Nebraska Rural Health Works Health Economic Profile for Colfax County, Nebraska

Prepared by
Li-Wu Chen, Ph.D., Project Director
Michelle Mason, M.A., Health Data Analyst
Liyan Xu, M.S., Health Data Analyst
Daniel Hummel, B.A., Graduate Assistant

January 2009

Executive Summary on the Economic Impact of the Health Care Sector

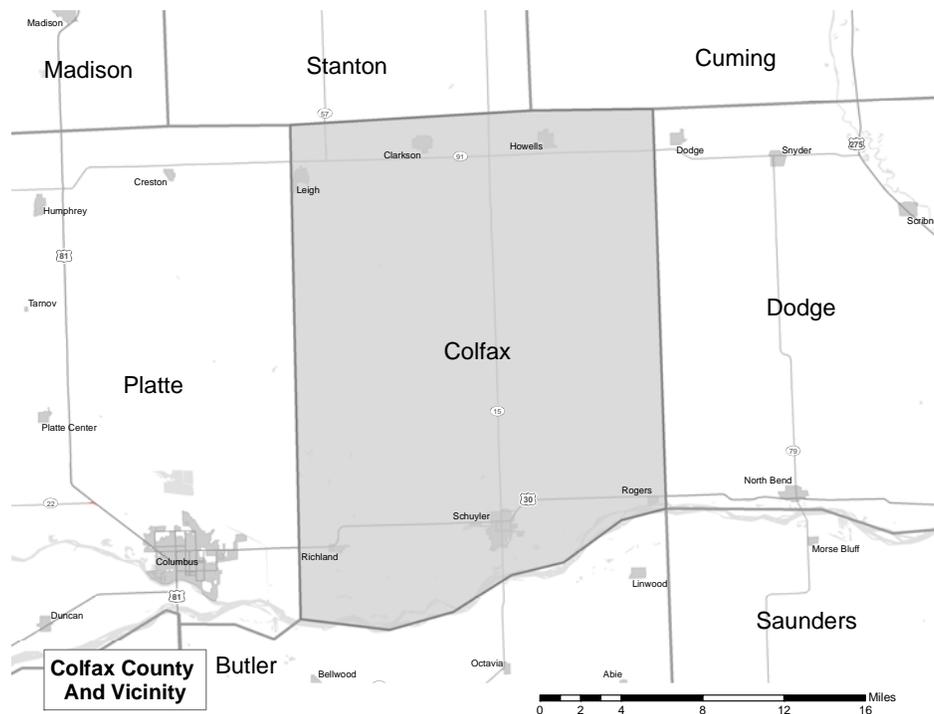

- ◆ One job created in the health care sector of Colfax County would lead to the creation of another 0.24 job in other sectors of the county's economy.
- ◆ One dollar of income earned in the health care sector of Colfax County would lead to another \$0.14 of income earned in other sectors of the county's economy.
- ◆ One dollar spent in the health care sector of Colfax County would lead to another 0.26 spent in other sectors of the county's economy.
- ◆ The overall job creation due to health care (directly and indirectly) in Colfax County is estimated at 372 jobs, which accounts for 6.3% of the county's total employment.
- ◆ The overall income earned due to health care (directly and indirectly) in Colfax County is estimated at \$13.31 million, which accounts for 6.8% of the county's total income.
- ◆ The overall spending due to health care (directly and indirectly) in Colfax County is estimated at \$28.42 million, which accounts for 2.6% of the county's total economic output.

I. GEOGRAPHY

Colfax County is located in the Eastern region of Nebraska. The county has a total of 413.14 square miles with a population density of 25.3 people per square mile (Nebraska: 22.3 per square mile). The county seat of Colfax County is Schuyler, Nebraska.

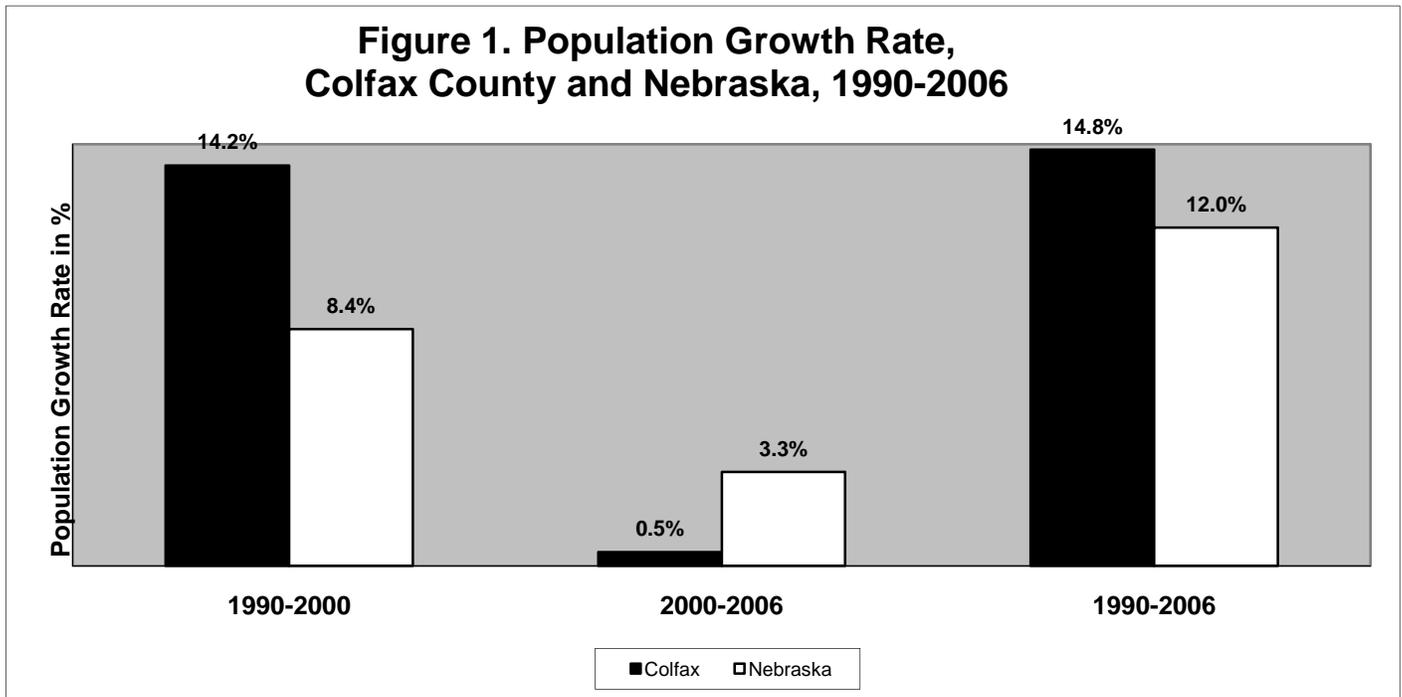

Colfax County, Nebraska

II. POPULATION

The population for Colfax County was 10,113 in 2006. The county experienced a positive population change of 14.8% (compared to +12.0% statewide) during 1990-2006 (Figure 1). The county's minority population has increased amongst some groups of minorities, particularly with the Hispanic minority. The white population still represented the majority of the county's population in 2006 (98.2% vs. 91.8% statewide, Table 1). In addition, the county's population was older than the state's, with the elderly (aged 65+) representing 18% (compared to 13.9% statewide) of the population in 2006 (Table 2).

Figure 1. Population Growth Rate, Colfax County and Nebraska, 1990-2006

Sources: U.S. Bureau of the Census. Census 1990 and Census 2000, Summary Tape File 1. <http://factfinder.census.gov>. 2006 population: 2006 Estimates 2011 project by Geolytics Inc.

Table 1. Population by Race for Colfax County and Nebraska, 2000 and 2006

	Colfax County 2000	Nebraska 2000	Colfax County 2006	Nebraska 2006
White	81.7% (8,533)	89.6% (1,533,261)	98.2% (10,304)	91.8% (1,624,120)
Black	0.1% (7)	4.0% (68,541)	0.1% (12)	4.4% (77,379)
American Indian Eskimo and Aleut	0.2% (20)	0.9% (14,896)	0.4% (47)	1.0% (17,276)
Asian or Pacific Islander	0.3% (36)	1.3% (22,204)	1.0% (103)	1.7% (30,454)
Other Race	15.9% (1,664)	2.8% (47,845)	0.2% (26)	1.1% (20,321)
Hispanic*	26.2% (2,732)	5.5% (94,425)	32.3% (3,393)	7.5% (131,904)

* Hispanic individuals were allowed to identify race alone or in combination with one or more other races, therefore totals will be more than 100

III. ECONOMIC IMPACT OF THE HEALTH CARE SECTOR

Manufacturing is the largest employer within Colfax County, followed by retail trade, health care and social assistance, transportation and warehousing, and accommodation and food services. The health care sector of Colfax County includes one hospital, two nursing care facilities, three community care facilities for the elderly, one physician office, three dentist offices, three chiropractor offices, one optometrist office, and three pharmacies.

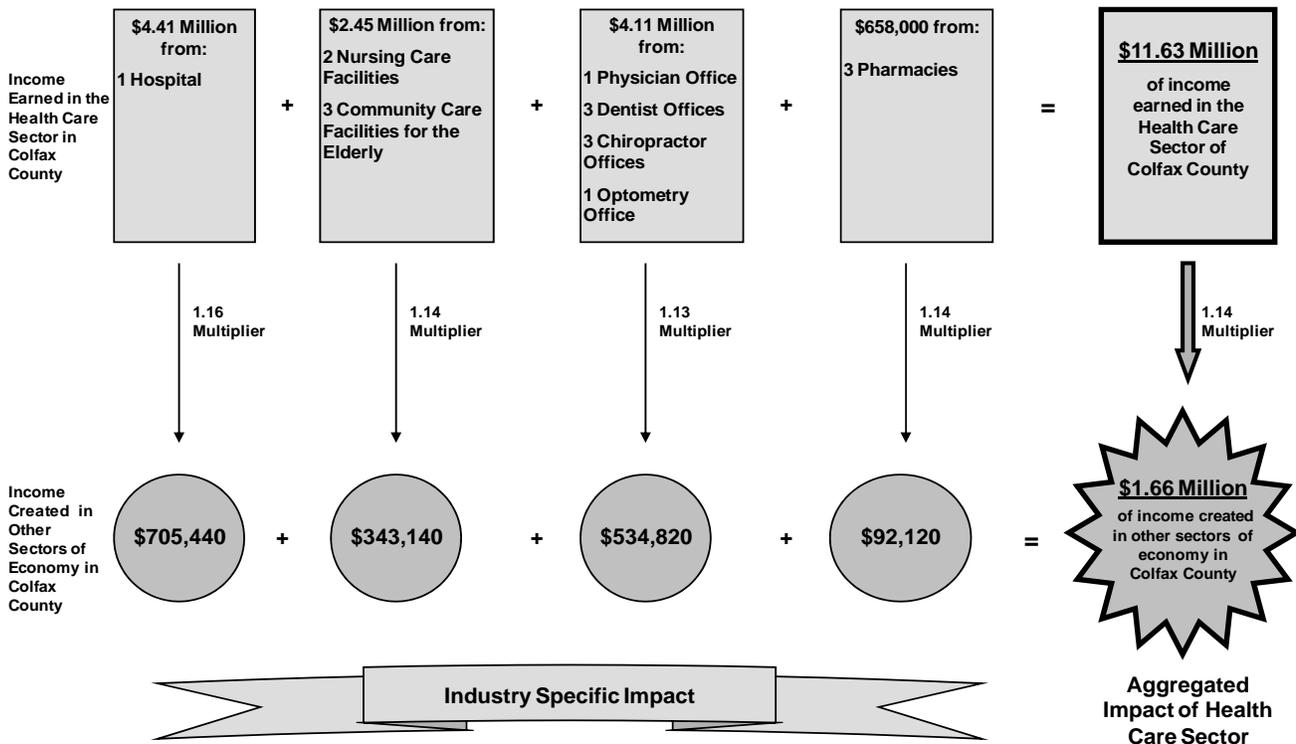

- ◆ The 301 jobs in the health care sector of Colfax County created (through a 1.24 multiplier) another 71 jobs in other sectors of the county's economy (Figure 2). Therefore, the combined effect represents 6.3% of the county's total employment (i.e., 372 out of 5,900 jobs).
- ◆ The \$11.63 million of income earned in the health care sector of Colfax County has created (through a 1.14 multiplier) another \$1.68 million of income in other sectors of the county's economy (Figure 3). Therefore, the combined effect represents 6.8% of the county's total income (i.e., \$13.31 million out of \$196.96 million).
- ◆ The \$22.58 million spent in the health care sector of Colfax County created (through a 1.26 multiplier) another \$5.84 million of spending in other sectors of the county's economy (Figure 4). Therefore, the combined effect represents 2.6% of the county's total economic output (i.e., \$28.42 million out of \$1.11 billion).

IV. SOCIO-ECONOMIC INDICATORS

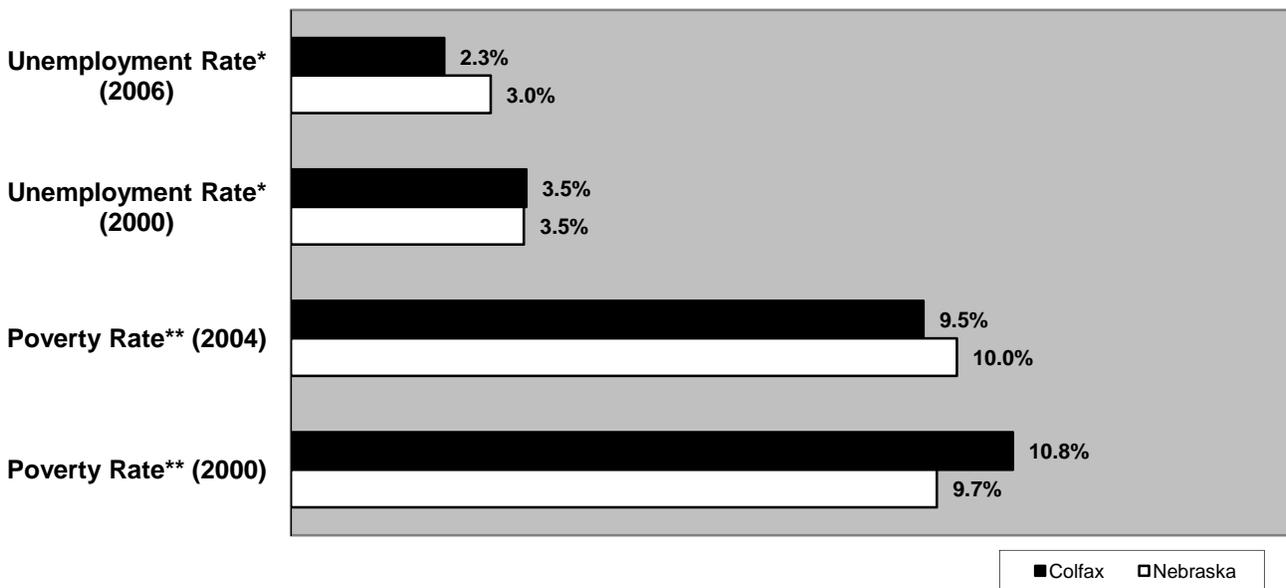

The median household income of the county increased since 2000 by 4.9% to \$37,620 in 2004 (compared to \$42,166 statewide), and the per capita income of the county increased since 2000 by 77.5%, to \$26,885 in 2005 (compared to \$32,923 statewide) (Figure 5). Colfax County experienced a lower unemployment rate (2.3% vs. 3.0% statewide) than the state in 2006 and a lower poverty rate (9.5% vs. 10.0% statewide) than the state in 2004 (Figure 6). The county outperformed the state in one of the social indicators (crime arrest rate) shown in Table 3, but had a higher percentage of residents aged 25 and older who did not graduate from high school, a higher percentage of 7th to 12th graders who dropped out of school, and a higher percentage of first births born to unmarried women, younger than 20, with less than a high school education.

V. HEALTH STATUS INDICATORS

Colfax County had a lower overall death rate, but had a higher infant mortality rate and motor vehicle death rate compared with the state between 2000 and 2004 (Figure 7). Colfax County had a lower rate of low-weight birth and a lower percentage of pregnant women who smoke, but a higher percentage of births to adolescents aged 10 to 17 and a lower percentage of pregnant women who reported obtaining prenatal care in the 1st trimester when compared to the state (Figure 8). Among the top 5 leading causes of death of Colfax County residents, the county had the same (unintentional injuries) or lower mortality rates than the state for all of the 5 leading causes reported (Figure 9). Among the top 5 leading causes of hospitalization of Colfax County residents between 2003 and 2004, the county had a higher hospitalization rate than the state for digestive diseases (Figure 10).

Figure 10. Top 5 Leading Causes of Hospitalization* for Colfax County and the Corresponding Hospitalization Rates for the County and Nebraska, 2003-2004**

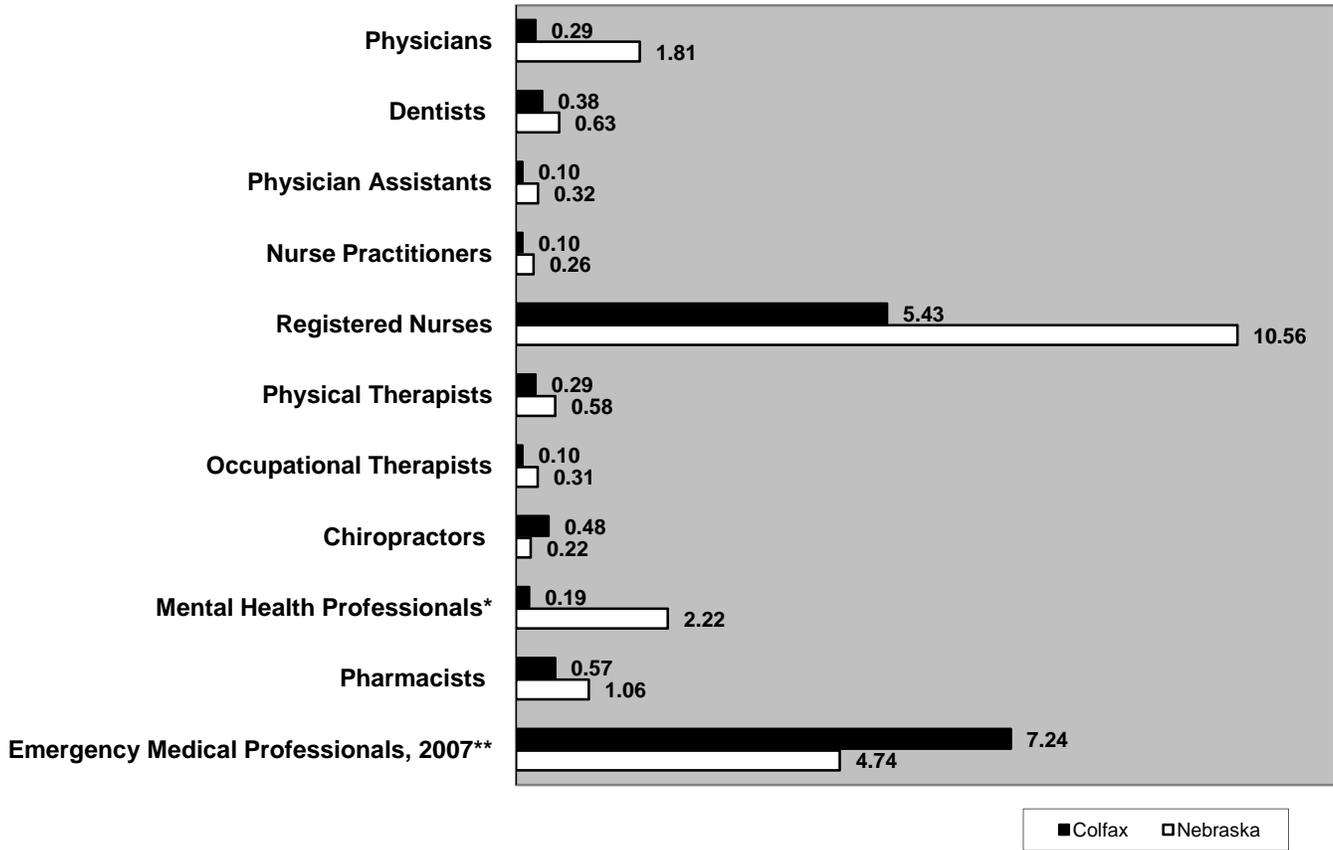

*Hospitalizations for pregnancy and childbirth were excluded from this analysis.

**Defined as the proportion of inpatient hospital discharges to a population within clearly specified geographic boundaries, age adjusted per 100,000 population. Source: Nebraska Health and Human Services County Profiles. <http://www.hhs.state.ne.us/profiles/index.htm#County>.

VI. HEALTH CARE PROFESSIONALS

Colfax County is federally designated as a dental and mental health professional shortage area. The city of Schuyler, the Lincoln service area, and the Adams service area are designated as medically underserved populations by the federal government. The state government has designated Colfax County as a health professional shortage area in the specialties of family practice, general surgery, internal medicine, pediatrics, OB/GYN, psychiatry, pharmacy, occupational therapy and physical therapy. Colfax County has a higher professional-to-population ratio than the state for Chiropractors and EMS professionals, but a lower ratio for other health professionals, shown in Figure 11.

Figure 11. Number of Practicing Health Professionals Per 1,000 Population, Colfax County and Nebraska, 2005

*Mental Health Professionals include Psychiatrists, Licensed Psychologists, Master Social Workers, Certified Professional Counselors, Licensed Mental Health Practitioners, and Marriage and Family Therapists.

** Emergency Medical Professionals include Emergency Medical Technician (EMT) Paramedic, EMT-Intermediate, EMT-Basic, and First Responders.

VII. HOSPITAL AND LONG-TERM CARE BEDS

Table 4 shows that Colfax County’s hospital has a lower bed-to-population ratio than the state. As a result, the need for hospital inpatient care (for the general public) could be unmet.

Table 4. Selected Health Care Facility Bed-to-Population Ratios for Colfax County and Nebraska

	Colfax County	Nebraska
Number of hospital beds per 1,000 population (2007)	2.38**	3.47*
Number of Long Term Care beds per 1,000 elderly population (65+) 2005	77.3*	73.9*

Data Notes

Using IMPLAN software and IMPLAN data for Nebraska's five health-related economic subsectors, we predict changes in overall economic activity as a result of change in health care subsectors. The IMPLAN software is based on an economic input-output model. To improve the accuracy of the dataset in order to better estimate health sector impact, we also use information from the U.S. Census Bureau's *County Business Patterns 2006* and the *American Hospital Association Annual Survey Database: Fiscal Year 2006*. Analysis is only performed at the county level.

Acknowledgments

We would like to thank Dennis Berens, at the Nebraska Office of Rural Health, for his enthusiastic support of the Nebraska Rural Health Works Project. We would also like to thank Nicole Van Osdel at the Nebraska Center for Rural Health Research for making the maps.

About the Nebraska Rural Health Works Project

The Nebraska Rural Health Works Project is made possible with the financial support of the Nebraska Office of Rural Health and through additional personnel and resources provided by the College of Public Health at the University of Nebraska Medical Center. The brief reports are designed to inform opinion leaders (from general business, health care, and government) in rural communities about the contribution health care makes to the county economy, both directly and indirectly. We use IMPLAN software, which uses an economic input-output model, to predict changes in overall economic activity as a result of change in the health care sector. In addition to the analysis of the economic impact of the health sector on a specific county, other information, such as demographics, socio-economic and health status indicators, health care professionals and facility bed capacity, are reported for a county.

If you would like to view additional County Profiles for Nebraska, please visit our Nebraska Rural Health Works website: <http://www.unmc.edu/rural/NeRHW>.

If you would like additional information regarding Nebraska's health care financing, health professionals, health status and health care delivery systems, visit the Nebraska Health Information Project website: <http://www.unmc.edu/nebraska>.

County Health Economic Profiles can be prepared upon request. At this time, we only perform analysis at the county level. If you are interested in this project, you can request a profile by contacting the Project Director, Li-Wu Chen, Ph.D. (liwuchen@unmc.edu), or Michelle Mason, M.A. (mmason@unmc.edu) at the Nebraska Center for Rural Health Research, College of Public Health, University of Nebraska Medical Center, (402)559-5260.
