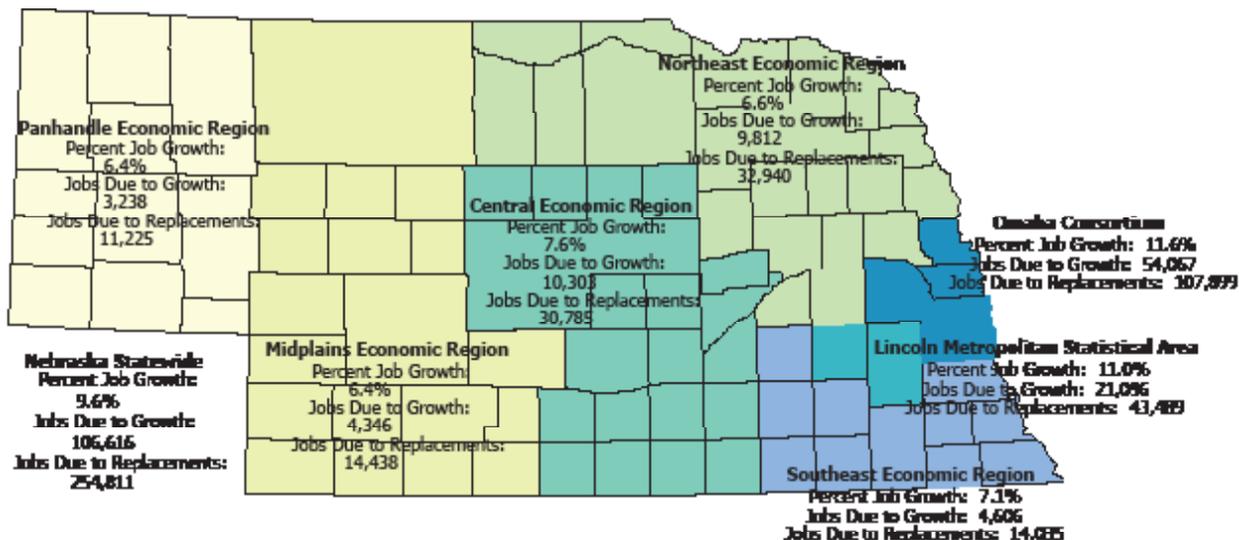

### Nebraska Statewide

Using Occupational Projections data, expectations of the job growth occurring throughout the state and in each economic region for the next 10 years are created. Employment projections provide current and forecasted economic trends. According to the current long-term occupational projections, each region in Nebraska is expected to see an increase in employment over the next several years.

These data estimate the projected number of job openings for a region. For occupations that require training, the data may be used to assess the minimum number of workers who will need to be trained. If employment is projected to increase from 2010 to 2020, then job openings due to growth are equal to the employment change. If employment is projected to decline, then there are no job openings due to growth. Replacement needs are the number of projected openings resulting from workers retiring from or permanently leaving an occupation. Replacement needs are calculated from monthly CPS data for 2001 to 2010.

## PROJECTED EMPLOYMENT CHANGE BY REGION 2010-2020

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

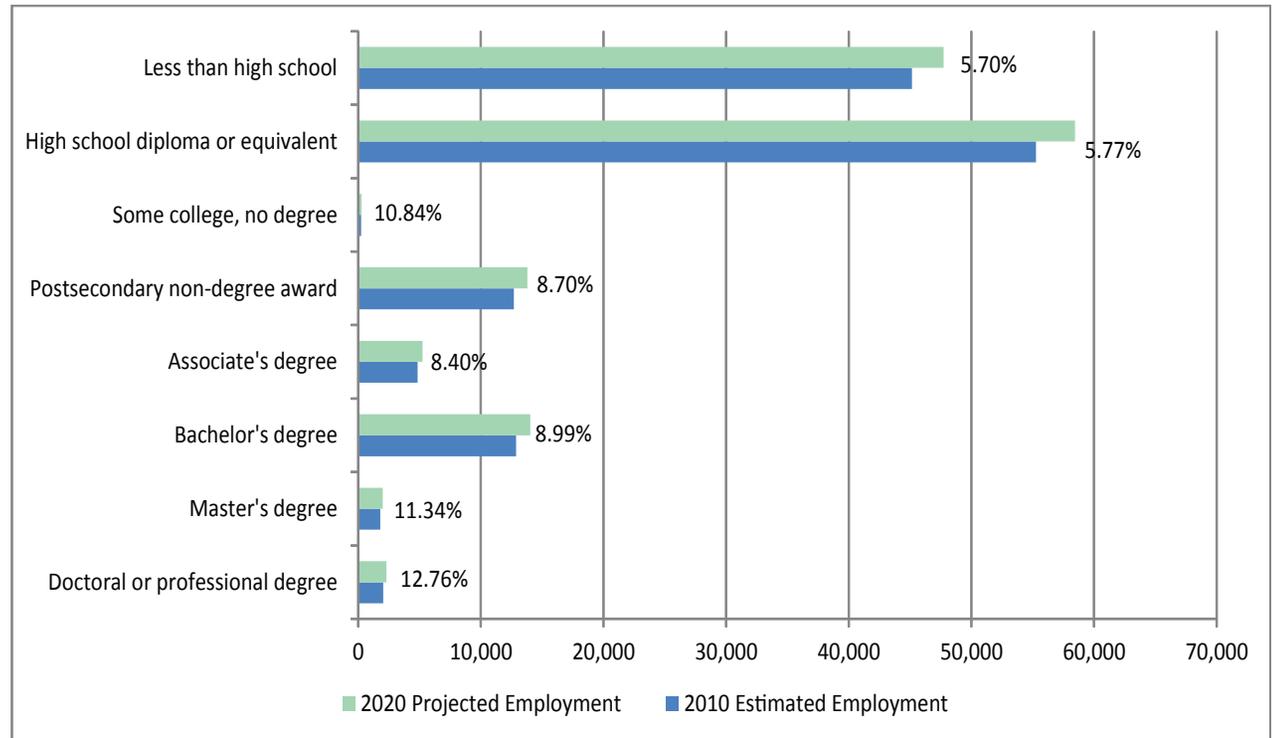

- Employment in the Lincoln and Omaha MSAs is expected to grow at a much higher rate than the rest of the state.
- Employment in the Northeast Economic Region is expected to grow at the highest rate for the rest of the state.

### Northeast Economic Development Region

Using Occupational Projections data, expectations of the job growth for positions which require different levels of entry education are created. Occupational projections data can be examined by education and training. There are eleven educational and training categories that are determined by the level most often required for that occupation, sometimes an employer will require more or less.

## PROJECTED EMPLOYMENT CHANGE BY EDUCATION LEVEL 2010-2020

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

- Postsecondary non-degree award occupations are expected to grow at the fastest rate in the Northeast Economic Region at 10.97%.
- Master’s degree occupations are expected to grow at the second fastest rate, 10.45%.

### Northeast Economic Development Region

A listing of occupations in the state that are expected to have higher than average wages, training and education requirements, and job openings over the next 10 years. The occupations listed in the table represent the top high wage, skill and demand occupations. These occupations typically offer above average wages, require a higher than average level of education or skill and have a high level of demand. Demand is determined by the number of annual openings, the net change in employment and the growth rate.

## H<sup>3</sup> OCCUPATIONS

Rank	SOC Title	Avg Annual Opening	Avg Hourly Wage	Education & Training
1	Registered Nurses	99	\$25.34	Associate degree
2	Truck Drivers, Heavy and Tractor-Trailer	100	\$17.58	Postsecondary vocational training
3	Elementary School Teachers, Except Special Education	58	NA	Bachelor's degree
4	Licensed Practical and Licensed Vocational Nurses	45	\$16.63	Postsecondary vocational training
5	Secondary School Teachers, Except Special and Vocational Education	39	NA	Bachelor's degree
6	Middle School Teachers, Except Special and Vocational Education	25	NA	Bachelor's degree
7	Accountants and Auditors	25	\$29.97	Bachelor's degree
8	Sales Representatives, Wholesale and Manufacturing, Except Technical and Scientific Products	41	\$22.87	Work experience in a related occupation
9	Computer-Controlled Machine Tool Operators, Metal and Plastic	19	\$17.36	Associate degree
10	Heating, Air Conditioning, and Refrigeration Mechanics and Installers	14	\$17.86	Postsecondary vocational training
11	First-Line Supervisors/Managers of Office and Administrative	23	\$18.56	Work experience in a related occupation
12	Electrical Power-Line Installers and Repairers	17	\$23.97	Associate degree
13	Business Operations Specialists, All Other	18	\$43.85	Bachelor's degree
14	First-Line Supervisors/Managers of Retail Sales Workers	30	\$17.39	Work experience in a related occupation
15	Electricians	21	\$18.81	Postsecondary vocational training
16	Postsecondary Teachers, All Other	NA	NA	Doctoral degree
17	Automotive Service Technicians and Mechanics	19	\$16.58	Postsecondary vocational training
18	Police and Sheriff's Patrol Officers	17	\$17.18	Long-term on-the-job training
19	Loan Officers	11	\$28.53	Bachelor's degree
20	Public Relations Specialists	10	\$20.73	Bachelor's degree

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

- As with most of the Nebraska Economic Development Regions, Registered Nurses are expected to be high wage, high skill, and high demand occupations in the Northeast Economic Development Region.
- Also a trend in H3 jobs are the number two “hot job”, Truck Drivers, Heavy and Tractor-Tailer occupations.

### Northeast Economic Development Region

Utilizing staffing patterns derived from the Occupational Employment Statistic surveys, the projections team creates estimates of which type of positions are expected to increase in specific fields. The chart shows the occupational projections for the largest occupation within the major industry groups based on 2010 estimated employment. Looking at projections from this perspective helps give more detail to the projections as occupations can vary widely from industry to industry.

## OCCUPATIONS BY INDUSTRY 2010-2020

Industry	Largest Occupation	2010 Estimated Employment	2020 Projected Employment	Numeric Change	Percent Change (%)
Natural Resources and Mining	Greenhouse	***	***	***	-1.5%
Construction	Carpenters	565	735	170	30.1%
Manufacturing	Meat, Poultry, and Fish Cutters and Trimmers	***	***	***	15.8%
Trade, Transportation, and Utilities	Cashiers	3,210	3,343	133	4.1%
Information	Advertising Sales Agents	111	103	-8	-7.2%
Financial Activities	Tellers	915	928	13	1.4%
Professional and Business Services	Janitors and Cleaners, Except Maids and Housekeeping Cleaners	***	***	***	7.8%
Education and Health Services	Registered Nurses	1,891	2,131	240	12.7%
Leisure and Hospitality	Combined Food Preparation and Serving Workers, Including Fast Food	1,537	1,711	174	11.3%
Other Services (Except Government)	Bartenders	304	336	32	10.5%
Government	Highway Maintenance Workers	***	***	***	0.7%

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

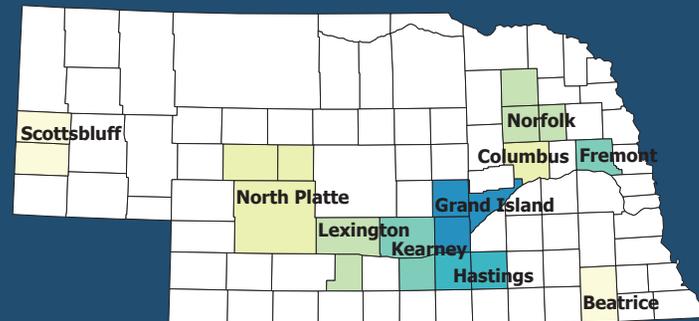

- Registered nurses are expected to add 240 positions to the Education and Health Services industry; a 12.7% increase in employment.
- Carpenters are expected to grow by 30.1% in the Construction industry.

## AREA DEFINITIONS

Labor Market Regional Reviews are available for ten identified Micropolitan Statistical Areas, the Lincoln Metropolitan Statistical Area, and the Omaha Consortium. The publications are available in PDF format on the Nebraska Department of Labor Web site at [networks.nebraska.gov](http://networks.nebraska.gov). Printed copies can be ordered by calling 1-800-876-1377.

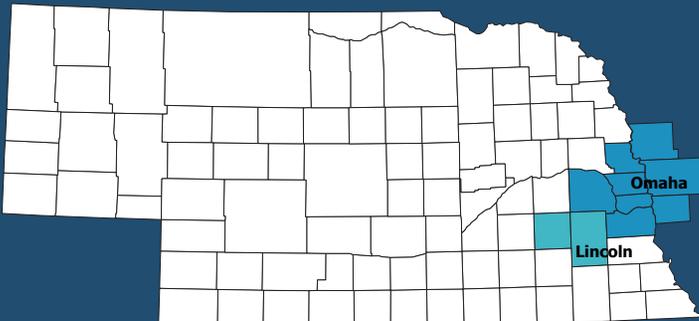

As much as possible, the most local data available is provided for each data element. In some cases data for a larger area must be presented to ensure confidentiality of individuals and businesses. Definitions for geographic areas used in this publication are shown below.

The federal Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas to collect, tabulate, and publish federal data. Metropolitan and micropolitan statistical areas are defined by a core area with a specific population, along with adjacent communities with a high level of social or economic integration with the core area. Both metropolitan and micropolitan statistical areas may be a single county or may include multiple counties.

### Micropolitan Statistical Areas

Micropolitan Statistical Areas are defined as a core population of between 10,000 and 50,000 residents, as well as areas with a high degree of social and economic integration. In Nebraska, there are ten micropolitan statistical areas which can be seen on the map to the left.

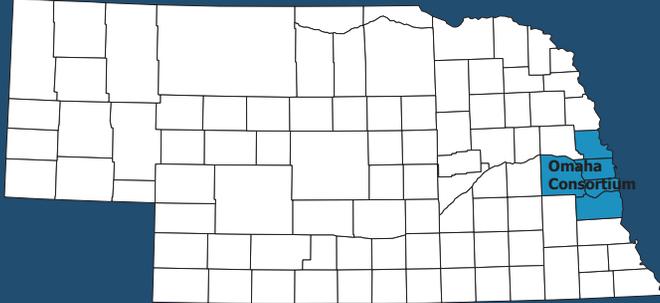

### Metropolitan Statistical Areas

A Metropolitan Statistical Area is defined as an urban area with at least 50,000 residents. Adjacent counties with a high degree of social and economic ties to the core area are included in the metropolitan statistical area. Nebraska has two metropolitan statistical areas: Omaha and Lincoln. The Sioux City metropolitan statistical area includes counties in Nebraska; however, because the population core is in Iowa, it is considered an Iowa metropolitan statistical area.

# AREA DEFINITIONS

APPENDIX A

## Omaha Consortium

The Omaha Metropolitan Statistical Area includes eight counties: five in Nebraska and three in Iowa. The Omaha Consortium includes only those counties in the Omaha Metropolitan Statistical Area that are located in Nebraska. This need for the Omaha Consortium is due to the inability to compile some data for areas that cross state lines.

## Economic Regions

Nebraska has seven Economic Regions: Panhandle, Mid-Plains, Central, Northeast, Southeast, Lincoln and Omaha. The Lincoln Region is comprised of Lancaster and Seward counties, and the Omaha region is comprised of Cass, Douglas, Sarpy, Saunders and Washington counties. The other five regions are comprised of the remaining 88 counties in the state.

## Community College Regions

There are six Community College service regions in Nebraska. Service regions follow county boundaries with two exceptions. Northeast Community College serves the northern edge of Boone County and Western Nebraska Community College serves the western edge of Cherry County.

## CONTACT INFORMATION

**F**or questions about any topics related to Nebraska's labor market, or to request a printed copy of a report mentioned in this publication, please contact the Office of Labor Market Information at any of the numbers listed below. You may also contact the Office of Labor Market Information at [ndol.lmi\\_ne@nebraska.gov](mailto:ndol.lmi_ne@nebraska.gov) or visit us on the Web at [networks.nebraska.gov](http://networks.nebraska.gov).

Office of Labor Market Information: The home page can be found at [networks.nebraska.gov](http://networks.nebraska.gov); click on Labor Market Information on the right navigation pane.  
(402) 471-2600 or 1-800-876-1377

Affirmative Action Data: Data is available to assist employers in evaluating the percentage of women and minorities in the workforce and in establishing goals in order to improve participation rates among these groups.  
(402) 471-2600 or 1-800-876-1377

Census Information: Assistance in obtaining decennial Census, American Community Survey, population estimates, and other U.S. Census Bureau information is available.  
(402) 471-2600 or 1-800-876-1377

Cost of Living and Inflation: Consumer Price Indexes (CPI) program produces monthly data on changes in the prices paid by urban consumers for a representative basket of goods and services.  
(402) 471-2600 or 1-800-876-1377

Filing for Unemployment: Apply for unemployment insurance benefits at [networks.nebraska.gov](http://networks.nebraska.gov); click on File for Unemployment.  
(402) 458-2800
