## OUR WEBSITE

**Detailed Labor Market Information for Nebraska can be found at [networks.nebraska.gov/analyzer](http://networks.nebraska.gov/analyzer)**

The **Left Links** provide a variety of valuable data.

[Labor Market Facts](#) answers the most commonly asked labor market questions. If you are unsure where to start, the answer may be here. Each question has a direct link to the data that will provide you with the correct answers.

[Area Profile](#) provides information for the entire state, specific regions, counties, metropolitan, or micropolitan areas. View demographic make-up, occupation and wage information, unemployment rate, businesses, and more.

[Occupation Profiles](#) provides data specific by occupations. View number of potential candidates in a field, labor supply and market demands, education, training and work experience, typical job duties, employment and wage data, forecasts, and more.

[Industry Profile](#) provides information by industry. View employment data, industry and occupational projections, staffing patterns, and numbers and regions for employers in the area.

[Employers](#) provides site-specific information about employers in a selected area. Find specific local employer sites and their corporate headquarters, and view lists of employers based on the number of jobs they are posting.

[Historic Data Analysis](#) provides trends in industry, occupation, and labor force over time. Access commuting patterns, population, income, and economic indicators.

# SOURCES

## **U.S. Census Bureau**

The Census Bureau is continually gathering data throughout the Nation and making it available for anyone to use at [census.gov](http://census.gov)

[Population Estimates](#) provides up-to-date estimates on age, sex, race, and Hispanic origin.

[Local Employment Dynamics](#) provides several tools to analyze local labor force information. [OnTheMap](#) provides a visual makeup of the area you choose and [Quarterly Workforce Indicators](#) displays crosstabs of data based on your search criteria.

[American FactFinder](#) provides tables from Census data and American Community Survey 1, 3, and 5 year estimates.

## **Bureau of Labor Statistics**

The Bureau of Labor Statistics of the U.S. Department of Labor is the principal Federal agency responsible for measuring labor market activity, working conditions, and price changes in the economy.

## Hastings MC

## OVERVIEW HASTINGS MC

Adams county Nebraska sits near the state's east-west centerline near the Kansas Border. 37,702 Nebraskans live on 1136.4 square miles of land here. On this land they farm and harvest, educate and heal, buy and sell and produce and consume. With the exception of farming, most of these activities take place in Hastings, principal city and seat of Adams County and of the Hastings Micropolitan Community (MC) with which the county is geographically identical. This slice of our state is like many others, with low unemployment thanks to a high concentration of employment in Agriculture, slow population growth and an aging population. Hastings is also unique in that it can claim the largest fountain between Chicago and Denver, the invention of Kool-Aid and an interesting history of munitions production.

Understanding the economic reality of the Hastings MC requires context. The pages that follow will attempt to foster understanding by providing this context through an exposition of the most current demographic, education, labor supply, wage and employment data available about the Hastings MC and the State as a whole. The understanding of various moving pieces of Hastings' economy in the past and present will then be sewn together to make projections about Hastings' economic future.

	Hastings MC	Nebraska
2011 Population	37,702	1,842,641
2010 Population	37,906	1,826,341
Land Area (Square Miles)	1,136.4	76,824.17
2011 Persons Per Square Mile	33.2	24.0
2010 Median Age	38.5	36.3
2010 Median Household Income	\$44,233	\$49,342
2011 Labor Force	20,457	1,005,455
2011 Industry Employment	20,355	896,889
2011 Largest Industry	Education & Health Services	Education & Health Services
2011 Largest Industry Empl.	5,051	212,869

### Hastings MC

Census Bureau programs define age as the length of time in completed years that a person has lived. For the most recent decennial census, age was the length of time in completed years that a person had lived as of Census Day--April 1, 2010. The Census Bureau's national surveys compute age as of the interview date.

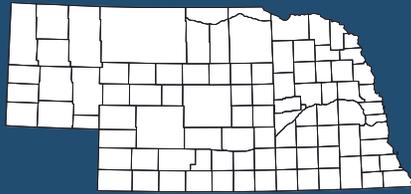

## POPULATION CHANGE BY AGE GROUP 2000-2010

Source: US Census Bureau, Population Estimates, Released 2010

Age	2000 Population	2010 Population	Change	Percent Change
Under 20	10,893	10,610	-283	-2.6%
20-29	4,833	4,839	6	0.1%
30-39	4,897	4,050	-847	-17.3%
40-49	5,694	4,815	-879	-15.4%
50-59	4,181	5,448	1,267	30.3%
60-69	2,903	3,771	868	29.9%
70 and Over	4,778	4,373	-405	-8.5%
<b>Total</b>	<b>38,179</b>	<b>37,906</b>	<b>-273</b>	<b>-0.7%</b>

- The most dramatic increases in population in the Hastings MC were seen in the baby boom generation. The number of 50-59 year olds increased 30.3% and 60-69 year olds increased 29.9%. No other age group experienced such dramatic growth and the area as a whole saw a decrease in population.

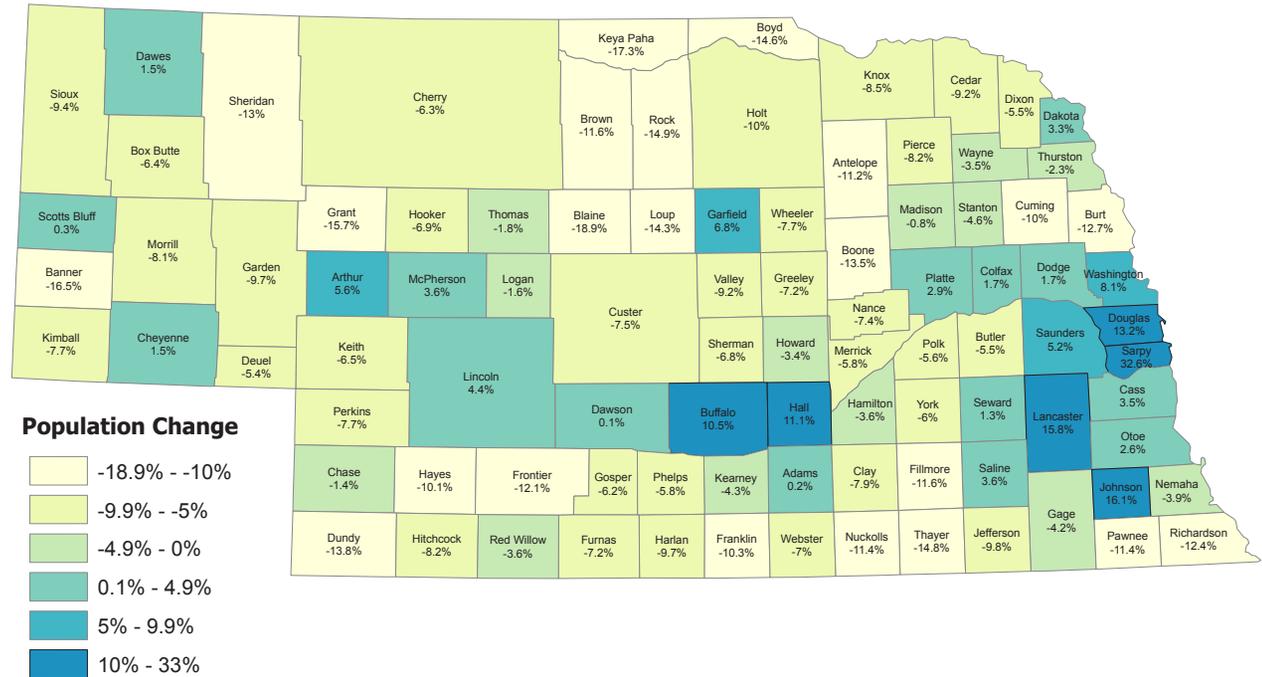

## Nebraska Statewide

The Census Bureau's Population Estimates Program (PEP) produces estimates of the population for the United States, its states, counties, cities, and towns, as well as for the Commonwealth of Puerto Rico and its municipios. Demographic components of population change (births, deaths, and migration) are produced at the national, state, and county levels of geography. Additionally, housing unit estimates are produced for the nation, states, and counties.

These estimates are used in federal funding allocations, as survey controls, as denominators for vital rates and per capita time series, and as indicators of recent demographic changes.

# POPULATION CHANGE BY COUNTY 2000-2011

Source: U.S. Census Bureau, Population Estimates, Released 2012

- In general, counties with large cities saw the highest rates of growth: all but one county in the highest growth rate grouping contains one of the state's 5 most populous cities.
- Rural counties saw the highest rates of population attrition: many of the counties in the group with the highest rate of population decline have under 1,000 residents.

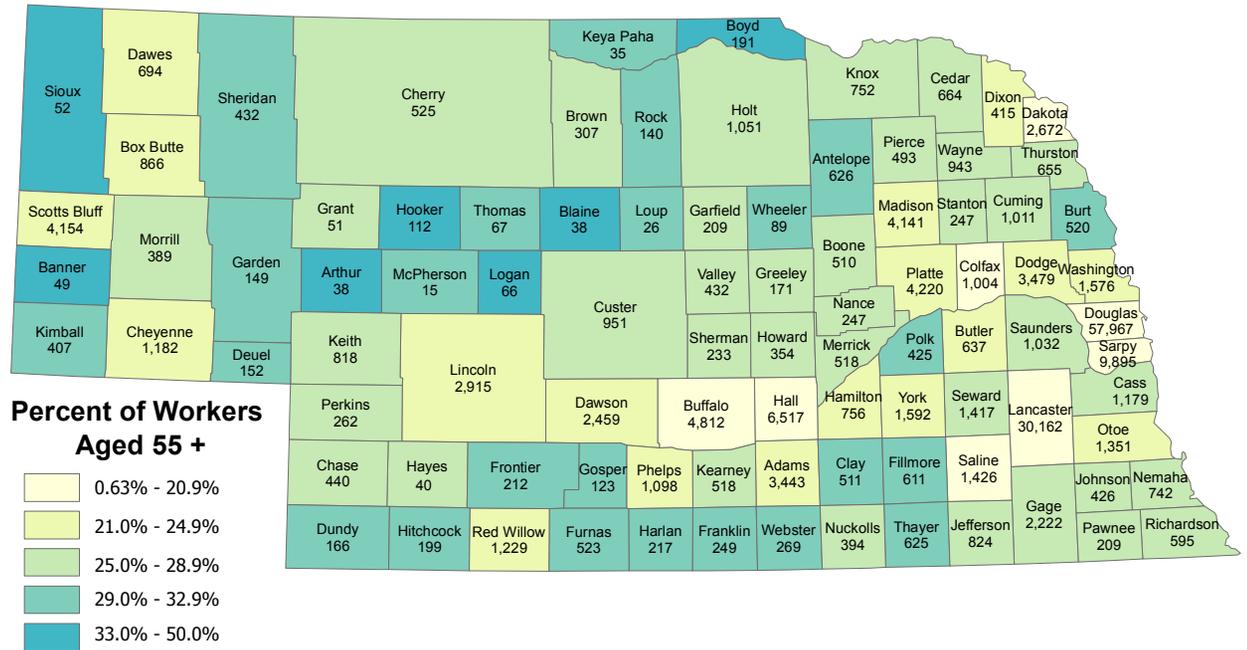

### Nebraska Statewide

With the aging of the baby-boom generation, defined as persons born between 1946 and 1964, the older age cohorts are expected to make up a much larger share of the labor force. In 2008, the baby-boom cohort was 44 to 62 years of age. By 2018, almost all the baby boomers will be in the 55-years-and-older age group. Age is a major factor in labor market behavior, and the aging of the labor force will dramatically lower the overall labor force participation rate and the growth of the labor force.

## WORKERS AGED 55 AND OLDER BY COUNTY 2011

Source: U.S. Census Bureau, Local Employment Dynamics, Quarterly Workforce Indicators, Released 2012

- The counties with the greatest percentages of their workforce aged 55 and older are clustered in the central and western portions of the state.
- All of the counties containing Nebraska’s largest cities were in the lowest percentage grouping.

## Hastings MC

Bureau of Labor Statistics nationwide projections imply that over the next decade, 40 million people will enter the workforce, about 25 million will leave the workforce, and 109 million will remain. Although only a modest reduction will take place in the overall growth in the workforce (from 1.3 percent per year to 1.1 percent per year), the composition of growth will generate rising shares of young (under 25) and older (45 and over) workers and a decline in the share of middle-age workers.

Over the next decade, instead of having nearly all increases in employment coming from the 25- to 54-year-old age group, fewer than one in three (31 percent) of the added workers will be in this category. Nearly half of the additional workers will come from the 55-and-older category, while about one in five will come from the youth labor force.

## OLDER WORKERS BY INDUSTRY

Industry	Employment		% 55 & Older
	55 & Older	Total	
Agriculture, Forestry, Fishing and Hunting	96	388	24.7%
Mining, Quarrying, and Oil and Gas Extraction	0	0	0.0%
Utilities	83	255	32.5%
Construction	261	1116	23.4%
Manufacturing	594	2658	22.3%
Wholesale Trade	252	1041	24.2%
Retail Trade	448	1907	23.5%
Transportation and Warehousing	135	386	35.0%
Information	26	182	14.3%
Finance and Insurance	130	431	30.2%
Real Estate and Rental and Leasing	50	110	45.5%
Professional, Scientific, and Technical Services	90	431	20.9%
Management of Companies and Enterprises	40	148	27.0%
Administrative and Support and Waste Management	73	529	13.8%
Educational Services	653	1947	33.5%
Health Care and Social Assistance	798	3027	26.4%
Arts, Entertainment and Recreation	38	154	24.7%
Accommodation and Food Services	127	1288	9.9%
Other Services (except Public Administration)	142	524	27.1%
Public Administration	215	618	34.8%

Source: U.S. Census Bureau, Local Employment Dynamics, QWI Table Released 2011

- The Real Estate and Rental and Leasing industry in the Hastings MC had the highest percentage of workers 55 and older employed at 45.5%.
- 16 of the 20 industries in the Hastings MC were comprised of over 20% of workers 55 and older.

### Hastings MC

Office of Management and Budget standards on race and ethnicity:

White – A person having origins in any of the original peoples of Europe, the Middle East, or North Africa.

Black or African American – A person having origins in any of the Black racial groups of Africa.

American Indian or Alaska Native – A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment.

Asian – A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam.

Native Hawaiian or Other Pacific Islander – A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. The 1997 OMB standards permit the reporting of more than one race.

## POPULATION BY RACE AND ETHNICITY 2010

	Hastings MC		Nebraska	
	Total	%	Total	%
<b>Total population</b>	<b>37,906</b>	<b>100.0%</b>	<b>1,826,341</b>	<b>100.0%</b>
Hispanic or Latino	3,046	8.0%	167,405	9.2%
Not Hispanic or Latino	34,860	92.0%	1,658,936	90.8%
White alone	34,903	92.1%	1,499,753	82.1%
Black or African American alone	270	0.7%	80,959	4.4%
American Indian and Alaska Native alone	162	0.4%	14,797	0.8%
Asian alone	451	1.2%	31,919	1.7%
Native Hawaiian and Other Pacific Islander alone	16	0.0%	966	0.1%
Two or More Races	517	1.4%	28,426	1.6%
<b>Total Minority</b>	<b>3,003</b>	<b>7.9%</b>	<b>326,588</b>	<b>17.9%</b>

Source: U.S. Census Bureau, Population Estimates, Released 2012

- The Hastings MC was more racially and ethnically homogenous than the state as a whole. The percentage reporting as White alone was 10% higher than the state as a whole.
- Hispanics were the single most populous Minority group in the Hastings MC.

### Hastings MC

The U.S. Office of Management and Budget (OMB) requires federal agencies to use a minimum of two ethnicities in collecting and reporting data: Hispanic or Latino and Not Hispanic or Latino. OMB defines “Hispanic or Latino” as a person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin regardless of race. Hispanic origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person’s parents or ancestors before their arrival in the United States. People who identify their origin as Hispanic, Latino, or Spanish may be any race.

## POPULATION CHANGE BY RACE & ETHNICITY 2000-2010

	2000 Population	2010 Population	Change	Percent Change
<b>Total:</b>	<b>38,179</b>	<b>37,906</b>	<b>-273</b>	<b>-0.7%</b>
Hispanic or Latino (of any race)	1,676	3,046	1,370	81.7%
Total Not Hispanic or Latino	36,503	34,860	-1,643	-4.5%
White Alone	35,456	33,688	-1,768	-5.0%
Black or African American Alone	210	240	30	14.3%
American Indian and Alaska Native Alone	128	125	-3	-2.3%
Asian Alone	536	446	-90	-16.8%
Native Hawaiian and Other Pacific Islander Alone	7	9	2	28.6%
Two or more Races	166	321	155	93.4%
<b>Total Minority (Population excluding non-Hispanic Whites)</b>	<b>2,723</b>	<b>4,218</b>	<b>1,495</b>	<b>54.9%</b>

Source: U.S. Census Bureau, Population Estimates, Released 2012

- While the Hastings MC was primarily white, the Hispanic population increased 81.7% between 2000 and 2010.
- Total Minority population increased dramatically at 54.9%.

### Hastings MC

In the United States, State laws require birth certificates to be completed for all births, and Federal law mandates national collection and publication of births and other vital statistics data. The National Vital Statistics System, the Federal compilation of this data, is the result of the cooperation between the National Center for Health Statistics (NCHS) and the States to provide access to statistical information from birth certificates.

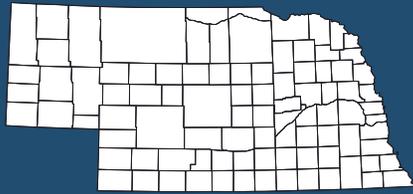

Mortality data from the National Vital Statistics System (NVSS) are a fundamental source of demographic, geographic, and cause-of-death information. This is one of the few sources of health-related data that are comparable for small geographic areas and are available for a long time period in the United States. The data are also used to present the characteristics of those dying in the United States, to determine life expectancy, and to compare mortality trends with other countries.

## POPULATION CHANGE: NATURAL INCREASE AND MIGRATION 2011

Area	Population change	Changes Due to Natural Increase			Net Migration		
		Total	Births	Deaths	Total	International	Domestic
Hastings MC	-200	77	486	409	-281	43	-324
Nebraska	12500	11113	25991	14878	1408	2508	-1100

Source: US Census Bureau, Population Estimates, Table 10, Released 2012

- The Hastings MC experienced a loss in population between July 1, 2010 and July 1, 2011.
- The Lincoln and Omaha Metropolitan areas experienced population increase, while 6 out of 10 of the Micropolitan areas experienced a decrease.

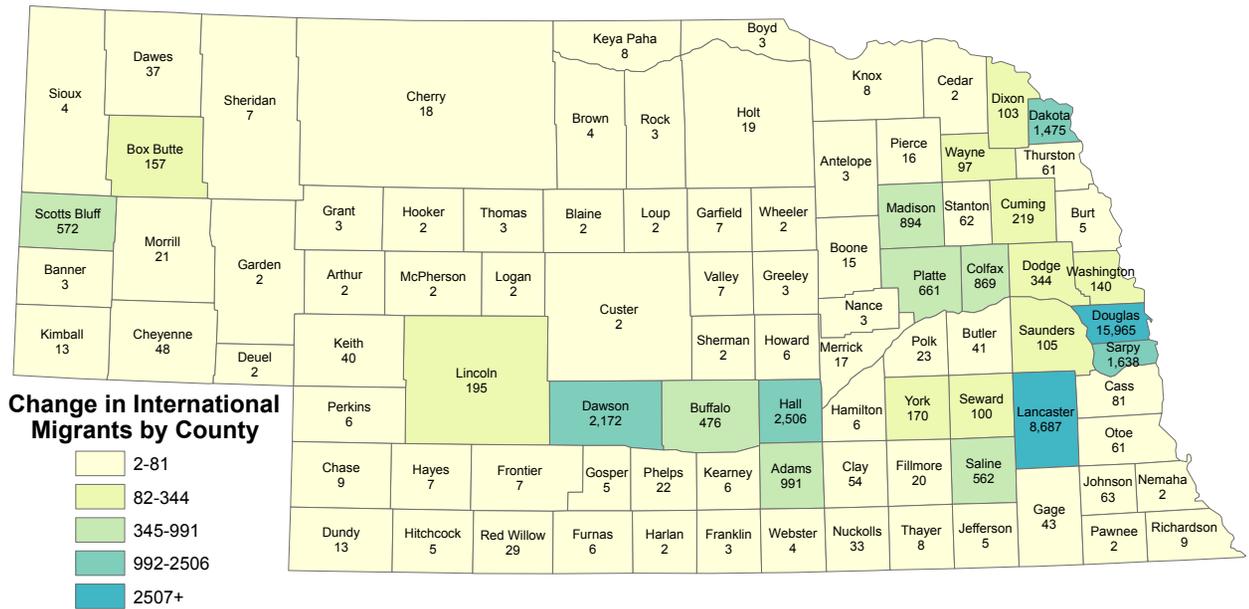

### Nebraska Statewide

International Migration is the movement of people across a national border. This includes both immigration (migration to a country) and emigration (migration from a country) or the combination of the two (net international migration). The U.S. Census Bureau produces annual estimates of net international migration for the nation, states, and counties in the United States. These estimates are based in part on data collected in censuses and surveys. Projections of the U.S. population are also made using assumptions about net international migration.

## NET INTERNATIONAL MIGRATION BY COUNTY 2011

Source: U.S. Census Bureau, Population Estimates, Released 2012

- More populous counties saw greater volumes of international migration.
- Although many of Nebraska’s counties saw reductions in overall population during this time period, none of them experienced negative net international migration.

## Hastings MC

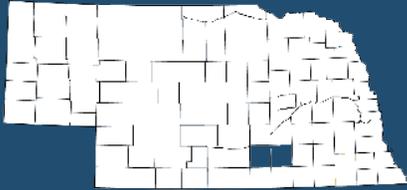

In general discussions, the concept of gender is often confused with the concept of sex, and the terms are used interchangeably. The meanings of these two concepts are not the same: sex is based on the biological attributes of men and women (chromosomes, anatomy, hormones), while gender is a social construction whereby a society or culture assigns certain tendencies or behaviors the labels of masculine or feminine. These assignments may differ across cultures and among people within a culture, and even across time. Gender may or may not correspond directly to sex--depending on the society or culture or period. That means, for example, that people may associate themselves with femininity (as defined by their culture) while being biologically male. At the Census Bureau, the sex question wording very specifically intends to capture a person's biological sex and not gender. Ambiguity of these two concepts interferes with accurately and consistently measuring what we intend to measure--the sex composition of the population.

## SEX DISTRIBUTION BY INDUSTRY 2010

Industry	Female		Male	
	Employees	% of Industry	Employees	% of Industry
Agriculture, Forestry, Fishing, and Hunting	89	7.3%	1132	92.7%
Mining, Quarrying, and Oil and Gas Extraction	0	-	0	-
Utilities	26	14.8%	150	85.2%
Construction	70	5.3%	1246	94.7%
Manufacturing	415	19.2%	1748	80.8%
Wholesale Trade	71	17.4%	338	82.6%
Retail Trade	740	48.3%	793	51.7%
Transportation and Warehousing	73	15.2%	408	84.8%
Information	17	14.2%	103	85.8%
Finance and Insurance	417	69.0%	187	31.0%
Real Estate and Rental and Leasing	111	64.9%	60	35.1%
Professional and Technical Services	115	28.0%	295	72.0%
Management of Companies and Enterprises	0	-	0	-
Administrative and Waste Services	113	45.4%	136	54.6%
Educational Services	605	62.6%	362	37.4%
Health care and Social Assistance	1835	81.5%	417	18.5%
Arts, Entertainment, and Recreation	18	100.0%	0	0.0%
Accommodation and Food Services	215	59.9%	144	40.1%
Other Services	286	36.6%	496	63.4%
Public Administration	381	47.9%	414	52.1%
<b>Total</b>	<b>5,598</b>	<b>41.0%</b>	<b>8,428</b>	<b>59.0%</b>

Source: US Census Bureau, American Community Survey 3 year Estimates, Table S2404 Released 2010

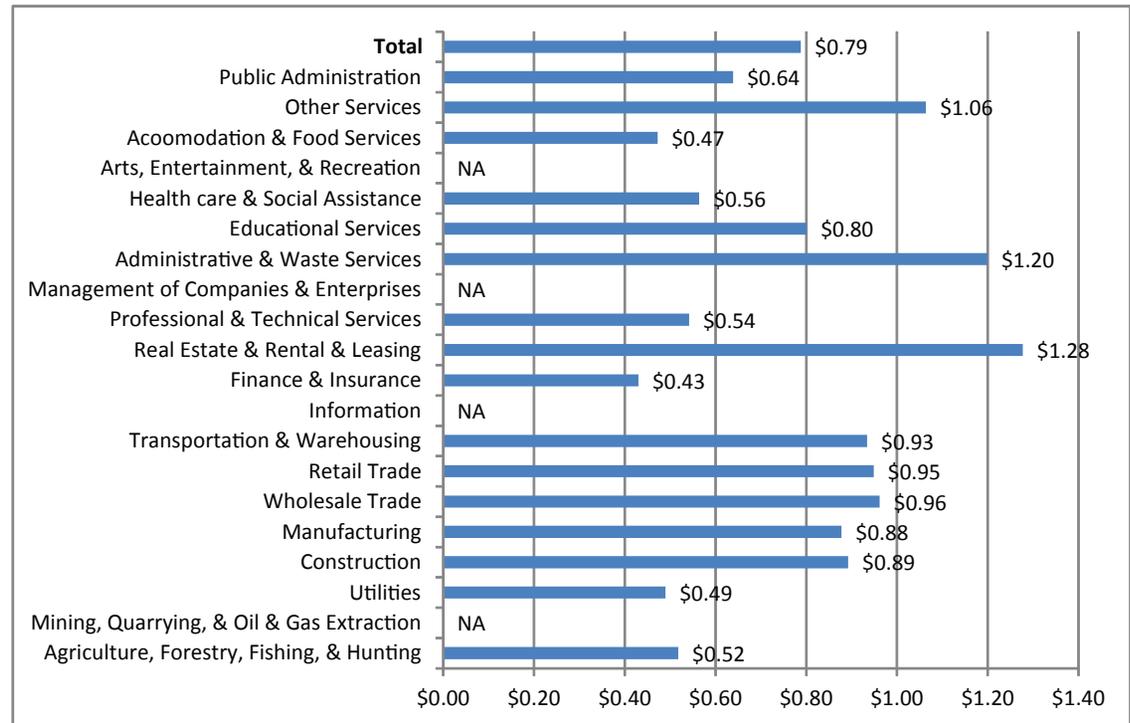

- The most male dominated industries in the Hastings MC were Construction and Agriculture, Forestry, Fishing, and Hunting.
- The most female dominated industry was Arts, Entertainment, and Recreation, with 100% of those employed being female.

Hastings MC

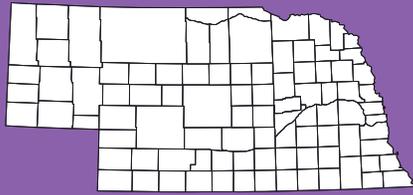

The past several decades have been marked by notable changes in women’s labor force activities. Women’s labor force participation is significantly higher today than it was in the 1970s, particularly among women with children under 18 years of age. A larger share of women work full time and year round than in the past. In addition, women have increasingly attained higher levels of education: Among women aged 25 to 64 who are in the labor force, the proportion with a college degree roughly tripled from 1970 to 2010. Women’s earnings as a proportion of men’s earnings also have grown over time. In 1979, women working full time earned 62 percent of what men did.

AVERAGE EARNINGS BY INDUSTRY:  
FEMALE EARNINGS PER \$1.00 MALE EARNINGS 2010

Source: US Census Bureau, American Community Survey 3-Year Estimates 2010, Table S2404

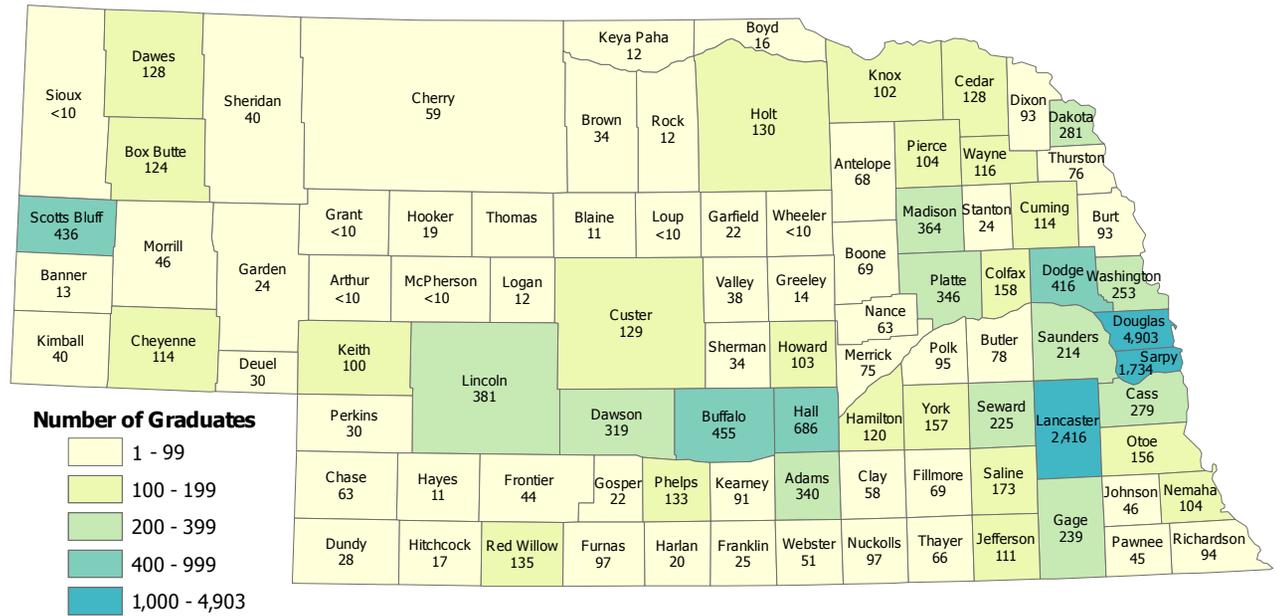

- Hastings MC females working in the Finance and Insurance and Accommodation and Food Services industries were making comparatively much lower than males in the same industries.
- Females in the Real Estate and Rental and Leasing and Administrative and Waste Services industries were making comparatively more than the males.

### Nebraska Statewide

Graduation rates are a fundamental indicator of whether or not the nation’s public school system is doing what it is intended to do: enroll, engage, and educate youth to be productive members of society. Since almost 90 percent of the fastest-growing and highest-paying jobs require some postsecondary education, having a high school diploma and the skills to succeed in college and the workplace are essential. Yet nationally, one-third of students—about 1.3 million each year—leave high school without a diploma, at a high cost to themselves and society at large.

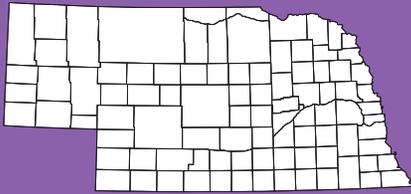

## PUBLIC HIGH SCHOOL GRADUATES BY COUNTY 2011

Source: Nebraska Coordinating Commission for Postsecondary Education, Progress Report, Released 2012

- More than one-third (38%) of Nebraska’s counties had fewer than 50 public high school graduates in 2008-2009.
- Many of the counties with lower numbers of high school graduates are also counties that saw a decrease in population over the past decade.

Source: [http://www.all4ed.org/files/Nebraska\\_wc.pdf](http://www.all4ed.org/files/Nebraska_wc.pdf)

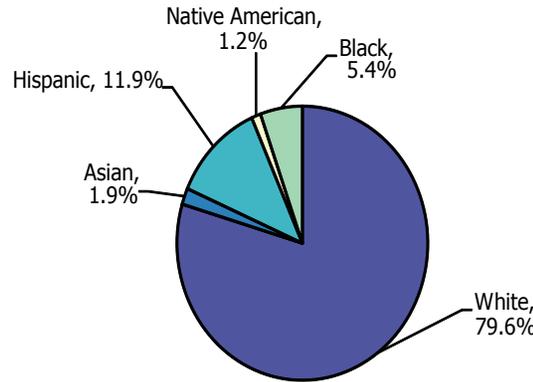

Nebraska Statewide

The number of graduates from Nebraska public high schools is projected to decrease and then increase over the next decade. By 2020–2021, minority students, especially Hispanics, are projected to account for much higher percentages of the state’s public high school graduates than they did in 2002–2003. This is projected to be the case, despite the fact that Hispanic students tend to graduate from high school at lower rates than white and Asian students. Conversely, white non-Hispanics are projected to account for a significantly lower percentage of the students who will graduate from Nebraska’s public high schools in 2020–2021.

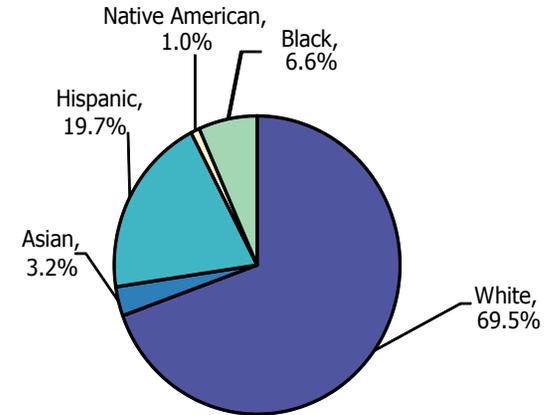

PUBLIC HIGH SCHOOL GRADUATES BY RACE & ETHNICITY

**Actual Percentages of Graduates:  
2010 - 2011**

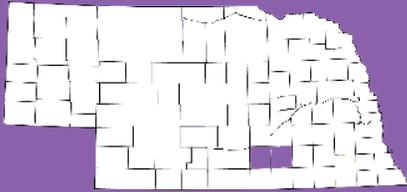

**Projected Percentages of Graduates:  
2020 - 2021**

Source: Nebraska Coordinating Commission for Postsecondary Education, Progress Report, Released 2012

- Hispanic graduates are projected to grow from 11.9% to 19.7% of the state’s public high school graduating class in 2021.
- Whites are projected to remain the largest racial/ethnic demographic within public high school graduates in 2021. However, their percentage of total graduates is projected to decrease by 10.1%

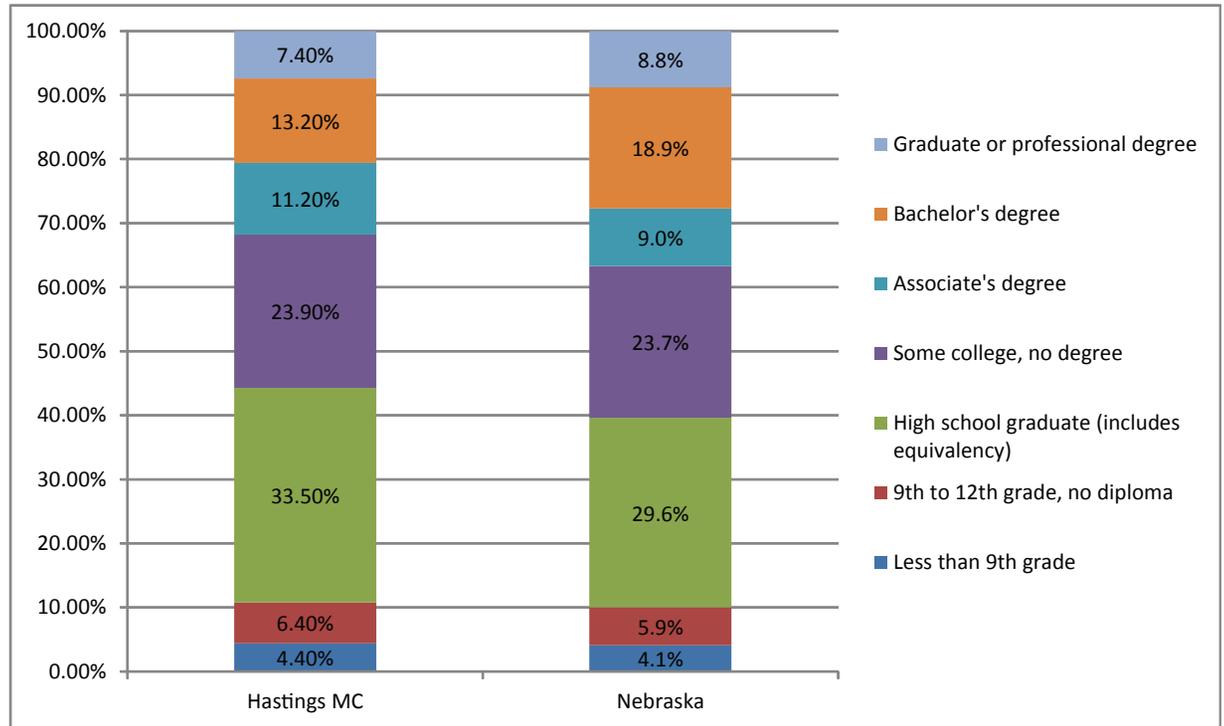

### Hastings MC

Educational attainment refers to the highest level of education that an individual has completed. This is distinct from the level of schooling that an individual is attending.

Data on educational attainment are derived from a single question that asks, “What is the highest grade of school...has completed, or the highest degree...has received?”

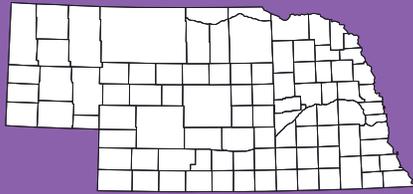

Depending on the survey, the educational attainment question may be asked only of adult household members. Even when data are collected from all household members regardless of age, the U.S. Census Bureau generally publishes data only for adults. Most publications focus on adults age 25 years and over, when education has been completed for most people.

## EDUCATIONAL ATTAINMENT POPULATION AGE 25 AND OLDER 2010

Source: US Census Bureau, 2010 American Community Survey

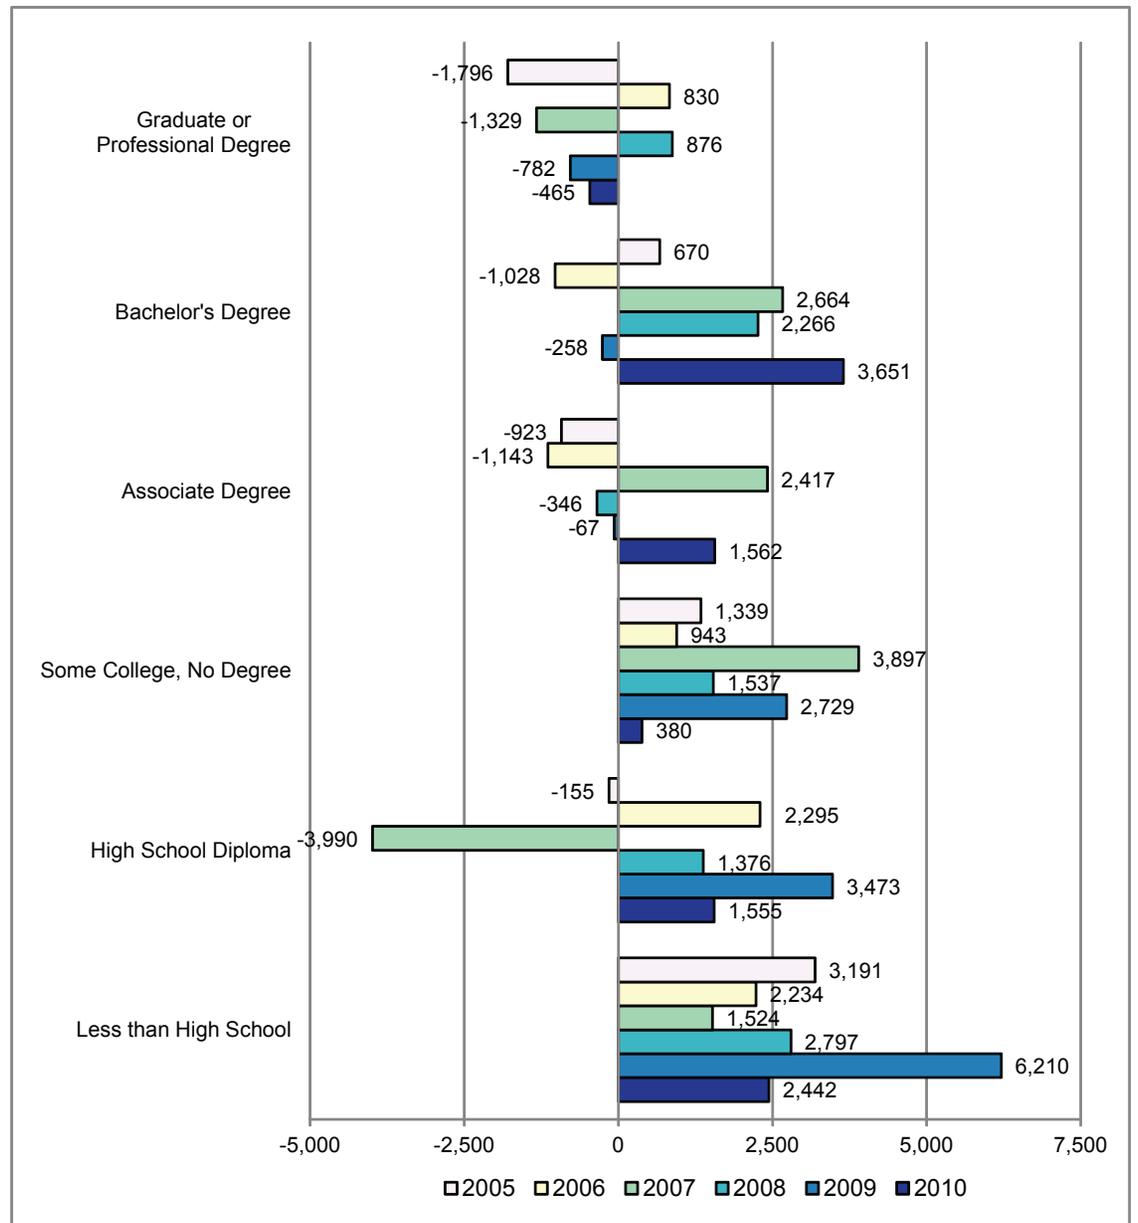

- The percentage of Hastings MC residents with a college degree was 4.9% lower than the percentage of Nebraskans with a college degree.
- The percentage of high school graduates and below in the Hastings MC was 4.7% higher than Nebraska as a whole.

### Nebraska Statewide

The chart to the right summarizes the net-migration estimates for Nebraska by education level, based on the results of the American Community Survey (ACS) conducted annually from 2005 to 2010. As shown in this chart, the estimates of net migration based on one year of ACS data vary significantly from one year to another. When the estimates based on the six years of ACS data are compared, as shown in the chart, an overall migration pattern is not clearly revealed. Based on these estimates, Nebraska consistently attracted more working-age adults with less than a high school education than it exported over the six-year period. In addition, the estimates of net migration shown in the chart consistently attracted working-age adults with some college, but no degrees, between 2005 and 2010.

## NET EDUCATIONAL MIGRATION: POPULATION AGED 22-64

Source: Nebraska Coordinating Commission for Postsecondary Education, Progress Report, Released 2012

### Nebraska Statewide

Nebraska’s Coordinating Commission for Postsecondary Education (CCPE) is a state constitutional agency, whose mission is to promote sound policies for Nebraska’s state and community colleges and the University of Nebraska. The CCPE balances the best interests of taxpayers, students and Nebraska’s postsecondary institutions.

Responsibilities include:

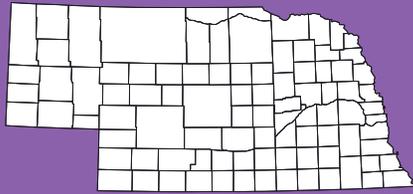

- Collaborating with the state’s public colleges and universities to implement a plan that will guide Nebraska’s higher education system
- Administering student aid programs
- Conducting research and publishing reports on higher education issues
- Authorizing academic programs
- Approving proposals for facilities
- Reviewing institutions’ budget proposals and making recommendations to the State Legislature
- Approving applications from out-of-state institutions

## POSTSECONDARY GRADUATES WORKING IN NEBRASKA 2012

	Community Colleges Associates Degrees	State Colleges Bachelors Degrees	UN- Kearney Bachelors Degrees
Number of Graduates	3,833	1,157	853
Number of Graduates Working in Nebraska	2,784	685	538
Percent of Graduates Working in Nebraska	73%	59%	63%
Estimated Average Annual Earnings	\$24,034	\$25,097	\$23,927
Estimated Median Annual Earnings	\$22,219	\$24,936	\$24,221

Source: Nebraska Department of Labor, Graduate Outcomes in Nebraska, Released 2012

- Community College graduates are more likely to be found working in Nebraska than State College graduates. This may be partly due to the geographic location of the State Colleges near bordering states. State College graduates may also continue on to graduate school rather than enter the workforce.
- The labor market for University of Nebraska – Kearney and State College bachelor’s degree and higher graduates tends to be more national than state specific.

Nebraska Statewide

The Legislature has established four instructional and service priorities for Nebraska’s community colleges.

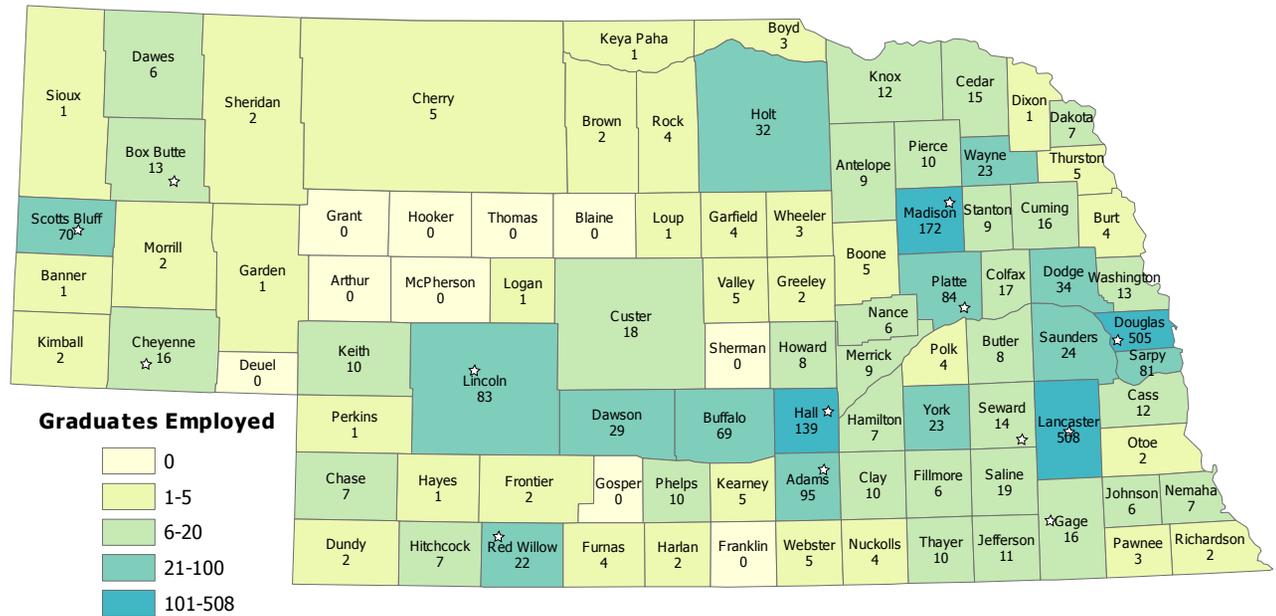

Applied technology and occupational education and, when necessary, foundations education;

Transfer education, including general academic transfer programs, or applied technology and occupational programs which may be applicable to the first two years of a bachelor’s degree program;

Public service, particularly adult continuing education for occupations and professions, economic and community development focused on customized occupational assessment and job training programs for business and communities, and vocational and personal development courses;

Applied research.(Applied research activities of the community college areas shall be directly related to the enhancement of the instructional programs, student achievement, institutional effectiveness, public service activities, and to the professional development of the faculty.)

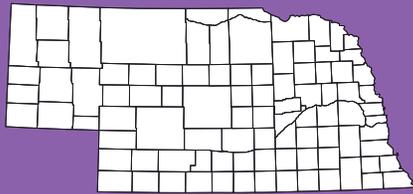

COMMUNITY COLLEGE GRADUATES WORKING IN NEBRASKA 2012

Institution	Number of Graduates	Number of Graduates Working in Nebraska	Percentage of Graduates Working in Nebraska	Estimated Average Annual Earnings for Associates Degree Graduates	Estimated Median Annual Earnings for Associates Degree Graduates
All Community Colleges	5,182	3,799	73%	\$24,034	\$22,219

Source: Nebraska Department of Labor: Graduate Outcomes in Nebraska, Released 2012

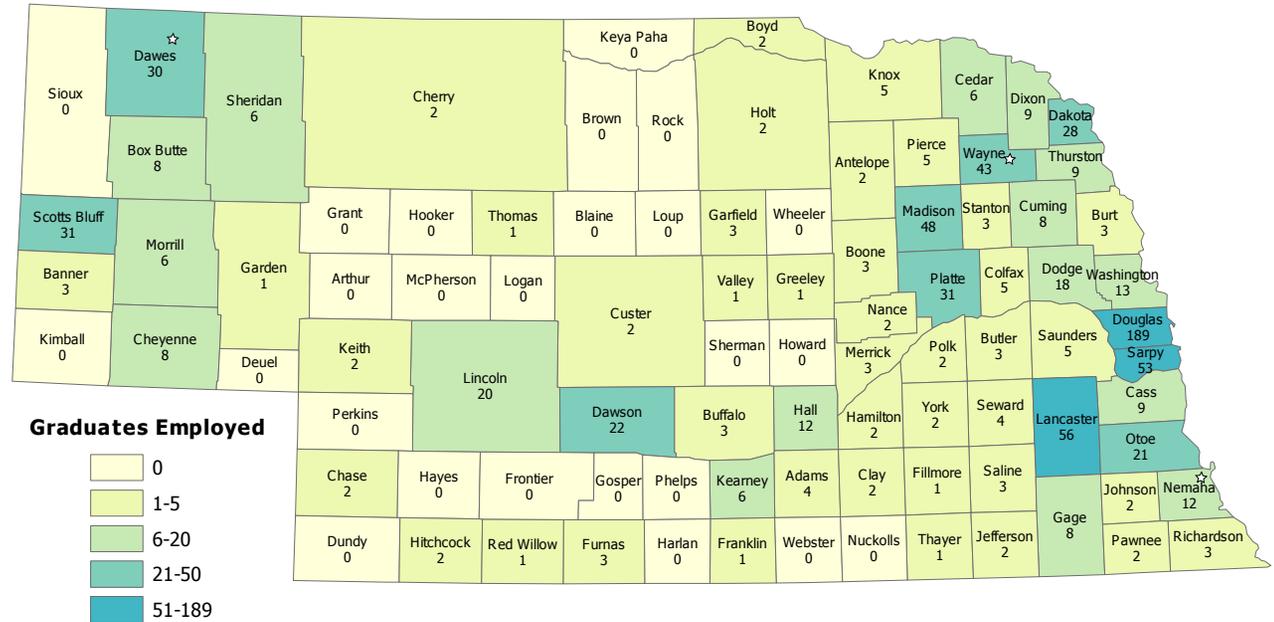

- Only 10 of Nebraska’s 93 counties did not have at least one graduate employed in the county. These counties have some of the lowest populations in the state.
- Each year, about three-fourths of Community College graduates are found working in Nebraska about a year after graduation.

### Nebraska Statewide

The Nebraska State College System serves close to 9,000 students from Nebraska and surrounding states through three geographically diverse institutions: Chadron State College, Peru State College and Wayne State College. Combined, the three colleges offer more than 200 degree, certificate, and pre-professional programs that are accessible on the three campuses, via the internet, and in several satellite locations throughout the state. With more than 250 credentialed faculty and 50,000 successful graduates, the NSCS provides significant human and intellectual capital that contributes to the current and future economic strength of the State of Nebraska.

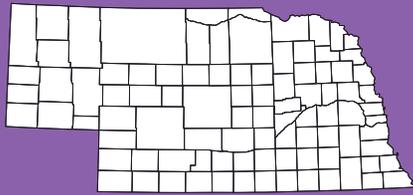

## STATE COLLEGE GRADUATES WORKING IN NEBRASKA 2012

Institution	Number of Graduates	Number of Graduates Working in Nebraska	Percentage of Graduates Working in Nebraska	Estimated Average Annual Earnings for Bachelor's Degree Graduates	Estimated Median Annual Earnings for Bachelor's Degree Graduates
All State Colleges	1,735	1,083	62%	\$25,097	\$24,936

Source: Nebraska Department of Labor: Graduate Outcomes in Nebraska, Released 2012

- Slightly over half (51%) of all State College graduates working in Nebraska graduated in an Education field of study.
- State College graduates with a post-baccalaureate degree or certificate were more likely to be working in the state (69%) than bachelor's degree graduates (59%).

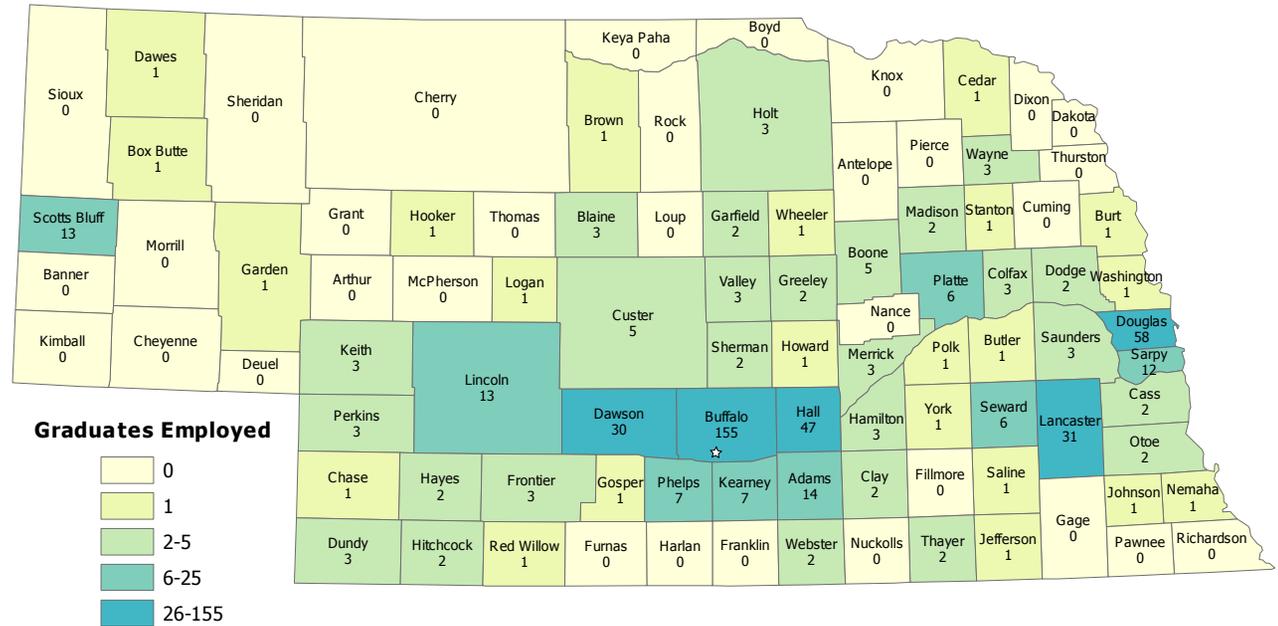

### Nebraska Statewide

The public, residential University of Nebraska at Kearney is an affordable, student-centered regional hub of intellectual, cultural and artistic excellence that has been a prominent part of Nebraska’s higher education landscape for more than a century.

As one of four campuses of the University of Nebraska, UNK offers:

- Access to all the opportunities and choices of a major public university.
- A wide range of academic programs that lead to exciting careers.
- Nationally-renowned faculty.
- A rich and diverse campus life.
- A home away from home.

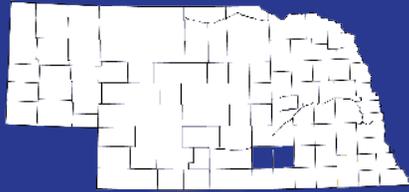

## UNK GRADUATES WORKING IN NEBRASKA 2012

Institution	Number of Graduates	Number of Graduates Working in Nebraska	Percentage of Graduates Working in Nebraska	Estimated Average Annual Earnings for Bachelor's Degree Graduates	Estimated Median Annual Earnings for Bachelor's Degree Graduates
University of Nebraska - Kearney	1,167	745	64%	\$23,927	\$24,221

Source: Nebraska Department of Labor: Graduate Outcomes in Nebraska, Released 2012

- Many UNK programs have a job placement rate that’s almost 100%, including Graphic Arts, Industrial Technology, Speech and Hearing Disorders, Accounting, Education, and Computer Science and Information Technology.
- 25%-30% of all teachers, school administrators, speech pathologists, school counselors, and school psychologists in Nebraska are UNK graduates.
- Graduates of UNK’s College of Education account for 33% of all Nebraska high school principals and 35% of all public school superintendents appointed in Nebraska every year.

Hastings MC

The Local Area Unemployment Statistics (LAUS) program is a Federal-State cooperative effort in which monthly estimates of total employment and unemployment are prepared for approximately 7,300 areas nationwide.

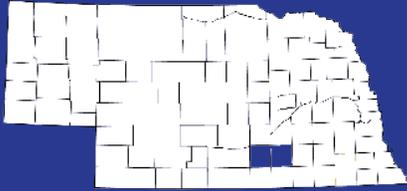

These estimates are key indicators of local economic conditions. The Bureau of Labor Statistics (BLS) of the U.S. Department of Labor is responsible for the concepts, definitions, technical procedures, validation, and publication of the estimates that State employment security agencies prepare under agreement with BLS.

<b>Nebraska Statewide 2011</b>			
<b>Civilian Labor Force</b>	<b>Employment</b>	<b>Unemployment</b>	<b>Unemployment Rate (%)</b>
1,005,455	960,830	44,625	4.4%
<b>Hastings MC</b>			
<b>Civilian Labor Force</b>	<b>Employment</b>	<b>Unemployment</b>	<b>Unemployment Rate (%)</b>
20,182	19,333	849	4.2%

Note: Annual Average, Not Seasonally Adjusted  
 Source: Nebraska Department of Labor, Local Area Unemployment Statistics, Released 2012

- The unemployment rate in the Hastings MC is comparable to the Nebraska rate.
- The Nebraska Department of Labor develops labor force estimates for 127 different areas within the state.

## Hastings MC

## Definitions of Labor Force Concepts:

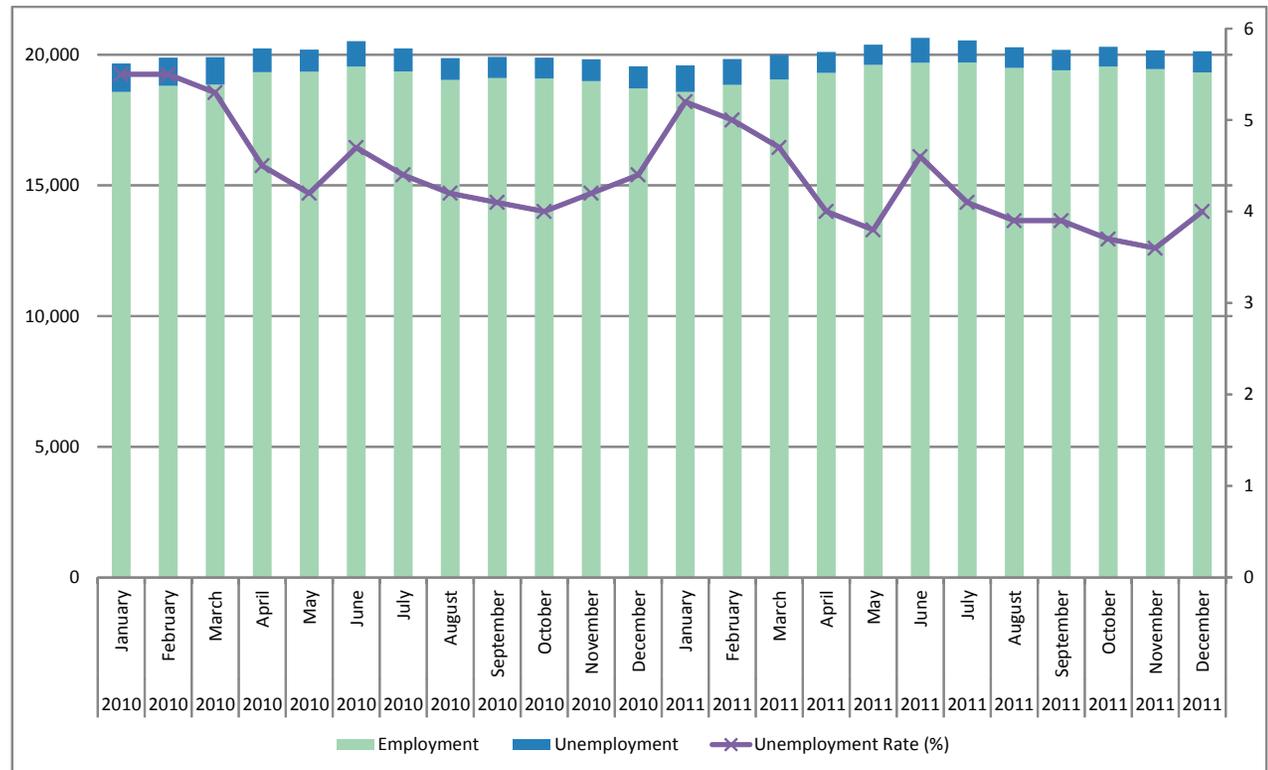

**Civilian labor force:** Included are all persons in the civilian noninstitutional population classified as either employed or unemployed.

**Employed persons:** These are all persons who, during the reference week, (a) did any work as paid employees, worked in their own business or profession or on their own farm, or worked 15 hours or more as unpaid workers in an enterprise operated by a member of their family, or (b) were not working but who had jobs from which they were temporarily absent. Each employed person is counted only once, even if he or she holds more than one job.

**Unemployed persons:** Included are all persons who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment some time during the 4 week-period ending with the reference week.

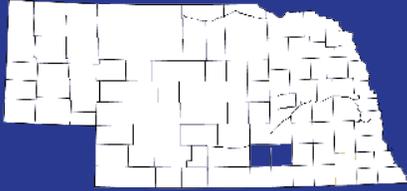

**Unemployment rate:** The ratio of unemployed to the civilian labor force expressed as a percentage.

## UNEMPLOYMENT RATE MONTHLY TRENDS 2010-2011

Source: Nebraska Department of Labor, Local Area Unemployment Statistics, Released 2012

- Over 2010 and 2011, the Hastings MC unemployment rate has trended along the same path as the Nebraska rate.

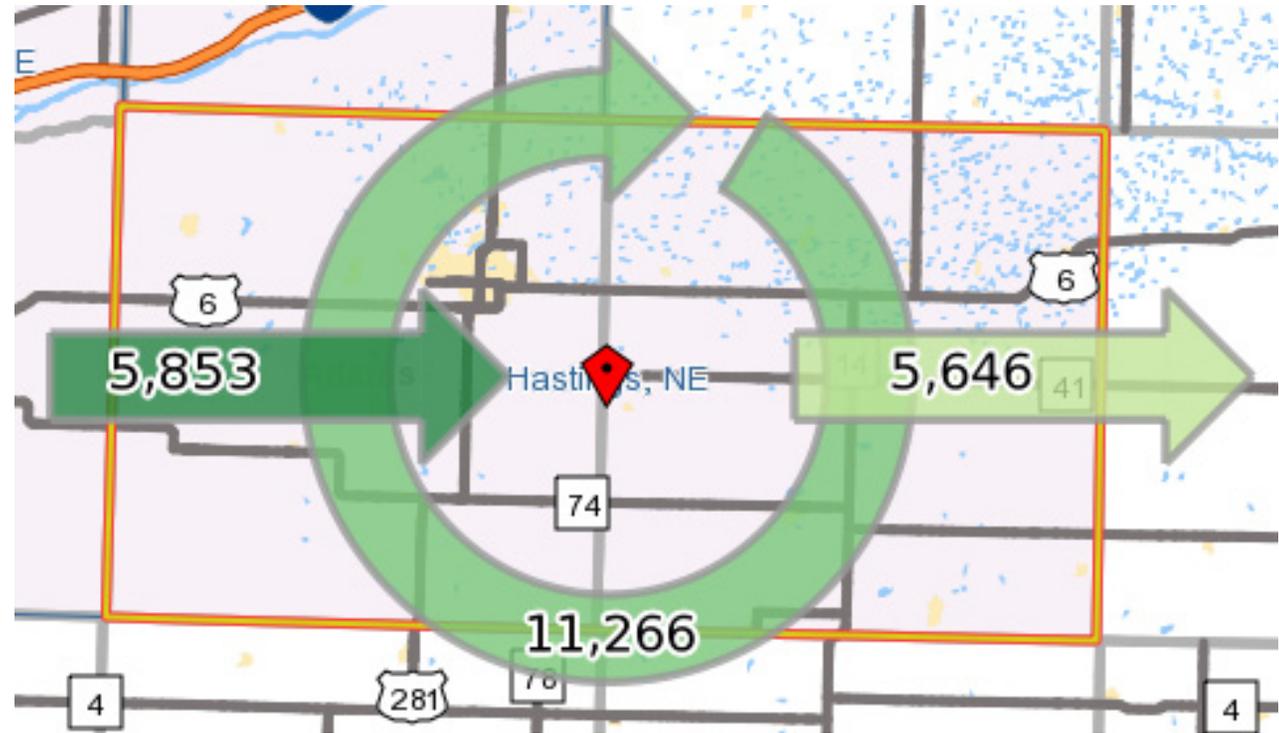

## Hastings MC

Local Employment Dynamics (LED) is a voluntary partnership between state labor market information agencies and the U.S. Census Bureau to develop new information about local labor market conditions at low cost, with no added respondent burden, and with the same confidentiality protections afforded census and survey data.

OnTheMap provides an easy-to-use interface for creating, viewing, printing and downloading workforce related maps, profiles, and underlying data. Based on 2002-2010 Longitudinal Employer-Household Dynamics (LEHD) Origin Destination Employment Statistics (LODES), OnTheMap is a unique resource for mapping the travel patterns of workers and identifying small-area workforce characteristics.

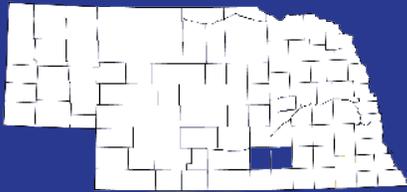

The project is supported by the Employment and Training Administration (ETA) at the U.S. Department of Labor.

## COMMUTING PATTERNS 2010

Source: U.S. Census Bureau, Local Employment Dynamics, Released 2012

- The number of people leaving the Hastings MC and coming into the MC to work are comparable.

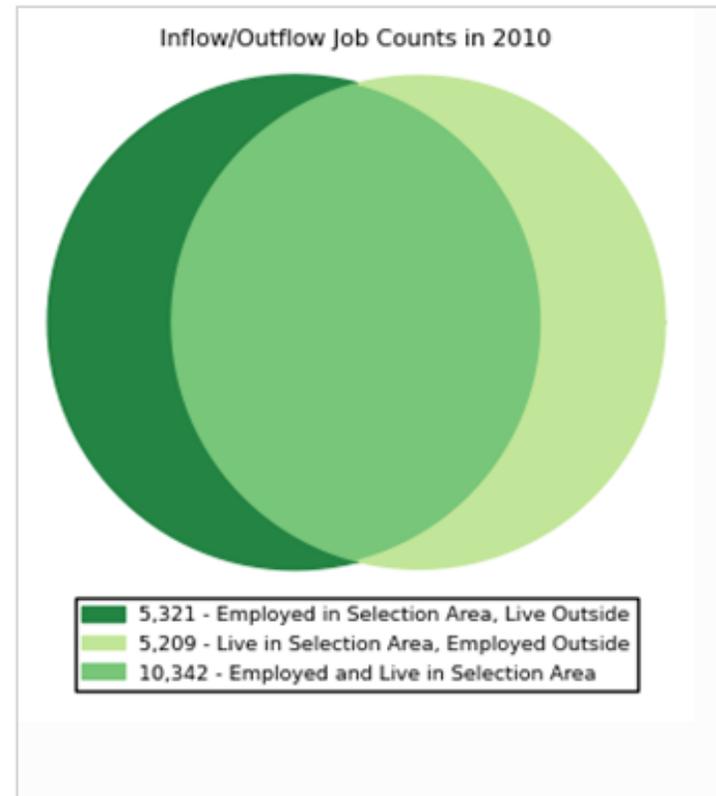

### Hastings MC

Commuting (Journey to Work) refers to a worker’s travel from home to work. Place of work refers to the geographic location of the worker’s job. Work at home refers to a worker who does not commute to a different geographic area from work, meaning their place of work is their home. Daytime population refers to the estimated number of people who are residing and working in an area during the “daytime” working hours.

There are several surveys conducted by the Census Bureau that ask questions related to commuting including means of transportation, time of departure, mean travel time to work, vehicles available, distance traveled, and expenses associated with commuting.

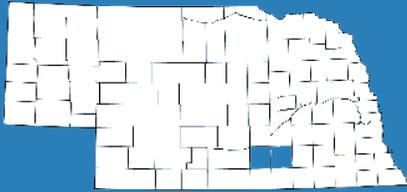

## WORKER INFLOW/OUTFLOW 2010

Source: U.S. Census Bureau, Local Employment Dynamics, Released 2012

Inflow/Outflow Job Counts (All Jobs)	2010	
	Count	Share
Employed in Hastings MC	17,119	100%
Employed in Hastings MC but Living Outside	5,853	34%
Employed and Living in Hastings MC	11,266	66%
Living in Hastings MC	16,912	100%
Living in Hastings MC but Employed Outside	5,646	33%
Living and Employed in Hastings MC	11,266	67%

- A large percentage of Hastings MC residents live *and* work in the area.

### Hastings MC

Wages for the OES survey are straight-time, gross pay, exclusive of premium pay.

Included in the collection of wage data are:

- base rate,
- cost-of-living allowances,
- guaranteed pay,
- hazardous-duty pay,
- incentive pay, including commissions and production bonuses, and tips.

Excluded from the wage data are:

- back pay,
- jury duty pay,
- overtime pay,
- severance pay,
- shift differentials,
- nonproduction bonuses, and tuition reimbursements.

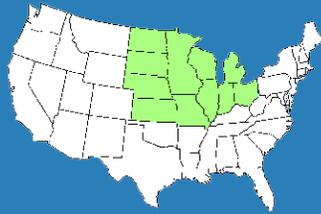

## WAGES BY OCCUPATION FIRST QUARTER 2012

SOC Code	Standard Occupational Code Title	Hourly Average	Hourly Entry Wage	Hourly Experienced	Annual Average Hastings MC	Annual Average Nebraska
11-0000	Management Occupations	\$33.96	\$12.71	\$44.58	\$70,633	\$96,018

<b>00-0000</b>	<b>Total all occupations</b>	<b>\$16.85</b>	<b>\$9.01</b>	<b>\$20.78</b>	<b>\$35,056</b>	<b>\$39,409</b>

Source: Nebraska Department of Labor, Occupational Employment Statistics, Released 2012

- The occupations with the highest average earnings in the Hastings MC are Management Occupations, with workers making an average of \$70,633 per year.
- The occupations with the lowest average earnings are Food Preparation and Serving-Related Occupations, with workers making an average \$18,990 per year.

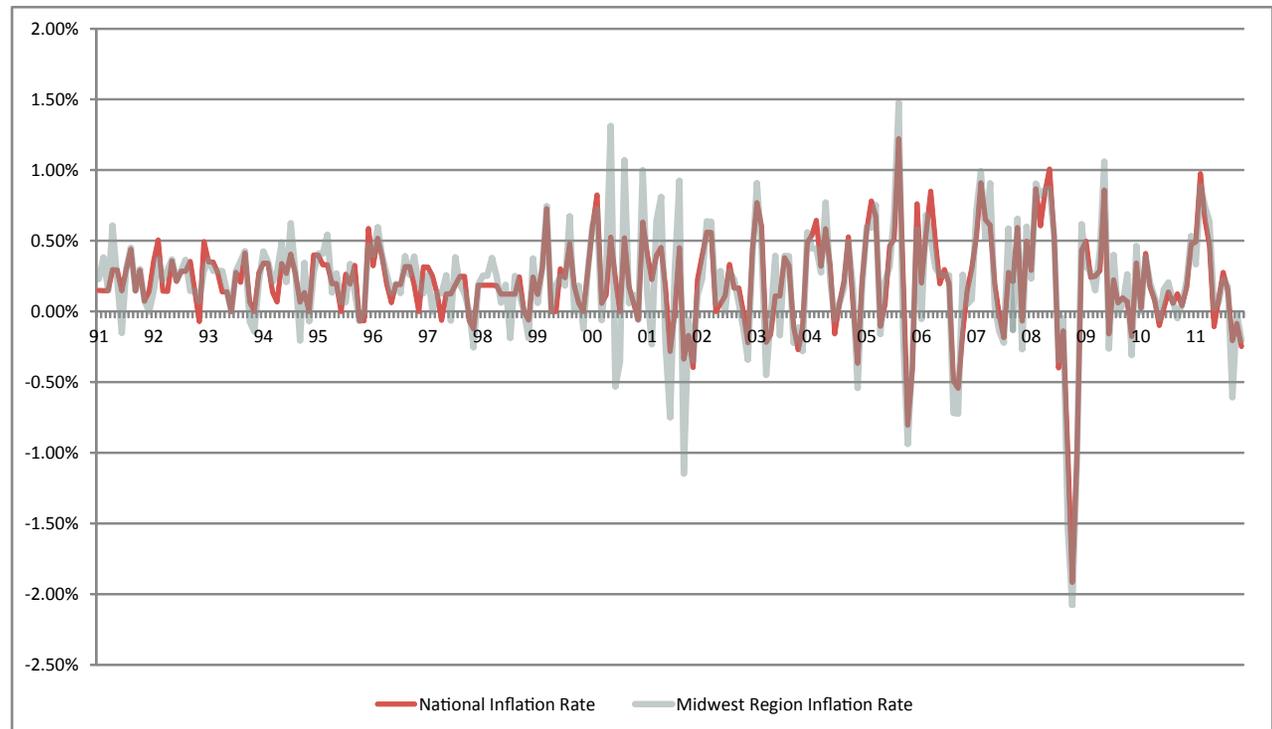

## Midwest Region

The Consumer Price Index (CPI) represents changes in prices of all goods and services purchased for consumption by urban households. User fees (such as water and sewer service) and sales and excise taxes paid by the consumer are also included. Income taxes and investment items (like stocks, bonds, and life insurance) are not included.

The CPI-U includes expenditures by urban wage earners and clerical workers, professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, retirees and others not in the labor force. The CPI-W includes only expenditures by those in hourly wage earning or clerical jobs. As the most widely used measure of inflation, the CPI is an indicator of the effectiveness of government policy. In addition, business executives, labor leaders and other private citizens use the index as a guide in making economic decisions.

## MONTHLY INFLATION RATE MIDWEST VS. U.S. 1991-2011

Source: Bureau of Labor Statistics, Released 2012

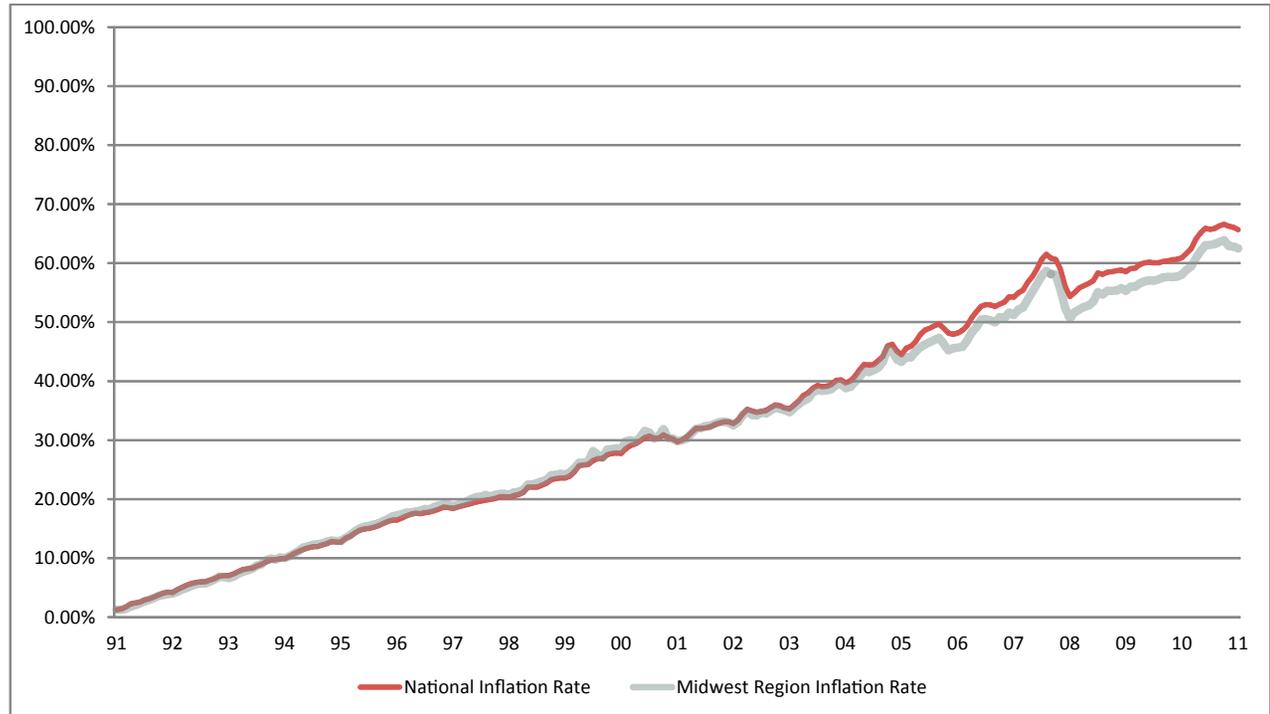

- If prices for these goods rise, the Consumer Price Index will rise and if prices decrease the index will drop.
- The percent changes in the CPI should be directly related to the price changes consumers experience for the time period for everything they buy.

### Midwest Region

The CPI and its components are used to adjust other economic series for price change and to translate these series into inflation-free dollars. Over 2 million workers are covered by collective bargaining agreements which tie wages to the CPI. The index affects the income of almost 80 million people as a result of statutory action: 47.8 million Social Security beneficiaries, about 4.1 million military and Federal Civil Service retirees and survivors, and about 22.4 million food stamp recipients. Changes in the CPI also affect the cost of lunches for the 26.7 million children who eat lunch at school. Some private firms and individuals use the CPI to keep rents, royalties, alimony payments and child support payments in line with changing prices. Since 1985, the CPI has been used to adjust the Federal income tax structure to prevent inflation-induced increases in taxes.

## INFLATION: MIDWEST VS. U.S. 1991-2011, BASE YEAR 1991

Source: Bureau of Labor Statistics, Released 2012

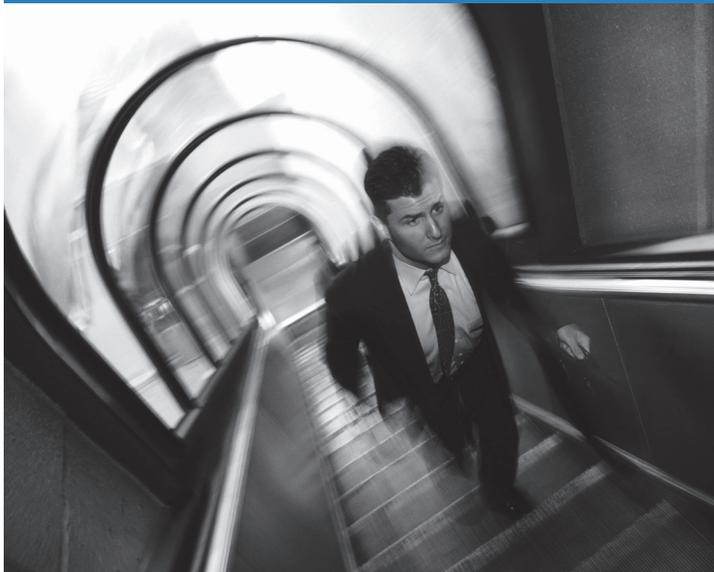

- Overall price levels increased by 65.7% over the past 20 years in the United States.
- The Midwest Region was slightly slower at 62.5% over that same period.
- This way of calculating inflation allows a person to track how a specific price, for example annual wages, have kept up with the rest of prices in the economy over the past two decades.

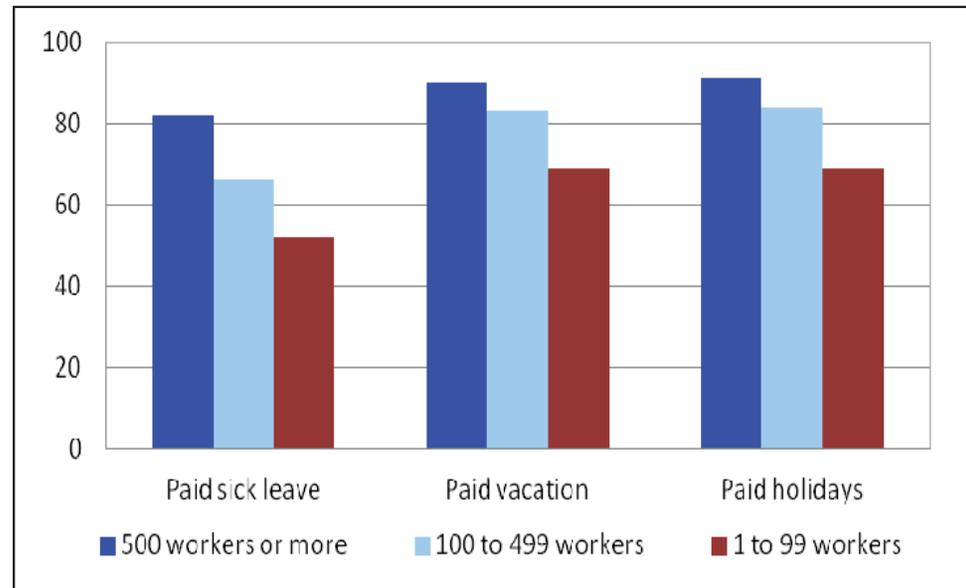

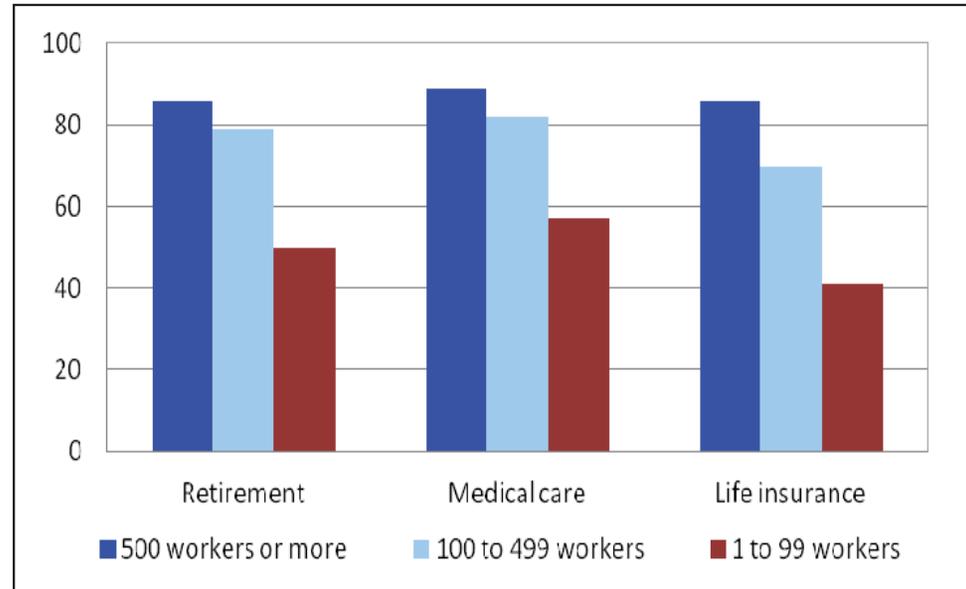

United States of America

The National Compensation Survey (NCS) covers the incidence and detailed provisions of selected employee benefit plans in private establishments. The data are presented as the percent of employees who have access to or participate in certain benefits, or as average benefit provisions (for example, the average number of paid holidays provided to employees each year).

The NCS provides incidence and extensive provisions data for two major benefit areas: Health insurance and Retirement (both defined benefit and defined contribution components).

EMPLOYERS OFFERING BENEFITS 2012

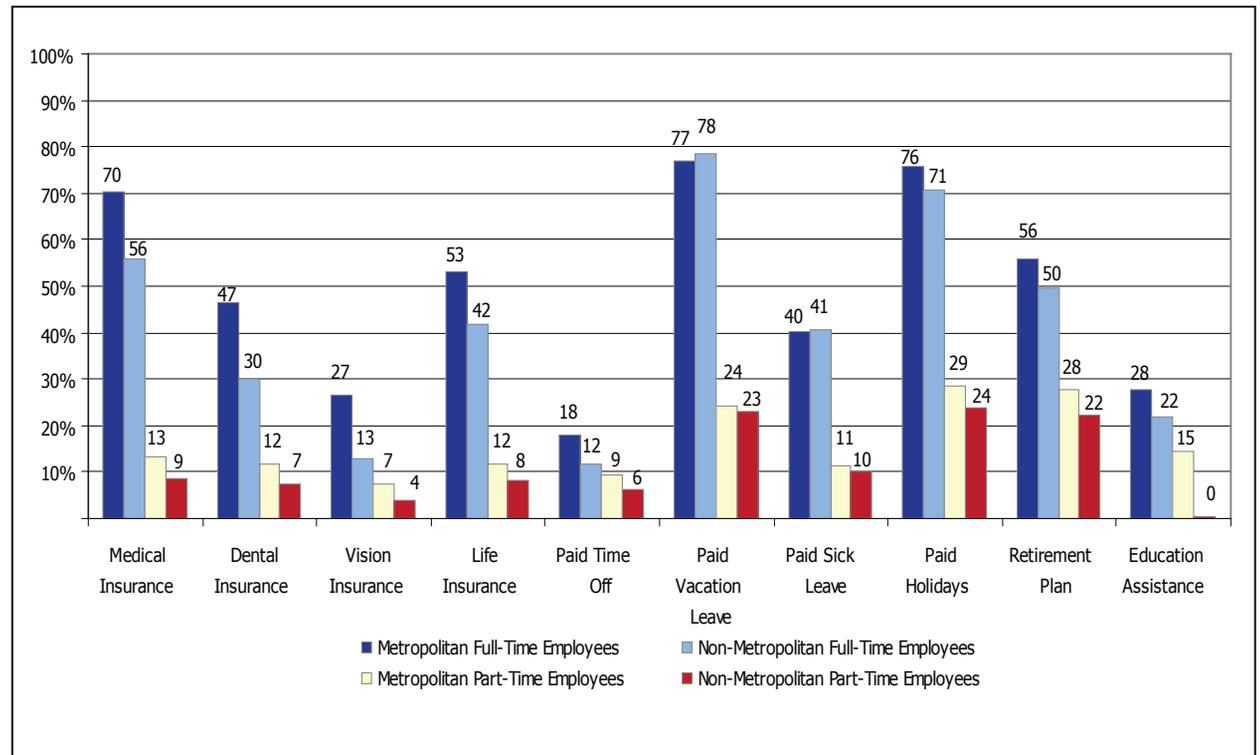

Source: Large, medium, and small establishments: Access to selected benefits, private industry, March 2012

### Nebraska Statewide

The 2006 Nebraska Employee Benefits Survey aimed to understand the type of benefits provided by businesses in Nebraska to their employees and the prevalence of employers offering these benefits. This information is important to both employers and employees since benefits can account for a significant portion of an employee's compensation package. This was the fourth time the Department of Labor conducted an employee benefits survey.

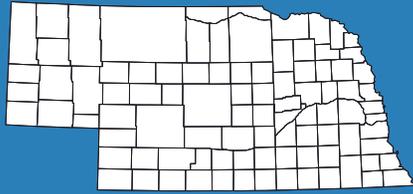

## EMPLOYERS OFFERING BENEFITS 2006

Source: Nebraska Department of Labor, Benefits Survey, Released 2007

	1-4 Employees	5-9 Employees	10-19 Employees	20-49 Employees	50-99 Employees	100-249 Employees	250+ Employees	All Sizes
Medical Insurance	30.3%	52.6%	67.3%	79.7%	92.6%	97.4%	98.6%	63.8%
Dental Insurance	13.0%	24.1%	36.9%	53.5%	72.6%	90.0%	94.4%	39.0%
Vision Insurance	6.0%	13.1%	19.0%	26.1%	39.2%	48.1%	64.1%	20.2%
Life Insurance	15.9%	33.5%	49.4%	64.4%	81.7%	93.8%	97.2%	48.1%
Paid Time Off	7.0%	10.7%	14.0%	18.4%	21.6%	36.0%	38.5%	14.8%
Paid Vacation	59.7%	79.5%	80.6%	82.7%	85.4%	77.6%	81.9%	77.7%
Paid Sick Leave	30.9%	41.7%	42.3%	42.8%	48.1%	39.7%	50.7%	40.8%
Paid Holidays	57.0%	74.6%	76.0%	76.5%	83.1%	80.3%	92.3%	73.6%
Retirement Plan	27.3%	46.5%	55.6%	62.5%	77.0%	85.1%	83.2%	53.3%
Educational Assistance	11.0%	20.2%	22.9%	28.8%	43.8%	61.1%	84.0%	25.6%

- Full-time employees were more likely to receive paid vacation leave than any other benefit on the survey.
- Part-time employees received paid holidays more often than any other benefit.
- Vision insurance was the least likely to be provided of any of the health insurance categories on the survey.

Nebraska Statewide

This table indicates the percentage of employees in each industry who have health insurance, broken down by the size of the firms which they work for.

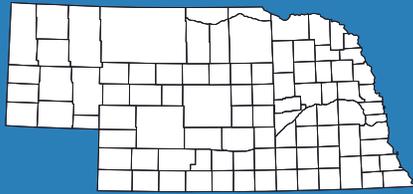

EMPLOYERS OFFERING HEALTH INSURANCE 2006

	1-4 Employees	5-9 Employees	10-19 Employees	20-49 Employees	50-99 Employees	100-249 Employees	250+ Employees	All Sizes

Manufacturing	40.8%	59.8%	85.7%	91.2%	98.8%	98.5%	100.0%	81.0%
Trade, Transportation & Utilities	31.3%	57.9%	70.4%	86.2%	93.2%	100.0%	100.0%	67.2%
Information	56.5%	78.8%	86.0%	89.3%	100.0%	100.0%	100.0%	83.1%
Financial Activities	39.3%	75.3%	92.5%	98.5%	96.0%	100.0%	100.0%	76.8%
Professional Business Services	32.5%	47.9%	73.6%	84.0%	94.1%	96.9%	92.3%	63.1%
Education and Health Services	32.4%	44.2%	58.9%	77.3%	91.7%	97.4%	100.0%	63.6%
Leisure & Hospitality	11.7%	16.0%	27.7%	48.9%	80.3%	87.5%	100.0%	38.5%
Other Services	24.8%	48.0%	70.2%	72.4%	81.3%	100.0%	100.0%	52.6%

Source: Nebraska Department of Labor, Benefits Survey, Released 2007

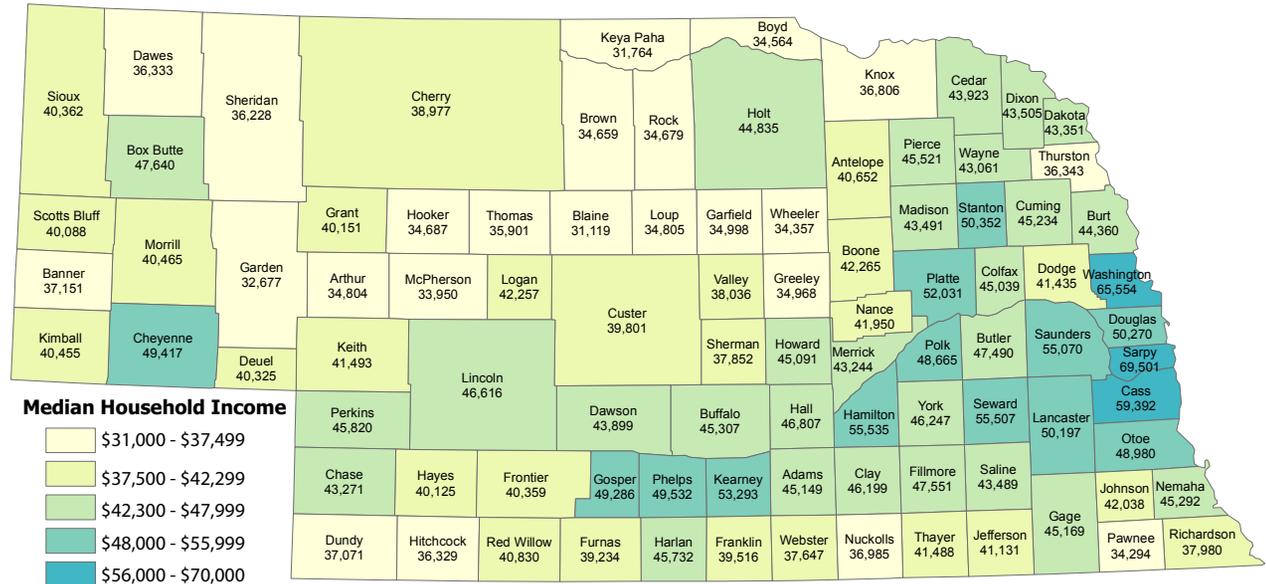

- Medical Insurance is most common in the Information industry, where 83.1% of employees receive the benefit.
- Small firms provide medical insurance at much lower rates than very large ones in every industry.
- Leisure and Hospitality is the industry which is least likely to provide medical coverage, at 38.5%.

### Nebraska Statewide

Census money income is defined as income received on a regular basis (exclusive of certain money receipts such as capital gains) before payments for personal income taxes, social security, union dues, Medicare deductions, etc. Therefore, money income does not reflect the fact that some families receive part of their income in the form of noncash benefits, such as food stamps, health benefits, subsidized housing, and goods produced and consumed on the farm. In addition, money income does not reflect the fact that noncash benefits are also received by some nonfarm residents which may take the form of the use of business transportation and facilities, full or partial payments by business for retirement programs, medical and educational expenses, etc.

## MEDIAN HOUSEHOLD INCOME BY COUNTY 2011

Source: U.S. Census Bureau, Small Area Income and Poverty Estimates, Released 2011

- Sarpy County had the highest median household income in Nebraska, at \$69,501.
- Blaine County’s median household income was the lowest of any in the state, at \$31,119.
- The metropolitan counties in the state all had a median household income over \$50,000.

### Hastings MC

The North American Industry Classification System (NAICS) was developed under the direction and guidance of the Office of Management and Budget (OMB) as the standard for use by Federal statistical agencies in classifying business establishments for the collection, tabulation, presentation, and analysis of statistical data describing the U.S. economy. Use of the standard provides uniformity and comparability in the presentation of these statistical data. NAICS is based on a production-oriented concept, meaning that it groups establishments into industries according to similarity in the processes used to produce goods or services.

## EMPLOYMENT AND WAGES BY INDUSTRY 2011

	ESTABLISHMENTS	AVG EMPLOYMENT	AVG WEEKLY WAGE	TOTAL WAGES
Agriculture, Forestry, Fishing & Hunting	67	484	\$1,216	\$13,801,982

Source: Nebraska Department of Labor, Quarterly Census of Employment and Wages, Released 2011

- The Professional and Technical Services industry paid the highest average weekly wage of \$1,671, which was more than 5 times the average weekly wage for Arts, Entertainment, and Recreation (\$322).
- The industry employing the most people in the Hastings MC was Health Care and Social Assistance.

### Hastings MC

The Quarterly Census of Employment and Wages (QCEW) Program is a cooperative program involving the Bureau of Labor Statistics of the U.S. Department of Labor and the State Employment Security Agencies. The QCEW program produces a comprehensive tabulation of employment and wage information for workers covered by State unemployment insurance laws and Federal workers covered by the Unemployment Compensation for Federal Employees program. Publicly available files include data on the number of establishments, monthly employment, and quarterly wages, by NAICS industry, by county, by ownership sector, for the entire United States. These data are aggregated to annual levels, to higher industry levels (NAICS industry groups, sectors, and supersectors), and to higher geographic levels (national, State, and Metropolitan Statistical Area (MSA)).

## EMPLOYMENT CHANGE BY INDUSTRY 2001-2011

INDUSTRY	2001 EMPLOYMENT	2011 EMPLOYMENT	EMPLOYMEN T CHANGE	% CHANGE
Agriculture, Forestry, Fishing and Hunting	420	484	64	15.24%
Mining, Quarrying, and Oil and Gas Extraction	-	-	-	-
Utilities	-	14	-	-
Construction	796	944	148	18.59%
Manufacturing	3,579	2,624	-955	-26.68%
Wholesale Trade	692	930	238	34.39%

Arts, Entertainment and Recreation	198	138	-60	-30.30%
Accommodation and Food Services	1,210	1,267	57	4.71%
Other Services (except Public Administration)	520	536	16	3.08%
Public Administration	1,148	840	-308	-26.83%
<b>All Industry</b>	<b>17,089</b>	<b>18,093</b>	<b>1004</b>	<b>5.88%</b>

Source: Nebraska Department of Labor, Quarterly Census of Employment and Wages, Released 2011

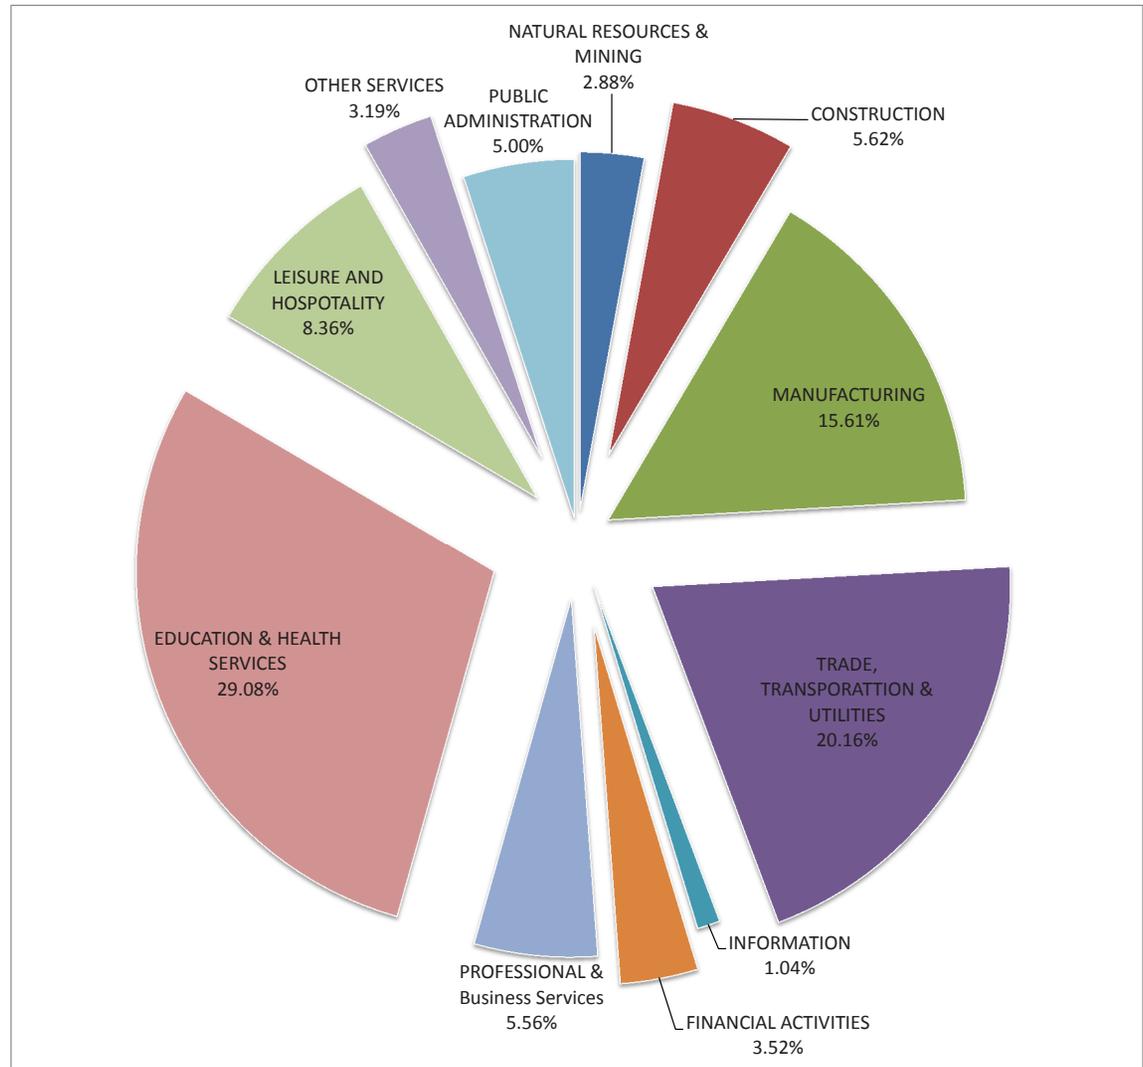

- Wholesale Trade saw the biggest percentage loss between 2001 and 2011 at 34.39%.
- However, Manufacturing lost the most in terms of numbers, losing 955 workers between 2001 and 2011.

### Hastings MC

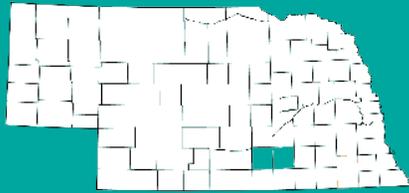

Employment data under the QCEW program represent the number of covered workers who worked during, or received pay for, the pay period including the 12th of the month. Excluded are members of the armed forces, the self-employed, proprietors, domestic workers, unpaid family workers, and railroad workers covered by the railroad unemployment insurance system. Wages represent total compensation paid during the calendar quarter, regardless of when services were performed. Included in wages are pay for vacation and other paid leave, bonuses, stock options, tips, the cash value of meals and lodging, and in some States, contributions to deferred compensation plans (such as 401(k) plans). The QCEW program does provide partial information on agricultural industries and employees in private households.

## INDUSTRY EMPLOYMENT DISTRIBUTION 2011

Source: Nebraska Department of Labor, Quarterly Census of Employment and Wages, Released 2011

- The three biggest industries in the Hastings MC are Education and Health Services, Trade, Transportation, and Utilities, and Manufacturing taking 29.08%, 20.16%, and 15.61% of the workforce respectively.

### Hastings MC

A location quotient measures the concentration of employment in a given industry (relative to a base total, in this case all industries) within a geographical area relative to the concentration of employment within that same industry for a larger geographical area, of which the first geographical area is a subset. Location Quotients demonstrate disparity in the relative proportional composition of industry employment. For example one might imagine that Detroit MI the ‘Motor City’ would have a high location quotient in the manufacturing industry sector compared the US.

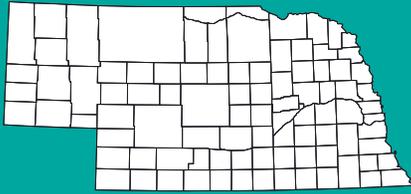

Location Quotients can be used in determining which industry sectors are ‘basic’ to an area. This metric has been used to predict what sorts of economic goods an area might export or import. It also sheds light on which industry sectors are most vital to a community’s economic wellbeing.

## INDUSTRY LOCATION QUOTIENT 2011

Industry	LQ: NE TO USA	LQ: HASTINGS TO NE
Agriculture, Forestry, Fishing and Hunting	1.53	2.06
Mining, Quarrying, and Oil and Gas Extraction	0.20	****

- The Agriculture, Forestry, Fishing, and Hunting industry is basic to the Hasting MC economy.

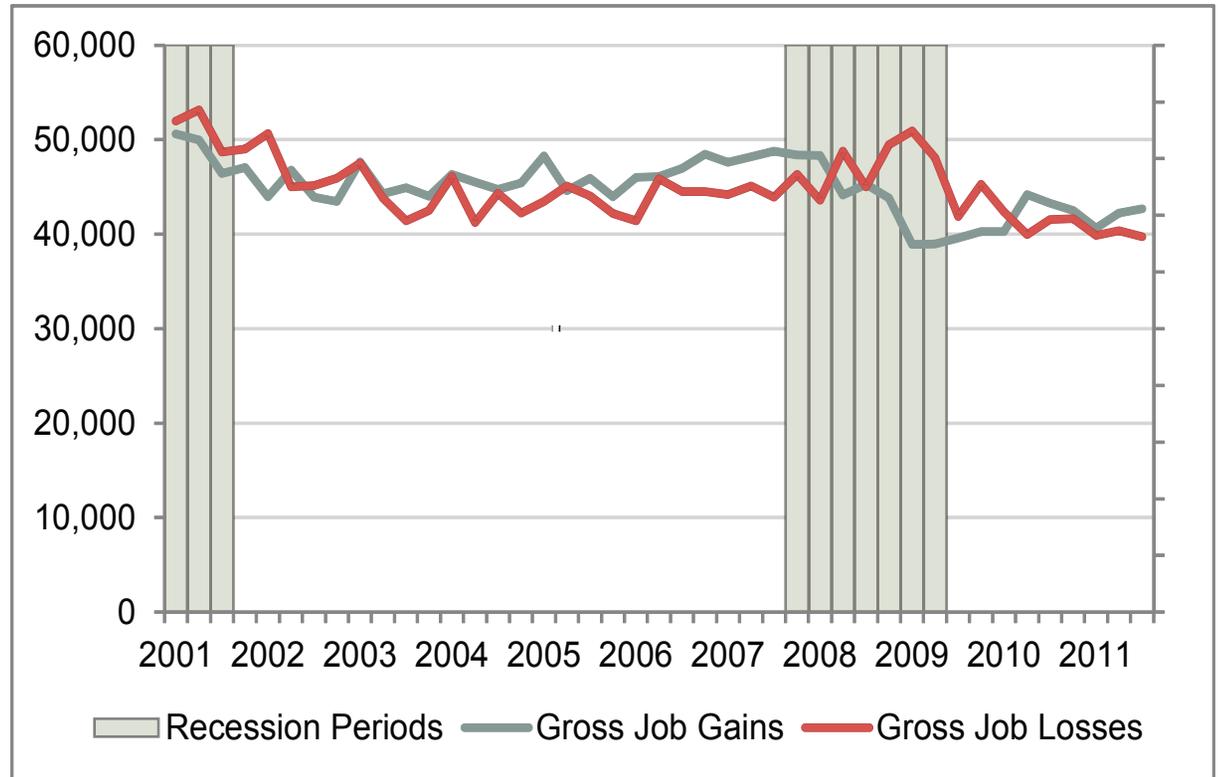

Nebraska Statewide

Business Employment Dynamics consist of a quarterly series of statistics on gross job gains and gross job losses. Gross job gains and gross job losses reveal some aspects of business dynamics, including establishment openings and closings and establishment expansions and contractions.

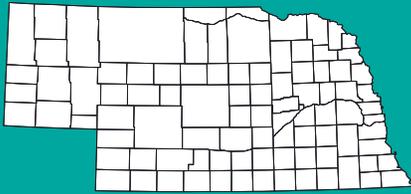

BUSINESS EMPLOYMENT DYNAMICS: GAINS AND LOSSES  
2001-2011

Note: Seasonally Adjusted Data  
Source: Bureau of Labor Statistics, Business Employment Dynamics, Released 2012

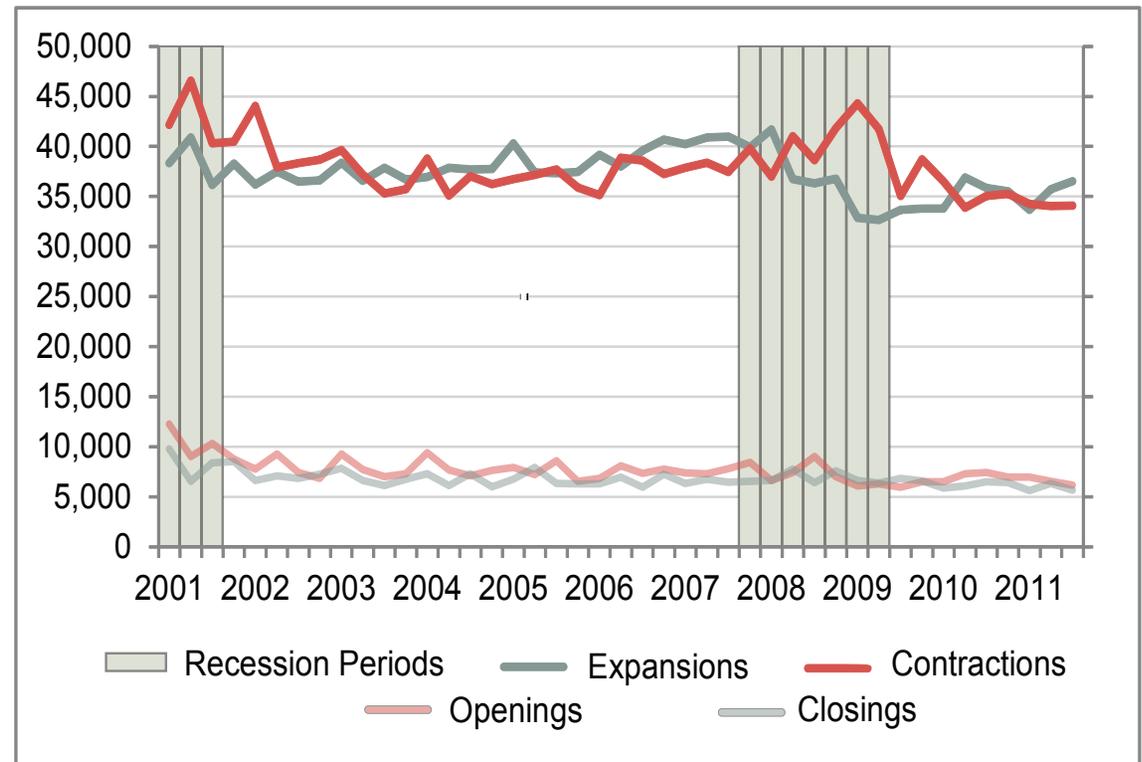

- Job gains have outpaced job losses every month since the second quarter of 2010.
- Government employees, private households, and establishments with zero employment are not included in any BED data.
- There was a net gain of 2,951 jobs during the month of third quarter of 2011, the last month data was available for this publication.

### Nebraska Statewide

The microdata used to construct the gross job gains and gross job losses statistics are from the Quarterly Census of Employment and Wages (QCEW), or ES-202, program. These data include all establishments subject to State unemployment insurance (UI) laws and Federal agencies subject to the Unemployment Compensation for Federal Employees program. Each quarter, the State agencies edit and process the data and send the information to BLS in Washington, DC. The data cover approximately 98 percent of all employment; the major exclusions from UI coverage are the self-employed and certain nonprofit organizations. Establishments report employment for the pay period including the 12th of the month. The job flow estimates report employment changes between the third month of each quarter.

## BUSINESS EMPLOYMENT DYNAMICS: EXPANSIONS AND CONTRACTIONS 2001-2012

Note: Seasonally Adjusted Data

Source: Bureau of Labor Statistics, Business Employment Dynamics, Released 2012

- Expansions outpaced contractions in the state for the 3rd quarter of 2011.
- 44,299 contractions occurred in the first quarter of 2001, this was the highest level of contraction during the most recent recession.
- 6,157 openings occurred in the state in the third quarter of 2011.

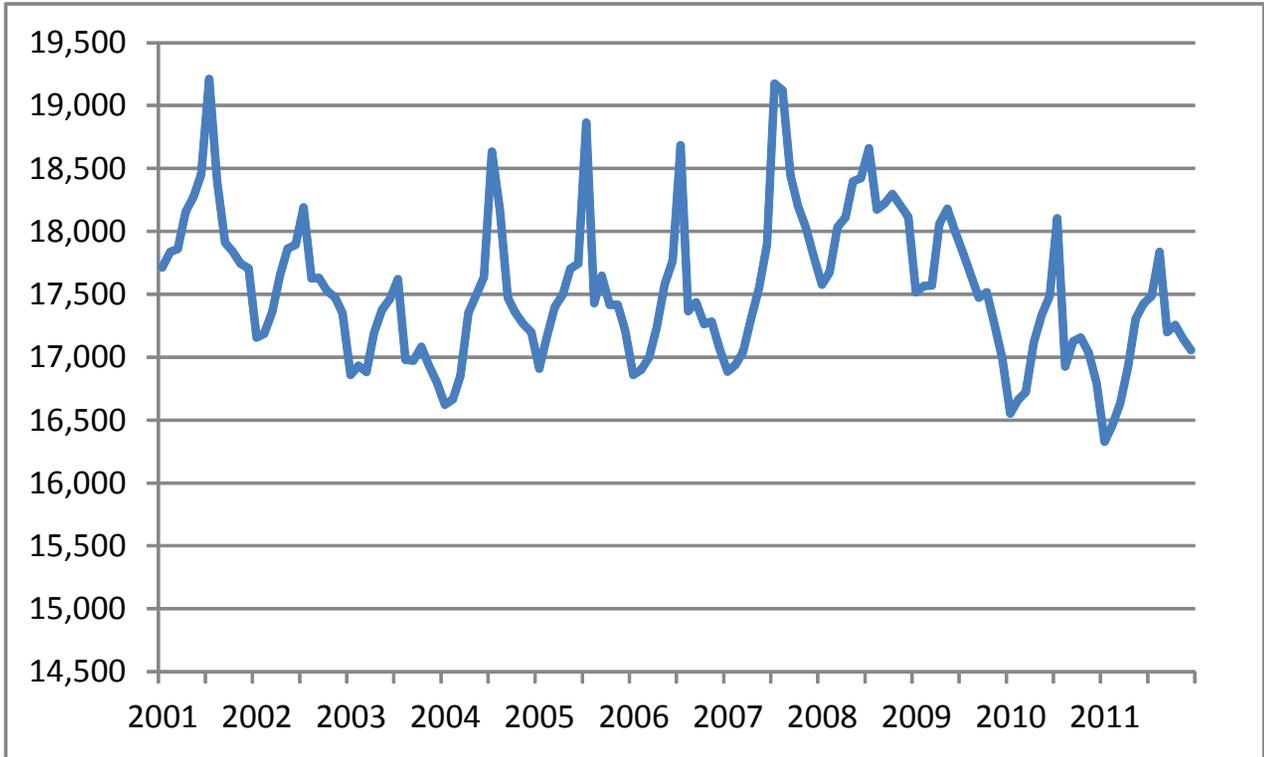

Hastings MC

QCEW is the Quarterly Census of Employment and Wages. The program originated in the 1930s, and was known as the ES-202 program until 2003 when the current QCEW name was adopted. The primary economic product is the tabulation of employment and wages of establishments which report to the Unemployment Insurance (UI) programs of the United States. Employment covered by these UI programs represents about 99.7% of all wage and salary civilian employment in the country.

TOTAL EMPLOYMENT TRENDS 2001-2012

Source: Nebraska Department of Labor, Quarterly Census of Employment and Wages, Released 2012

- Total Employment in the Hastings MC has experienced steeper peaks and valleys than Nebraska as a whole between 2001 and 2011.

## Hastings MC

The Quarterly Workforce Indicators (QWI) are a set of economic indicators -- including employment, job creation, wages, and worker turnover -- that can be queried by different levels of geography -- state, county, metro, and workforce investment area -- as well as by detailed industry, gender, and age of workers. You can query the data directly by using the QWI Online tool on this site.

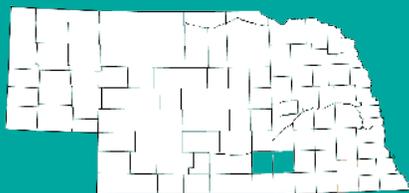

The QWI are built upon wage records in the Unemployment Insurance (UI) system and information from state QCEW data. The universe of QWI data is UI-covered earnings. UI coverage is broad, covering about 99.7% of total wage and salary civilian jobs.

## QUARTERLY WORKFORCE INDICATORS 2011

	Employment	Net Job Flows	Job Creation	New Hires	Separations	Turnover	Avg Monthly Earnings	Avg New Hire Earnings
Agriculture, Forestry, Fishing & Hunting	365	24	155	496	1,195	7.15%	\$3,287	\$2,371

Other Services (except Public Administration)	517	-3	124	283	359	9.85%	\$1,448	\$918
Public Administration	684	-4	260	226	460	5.00%	2,650	1,376
<b>All Industry</b>	<b>16,767</b>	<b>376</b>	<b>3,232</b>	<b>8,420</b>	<b>10,613</b>	<b>7.60%</b>	<b>\$2,831</b>	<b>\$1,645</b>

Source: Nebraska Department of Labor, Quarterly Workforce Indicators, Released 2012

- The industry with the lowest turnover rate also had the highest average monthly earnings. Utilities had a 2.1% turnover rate and \$5,828 average monthly earnings.
- The industry with the highest turnover rate was Arts, Entertainment, and Recreation, with a 17.7% rate.

### Hastings MC

The Occupational Employment Statistics (OES) program conducts a semi-annual mail survey designed to produce estimates of employment and wages for specific occupations. The OES program collects data on wage and salary workers in nonfarm establishments in order to produce employment and wage estimates for about 800 occupations. Data from self-employed persons are not collected and are not included in the estimates. The OES program produces these occupational estimates by geographic area, and by industry and ownership. Estimates based on geographic areas are available at the National, State, Metropolitan, and Nonmetropolitan Area levels. The Bureau of Labor Statistics produces occupational employment and wage estimates for over 450 industry classifications at the national level.

## EMPLOYMENT BY OCCUPATION: 2010-2011

53-0000	Transportation and Material Moving Occupations	1590	1520	-70

Source: Nebraska Department of Labor, Occupational Employment Statistics, Released 2012

- The Hastings MC experienced employment loss between May 2010 and May 2011.
- The occupations with the most loss were Office and Administrative Support Occupations and Sales and Related Occupations.

## Hastings MC

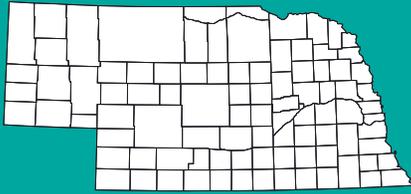

The 2010 Standard Occupational Classification (SOC) system is used by Federal statistical agencies to classify workers into occupational categories for the purpose of collecting, calculating, or disseminating data. All workers are classified into one of 840 detailed occupations according to their occupational definition. To facilitate classification, detailed occupations are combined to form 461 broad occupations, 97 minor groups, and 23 major groups. Detailed occupations in the SOC with similar job duties, and in some cases skills, education, and/or training, are grouped together.

## EMPLOYMENT BY OCCUPATION: FIRST QUARTER 2011

SOC Code	Standard Occupational Code Title	Estimated Employment May 2011	Hourly Median Wages	Annual Median Wages
41-2011	Cashiers	720	\$8.69	\$18,088.00
53-3032	Truck Drivers, Heavy & Tractor-Trailer	660	\$19.43	\$40,412.00
31-1012	Nursing Aides, Orderlies, & Attendants	560	\$10.28	\$21,370.00
29-1111	Registered Nurses	490	\$26.80	\$55,761.00
43-6014	Secretaries, Except Legal, Medical, & Executive	360	\$12.82	\$26,656.00
41-2031	Retail Salespersons	320	\$9.81	\$20,397.00
43-3031	Bookkeeping, Accounting, & Auditing Clerks	310	\$13.73	\$28,547.00
53-7062	Laborers & Freight, Stock, & Material Movers, H&	280	\$11.53	\$23,975.00
43-9061	Office Clerks, General	260	\$10.85	\$22,571.00
49-9071	Maintenance & Repair Workers, General	260	\$13.05	\$27,155.00
37-2011	Janitors & Cleaners, Except Maids & Housekeeping Cleaners	240	\$9.92	\$20,650.00
43-5081	Stock Clerks & Order Fillers	240	\$9.48	\$19,727.00
41-4012	Sales Representatives, Wholesale & Manufacturing, Except Technical & Scientific Products	230	\$24.25	\$50,446.00
51-1011	First-Line Supervisors/Managers of Production & Operating Workers	220	\$21.18	\$44,061.00
47-2031	Carpenters	200	\$13.29	\$27,655.00
25-2031	Secondary School Teachers, Except Special & Vocational Education	190	NA	\$43,667.00
29-2061	Licensed Practical & Licensed Vocational Nurses	190	\$16.81	\$34,966.00
35-3031	Waiters & Waitresses	190	\$8.51	\$17,707.00
51-2092	Team Assemblers	190	\$16.49	\$34,288.00
25-2021	Elementary School Teachers, Except Special Education	180	NA	\$39,228.00

Source: Nebraska Department of Labor, Occupational employment Statistics, released 2012

- 13 of the top 20 occupations in the Hastings MC paid over \$10 per hour.
- The number two job (Truck Drivers, Heavy and Tractor-Trailer) paid more than twice the median wage of the number one job (Cashiers).

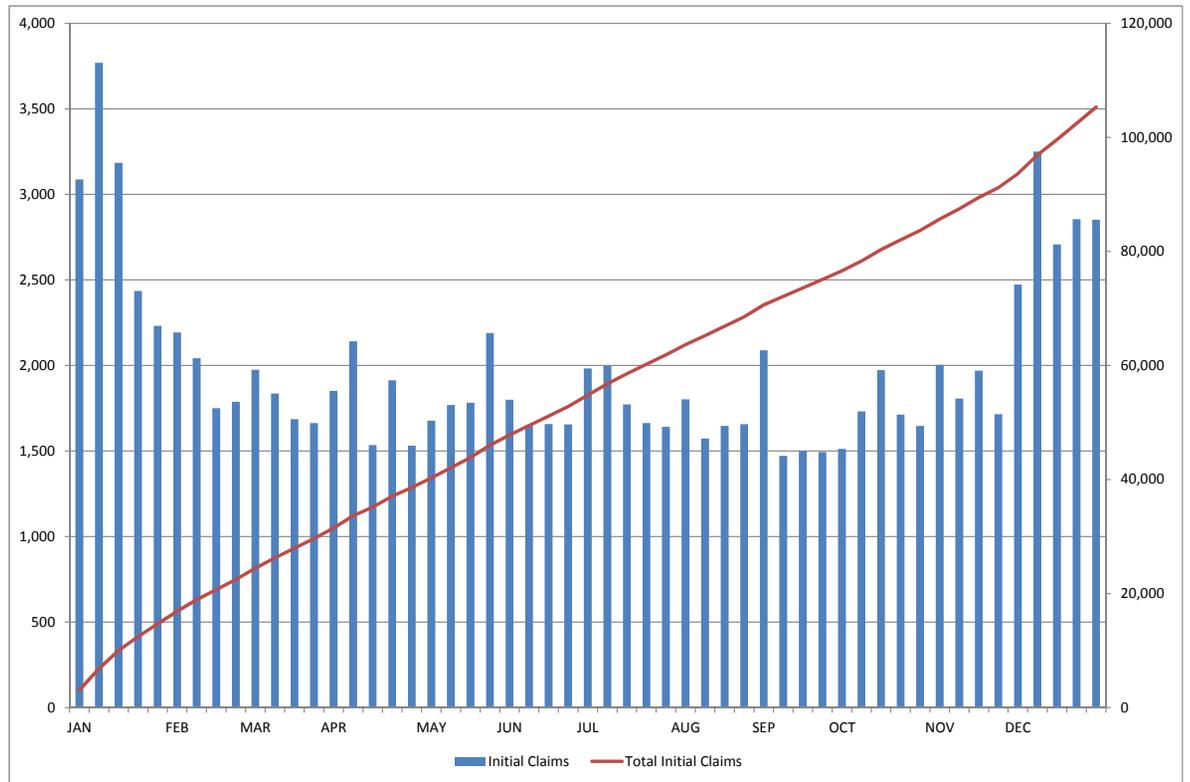

### Nebraska Statewide

The Unemployment Insurance weekly claims data are used in current economic analysis of unemployment trends in the Nation, and in each State. Initial claims measure emerging unemployment and continued weeks claimed measure the number of persons claiming unemployment benefits.

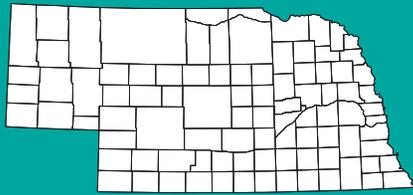

## UNEMPLOYMENT INSURANCE: INITIAL CLAIMS 2011

Source: Nebraska Department of Labor, Unemployment Insurance Program, Released 2012

- The labor force in Nebraska hit over one million in April of 2011 and has remained above one million through August 2012, latest available at the time of publication.
- Nebraska’s unemployment consistently ranks among the lowest in the nation, pointing to a strong stable economy.

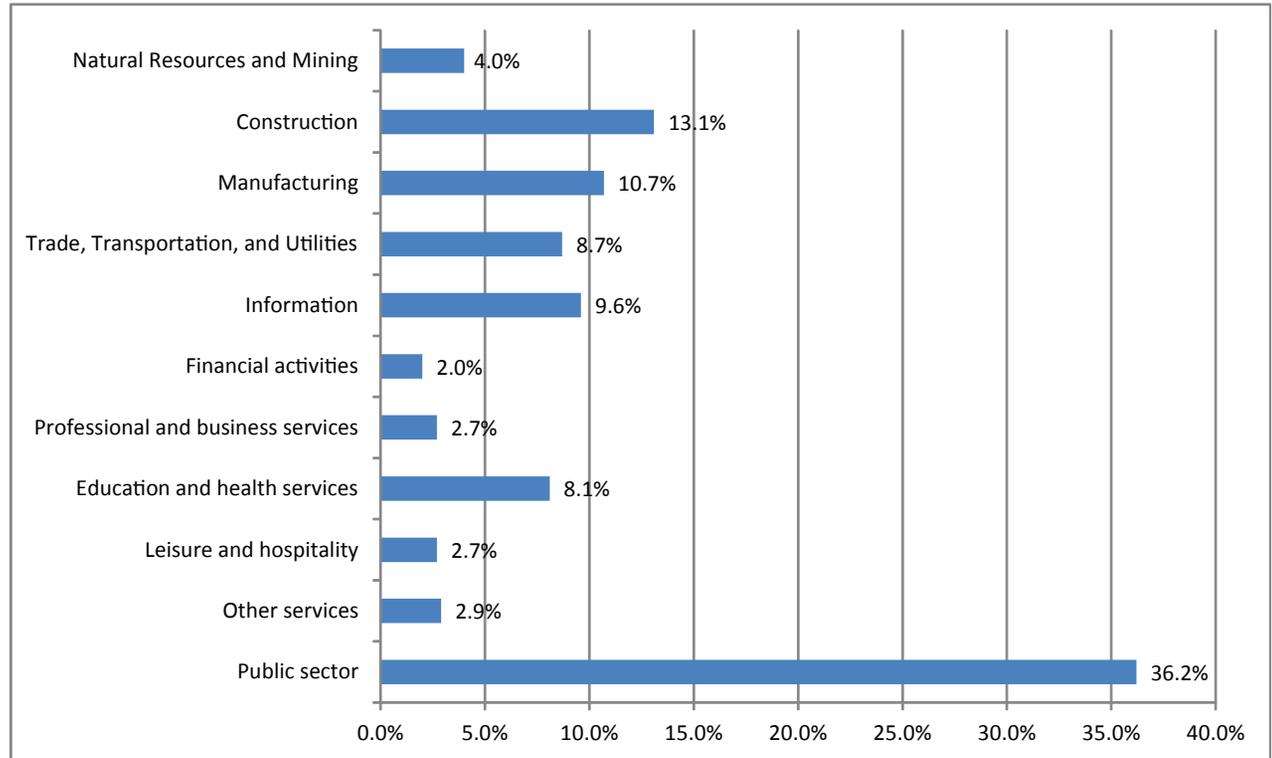

### Nebraska Statewide

The chart on the right contains U.S. Nationwide data. The chart below contains Nebraska statewide data.

The estimates in this release are obtained from the Current Population Survey (CPS), which provides the basic information on the labor force, employment, and unemployment. The survey is conducted monthly for the Bureau of Labor Statistics by the U.S. Census Bureau from a scientifically selected national sample of about 60,000 eligible households. The union membership and earnings data are tabulated from one-quarter of the CPS monthly sample and are limited to wage and salary workers. All self-employed workers are excluded.

	2010	2011
Total Employed	813,000	828,000
Total Union Members	75,000	65,000
Percent Union Members	9.3%	7.9%
Total Representation by Unions	96,000	83,000
Percent Represented by Unions	11.8%	10.0%

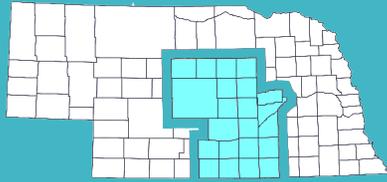

## UNIONIZATION BY INDUSTRY 2010-2011

Notes: Includes wage and salary workers age 16 and older.

Source: Bureau of Labor Statistics, Union Members in 2010-2011, released 2012

- Union participation within Nebraska declined by 10,000 employees from 2010 to 2011.
- The public sector has the highest unionization of any industry in the nation.
- Financial Activities had the lowest percent of union members for any industry.

### Central Economic Development Region

Projections by Industry category creates an estimate for the number of job openings which are expected to occur in each field for the next 10 years throughout the state. Industry employment projections are based on historical, statistical and subjective analysis of industry trends. Long-term industry projections are produced every two years and the results are then used as an input into occupational projections.

## LONG TERM INDUSTRY EMPLOYMENT PROJECTIONS 2010-2020

Industry	2010 Annual Employment	2020 Projected Employment	Change in Employment 2010-2020	Percent Change (%)	Compound Annual Growth Rate (%)
Agriculture, Forestry, and Fishing	11,621	11,603	-18	-0.2%	-0.02%

Government	8,475	8,392	-83	-1.0%	-0.10%
<b>Total</b>	<b>118,165</b>	<b>127,658</b>	<b>9,493</b>	<b>8.0%</b>	<b>0.78%</b>

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

- Manufacturing is expected to see the most growth between 2010 and 2020, adding 1,762 jobs to the Central Economic Region.
- Information is expected to take the biggest percentage hit, losing 3% of the jobs between 2010 and 2020.

### Central Economic Development Region

Projections by Occupation give estimates for the number of jobs which will open in each type of position in the next 10 years throughout the state. Applying industry staffing patterns from the most recent Occupational Employment Statistics survey to industry projections provides forecasts for occupational demand by industry for as many as 750 different job titles.

## LONG TERM OCCUPATIONAL EMPLOYMENT PROJECTIONS 2010-2020

	2010 Est. Employment	2020 Proj. Employment	Growth Openings	Replacement Openings	Total Openings	Numeric Change	Percent Change (%)
Management Occupations	6,320	6,405	203	1,323	1,526	85	1.3%

Production Occupations	11,869	13,326	1,496	2,606	4,102	1,457	12.3%
Transportation and Material Moving Occupations	10,425	11,703	1,286	2,602	3,888	1,278	12.3%
<b>Total, All Occupations</b>	<b>126,201</b>	<b>135,777</b>	<b>10,303</b>	<b>30,785</b>	<b>41,088</b>	<b>9,576</b>	<b>7.6%</b>

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

- Production occupations are expected to be the biggest gainers, gaining 1,457 jobs between 2010 and 2020.
- Transportation and Material Moving Occupations are expected to be the number two mover, of course to go along with ramped up Production

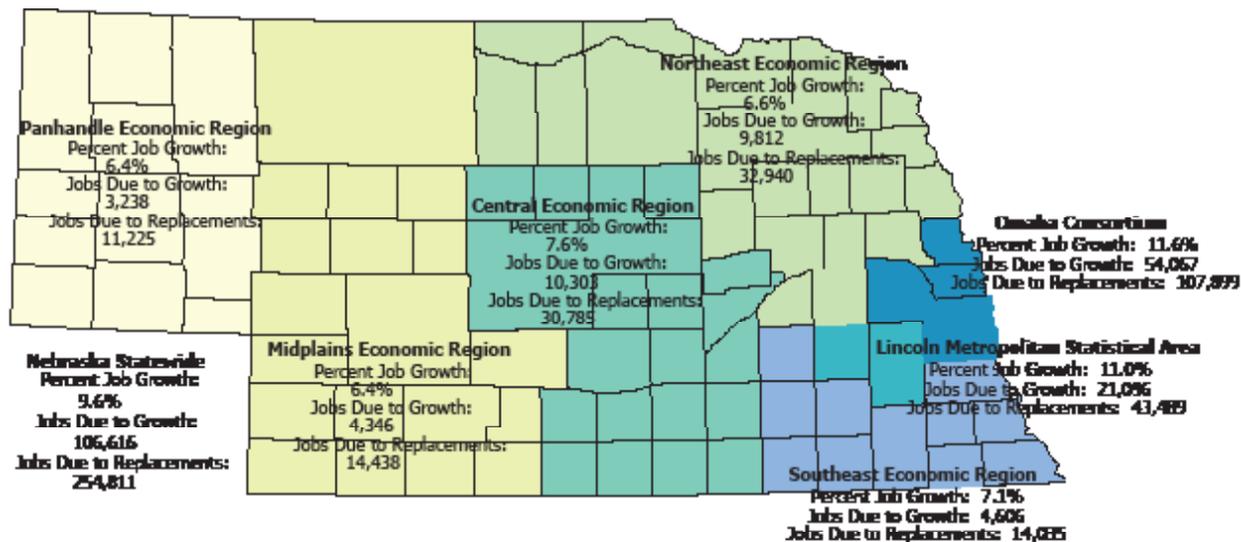

### Nebraska Statewide

Using Occupational Projections data, expectations of the job growth occurring throughout the state and in each economic region for the next 10 years are created. Employment projections provide current and forecasted economic trends. According to the current long-term occupational projections, each region in Nebraska is expected to see an increase in employment over the next several years.

These data estimate the projected number of job openings for a region. For occupations that require training, the data may be used to assess the minimum number of workers who will need to be trained. If employment is projected to increase from 2010 to 2020, then job openings due to growth are equal to the employment change. If employment is projected to decline, then there are no job openings due to growth. Replacement needs are the number of projected openings resulting from workers retiring from or permanently leaving an occupation. Replacement needs are calculated from monthly CPS data for 2001 to 2010.

## PROJECTED EMPLOYMENT CHANGE BY REGION 2010-2020

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

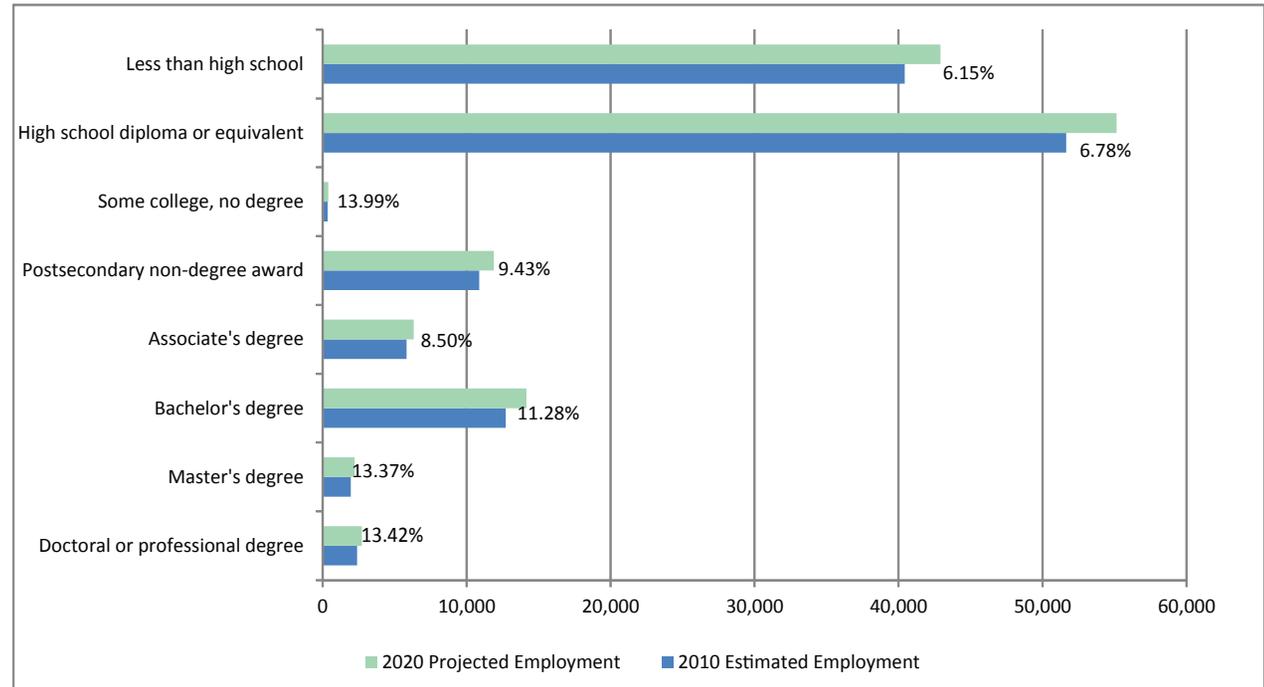

- Employment in the Lincoln and Omaha MSAs is expected to grow at a much higher rate than the rest of the state.
- Employment in the Central Economic Region is expected to grow at the highest rate for the rest of the state.

### Central Economic Development Region

Using Occupational Projections data, expectations of the job growth for positions which require different levels of entry education are created. Occupational projections data can be examined by education and training. There are eleven educational and training categories that are determined by the level most often required for that occupation, sometimes an employer will require more or less.

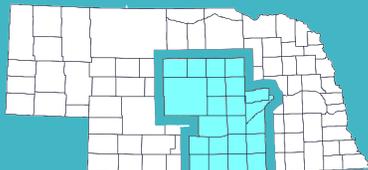

## PROJECTED EMPLOYMENT CHANGE BY EDUCATION LEVEL 2010-2020

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

- Some college, no degree occupations are expected to grow the fastest at 13.99%, followed closely by Doctoral or professional degree (13.42%) and Master’s degree (13.37%) occupations in the Central Economic Region.

### Central Economic Development Region

A listing of occupations in the state that are expected to have higher than average wages, training and education requirements, and job openings over the next 10 years. The occupations listed in the table represent the top high wage, skill and demand occupations. These occupations typically offer above average wages, require a higher than average level of education or skill and have a high level of demand. Demand is determined by the number of annual openings, the net change in employment and the growth rate.

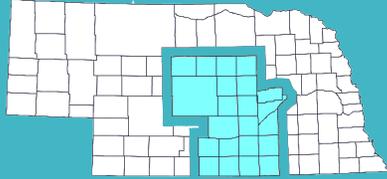

## H<sup>3</sup> OCCUPATIONS

Rank	SOC Title	Avg Annual Opening	Avg Hourly Wage	Education & Training
1	Registered Nurses	98	\$25.32	Associate degree
2	Truck Drivers, Heavy and Tractor-Trailer	79	\$17.90	Postsecondary vocational training
3	Elementary School Teachers, Except Special Education	48	NA	Bachelor's degree
4	Licensed Practical and Licensed Vocational Nurses	38	\$16.65	Postsecondary vocational training
5	Secondary School Teachers, Except Special and Vocational Education	33	NA	Bachelor's degree
6	Sales Representatives, Wholesale and Manufacturing, Except Technical and Scientific Products	NA	\$22.36	Work experience in a related occupation
7	Middle School Teachers, Except Special and Vocational Education	20	NA	Bachelor's degree
8	Insurance Sales Agents	22	\$19.52	Postsecondary vocational training
9	Accountants and Auditors	19	\$27.06	Bachelor's degree
10	Self-Enrichment Education Teachers	NA	\$20.61	Work experience in a related occupation
11	Electrical Power-Line Installers and Repairers	14	\$21.52	Associate degree

18	Business Operations Specialists, All Other	14	\$21.68	Bachelor's degree
19	Postsecondary Teachers, All Other	NA	NA	Doctoral degree
20	Electricians	13	\$17.06	Postsecondary vocational training

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

- As with most of the Nebraska Economic Development Regions, Registered Nurses are expected to be high wage, high skill, and high demand occupations in the Central Economic Development Region.
- Also a trend in H3 jobs are the number two “hot job”, Truck Drivers, Heavy and Tractor-Tailer occupations.

### Central Economic Development Region

Utilizing staffing patterns derived from the Occupational Employment Statistic surveys, the projections team creates estimates of which type of positions are expected to increase in specific fields. The chart shows the occupational projections for the largest occupation within the major industry groups based on 2010 estimated employment. Looking at projections from this perspective helps give more detail to the projections as occupations can vary widely from industry to industry.

## OCCUPATIONS BY INDUSTRY 2010-2020

Industry	Largest Occupation	2010 Estimated Employment	2020 Projected Employment	Numeric Change	Percent Change (%)

Source: Nebraska Dept. Of Labor, Office of Labor Market Information, Released 2012

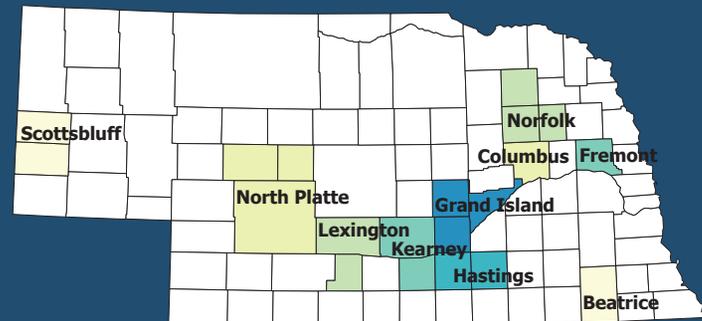

- Registered nurses are expected to add 219 positions to the Education and Health Services industry; an 8.8% increase in employment.
- Carpenters are expected to grow by 24.4% in the Construction industry.

## AREA DEFINITIONS

Labor Market Regional Reviews are available for ten identified Micropolitan Statistical Areas, the Lincoln Metropolitan Statistical Area, and the Omaha Consortium. The publications are available in PDF format on the Nebraska Department of Labor Web site at [networks.nebraska.gov](http://networks.nebraska.gov). Printed copies can be ordered by calling 1-800-876-1377.

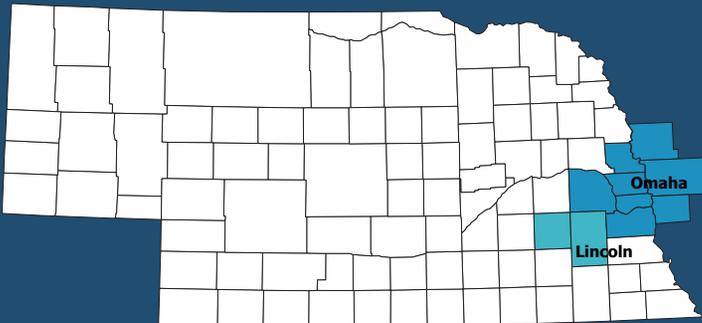

As much as possible, the most local data available is provided for each data element. In some cases data for a larger area must be presented to ensure confidentiality of individuals and businesses. Definitions for geographic areas used in this publication are shown below.

The federal Office of Management and Budget (OMB) defines metropolitan and micropolitan statistical areas to collect, tabulate, and publish federal data. Metropolitan and micropolitan statistical areas are defined by a core area with a specific population, along with adjacent communities with a high level of social or economic integration with the core area. Both metropolitan and micropolitan statistical areas may be a single county or may include multiple counties.

### Micropolitan Statistical Areas

Micropolitan Statistical Areas are defined as a core population of between 10,000 and 50,000 residents, as well as areas with a high degree of social and economic integration. In Nebraska, there are ten micropolitan statistical areas which can be seen on the map to the left.

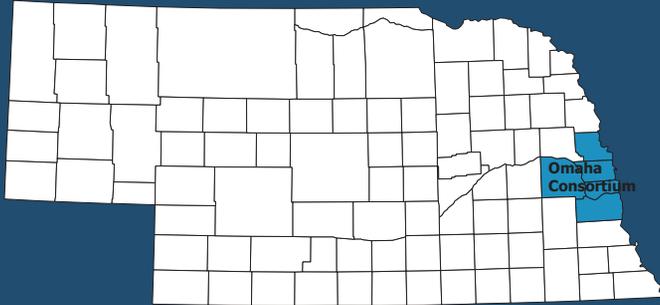

### Metropolitan Statistical Areas

A Metropolitan Statistical Area is defined as an urban area with at least 50,000 residents. Adjacent counties with a high degree of social and economic ties to the core area are included in the metropolitan statistical area. Nebraska has two metropolitan statistical areas: Omaha and Lincoln. The Sioux City metropolitan statistical area includes counties in Nebraska; however, because the population core is in Iowa, it is considered an Iowa metropolitan statistical area.

# AREA DEFINITIONS

APPENDIX A

## Omaha Consortium

The Omaha Metropolitan Statistical Area includes eight counties: five in Nebraska and three in Iowa. The Omaha Consortium includes only those counties in the Omaha Metropolitan Statistical Area that are located in Nebraska. This need for the Omaha Consortium is due to the inability to compile some data for areas that cross state lines.

## Economic Regions

Nebraska has seven Economic Regions: Panhandle, Mid-Plains, Central, Northeast, Southeast, Lincoln and Omaha. The Lincoln Region is comprised of Lancaster and Seward counties, and the Omaha region is comprised of Cass, Douglas, Sarpy, Saunders and Washington counties. The other five regions are comprised of the remaining 88 counties in the state.

## Community College Regions

There are six Community College service regions in Nebraska. Service regions follow county boundaries with two exceptions. Northeast Community College serves the northern edge of Boone County and Western Nebraska Community College serves the western edge of Cherry County.

## CONTACT INFORMATION

**F**or questions about any topics related to Nebraska’s labor market, or to request a printed copy of a report mentioned in this publication, please contact the Office of Labor Market Information at any of the numbers listed below. You may also contact the Office of Labor Market Information at [ndol.lmi\\_ne@nebraska.gov](mailto:ndol.lmi_ne@nebraska.gov) or visit us on the Web at [networks.nebraska.gov](http://networks.nebraska.gov).

Office of Labor Market Information: The home page can be found at [networks.nebraska.gov](http://networks.nebraska.gov); click on Labor Market Information on the right navigation pane.
