## ***Executive Summary on the Economic Impact of the Health Care Sector***

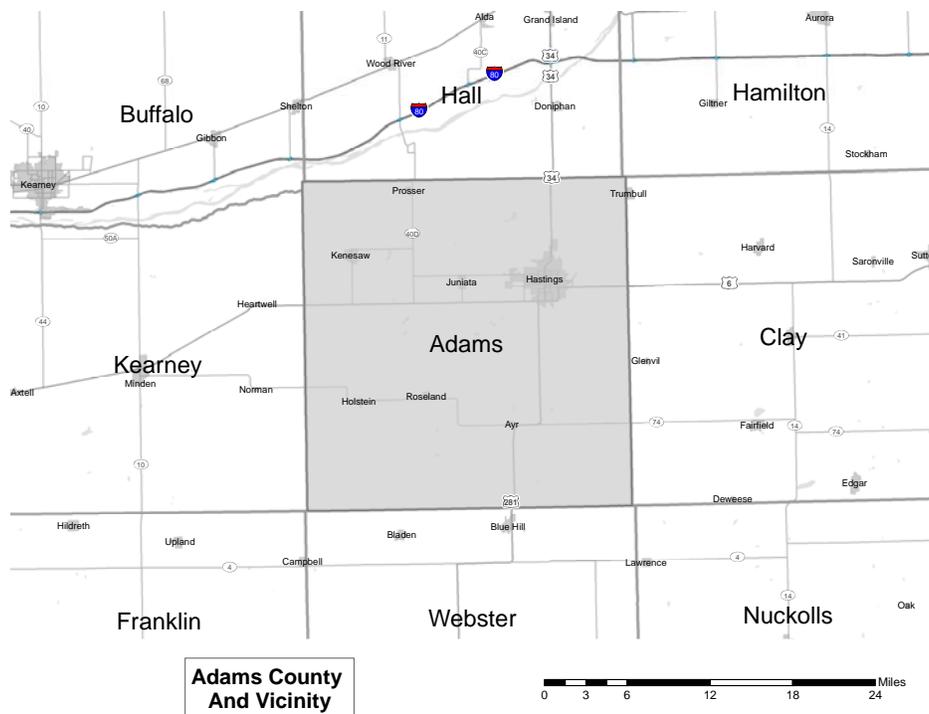

- ◆ One job created in the health care sector of Adams County would lead to the creation of another 0.51 job in other sectors of the county's economy.
- ◆ One dollar of income earned in the health care sector of Adams County would lead to another \$0.29 of income earned in other sectors of the county's economy.
- ◆ One dollar spent in the health care sector of Adams County would lead to another 0.47 spent in other sectors of the county's economy.
- ◆ The overall job creation due to health care (directly and indirectly) in Adams County is estimated at 3,252 jobs, which accounts for 16.9% of the county's total employment.
- ◆ The overall income earned due to health care (directly and indirectly) in Adams County is estimated at \$122.17 million, which accounts for 19.6% of the county's total income.
- ◆ The overall spending due to health care (directly and indirectly) in Adams County is estimated at \$270.40 million, which accounts for 10.9% of the county's total economic output.

## I. GEOGRAPHY

Adams County is located in the South Central region of Nebraska. The county has a total of 563.41 square miles with a population density of 55.3 people per square mile (Nebraska: 22.3 per square mile). The county seat of Adams County is Hastings, Nebraska.

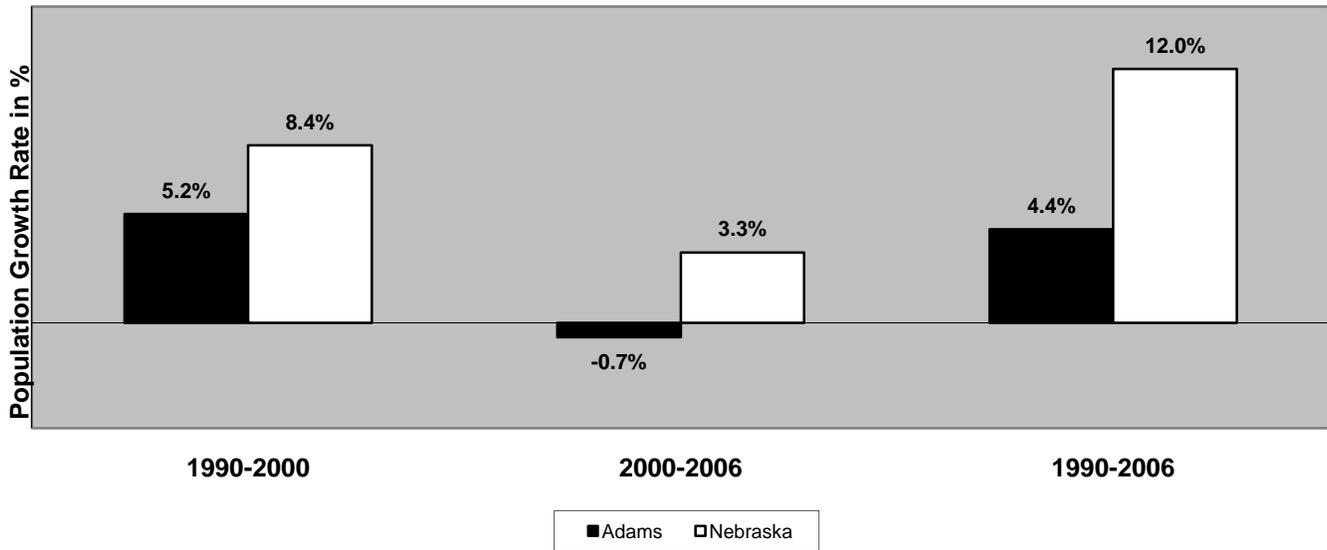

### Adams County, Nebraska

## II. POPULATION

The population for Adams County was 30,939 in 2006. The county experienced a positive population change of 4.4% (compared to +12.0% statewide) during 1990-2006 (Figure 1). The white population represented the majority of county's population in 2006 (95.0% vs. 91.8% statewide, Table 1). In addition, the county's population is older than the state's, with the elderly (aged 65+) representing 15.6% (compared to 13.9% statewide) of the population in 2006 (Table 2).

**Figure 1. Population Growth Rate,  
Adams County and Nebraska, 1990-2006**

Sources: U.S. Bureau of the Census. Census 1990 and Census 2000, Summary Tape File 1. <http://factfinder.census.gov>. 2006 population: 2006 Estimates 2011 project by Geolytics Inc.

**Table 1. Population by Race for Adams County and Nebraska, 2000 and 2006**

	Adams County 2000	Nebraska 2000	Adams County 2006	Nebraska 2006
<b>White</b>	94.5% (29,451)	89.6% (1,533,261)	95.0% (29,392)	91.8% (1,624,120)
<b>Black</b>	0.6% (200)	4.0% (68,541)	0.8% (251)	4.4% (77,379)
<b>American Indian Eskimo and Aleut</b>	0.4% (112)	0.9% (14,896)	0.7% (211)	1.0% (17,276)
<b>Asian or Pacific Islander</b>	1.6% (509)	1.3% (22,204)	2.8% (869)	1.7% (30,454)
<b>Other Race</b>	2.0% (620)	2.8% (47,845)	0.7% (227)	1.1% (20,321)
<b>Hispanic*</b>	4.6% (1,428)	5.5% (94,425)	6.0% (1,862)	7.5% (131,904)

\* Hispanic individuals were allowed to identify race alone or in combination with one or more other races, therefore totals will be more than 100

### III. ECONOMIC IMPACT OF THE HEALTH CARE SECTOR

Manufacturing is the largest employer within Adams County, followed by health care and social assistance, retail trade, accommodation and food services, and educational services. The health care sector of Adams County includes one hospital, nine nursing and residential care facilities, seventy-eight physician, dentist, and other health professional offices, ten other ambulatory health care services, and ten pharmacies.

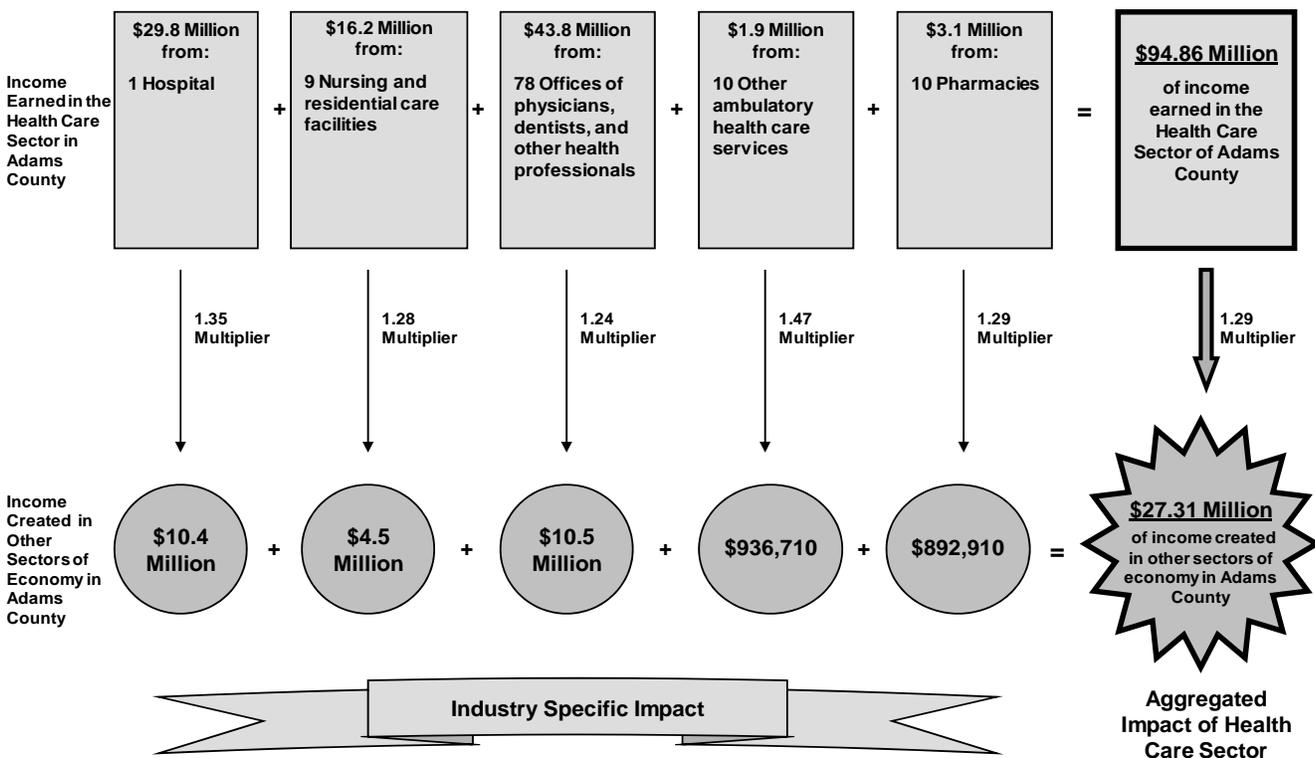

- ◆ The 2,153 jobs in the health care sector of Adams County created (through a 1.51 multiplier) another 1,099 jobs in other sectors of the county's economy (Figure 2). Therefore, the combined effect represents 16.9% of the county's total employment (i.e., 3,252 out of 19,296 jobs).
- ◆ The \$94.86 million of income earned in the health care sector of Adams County has created (through a 1.29 multiplier) another \$27.31 million of income in other sectors of the county's economy (Figure 3). Therefore, the combined effect represents 19.6% of the county's total income (i.e., \$122.17 million out of \$623.91 million).
- ◆ The \$184.38 million spent in the health care sector of Adams County created (through a 1.47 multiplier) another \$86.02 million of spending in other sectors of the county's economy (Figure 4). Therefore, the combined effect represents 10.9% of the county's total economic output (i.e., \$270.40 million out of \$2.49 billion).

#### IV. SOCIO-ECONOMIC INDICATORS

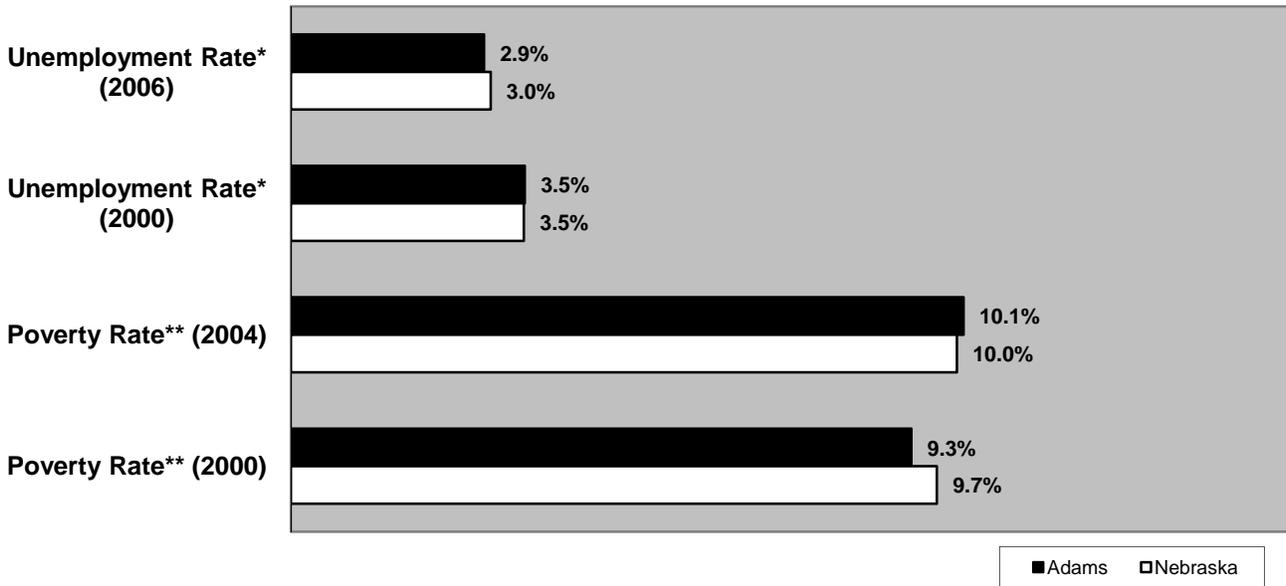

The median household income of the county increased since 2000 by 4.2% to \$38,732 in 2004 (compared to \$42,166 statewide), and the per capita income of the county increased since 2000 by 41.5%, to \$25,904 in 2005 (compared to \$32,923 statewide) (Figure 5). Adams County experienced a similar unemployment rate than the state in 2006 (2.9% vs. 3.0% statewide) and a similar poverty rate than the state in 2004 (10.1% vs. 10.0% statewide) (Figure 6). The county out-performed the state in two of the social indicators shown in Table 3. However, Adams County had a higher percentage of residents aged 25 and older who did not graduate from high school than the state (13.7% vs. 13.4% statewide), and a higher percentage of first births born to unmarried women, younger than 20, with less than a high school education (10.3% vs. 9.0% statewide).

## V. HEALTH STATUS INDICATORS

Adams County had a lower infant mortality rate, unintentional injury death rate, motor vehicle death rate, and overall death rate compared with the state between 2000 and 2004 (Figure 7). Adams County had a lower low-weight birth rate and a higher percentage of pregnant women who reported obtaining prenatal care in the 1<sup>st</sup> trimester, but a higher percentage of pregnant women who smoke when compared to the state (Figure 8). Among the top 5 leading causes of death of Adams County residents, the county had a higher rate of death for heart disease than the state (Figure 9). Among the top 5 leading causes of hospitalization of Adams County residents between 2003 and 2004, the county had a higher hospitalization rate than the state for all causes listed here (Figure 10).

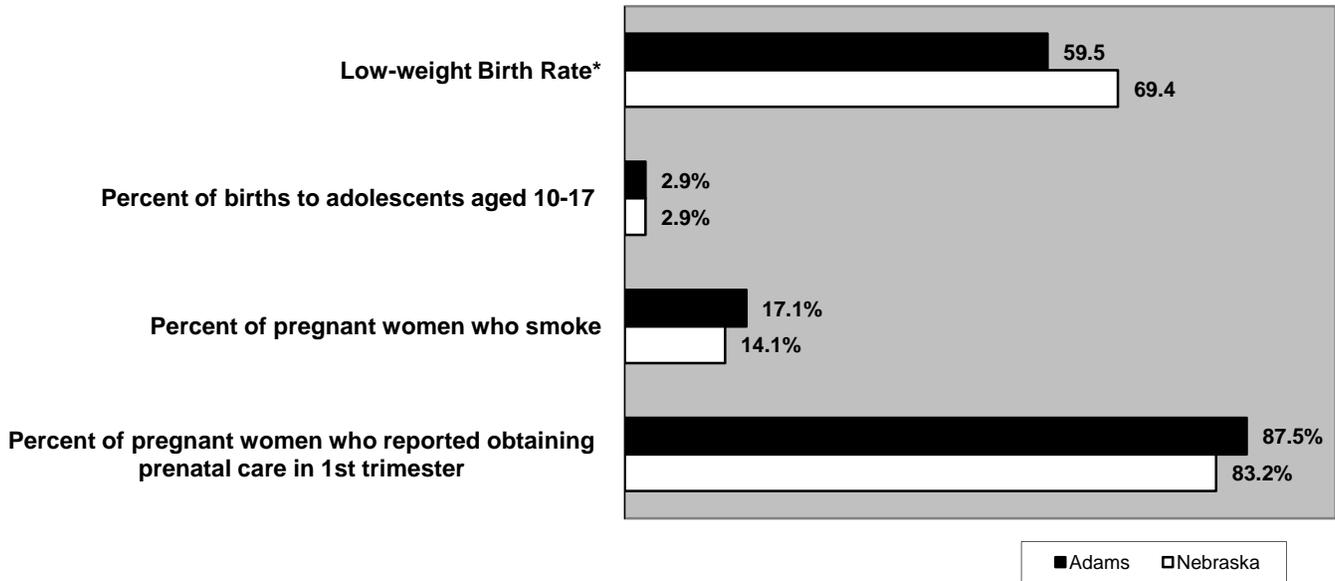

\*Number of deaths per 100,000 populations (age-adjusted).

\*\*Number of deaths per 1,000 live births.

**Figure 10. Top 5 Leading Causes of Hospitalization\* for Adams County and the Corresponding Hospitalization Rates\*\* for the County and Nebraska, 2003-2004**

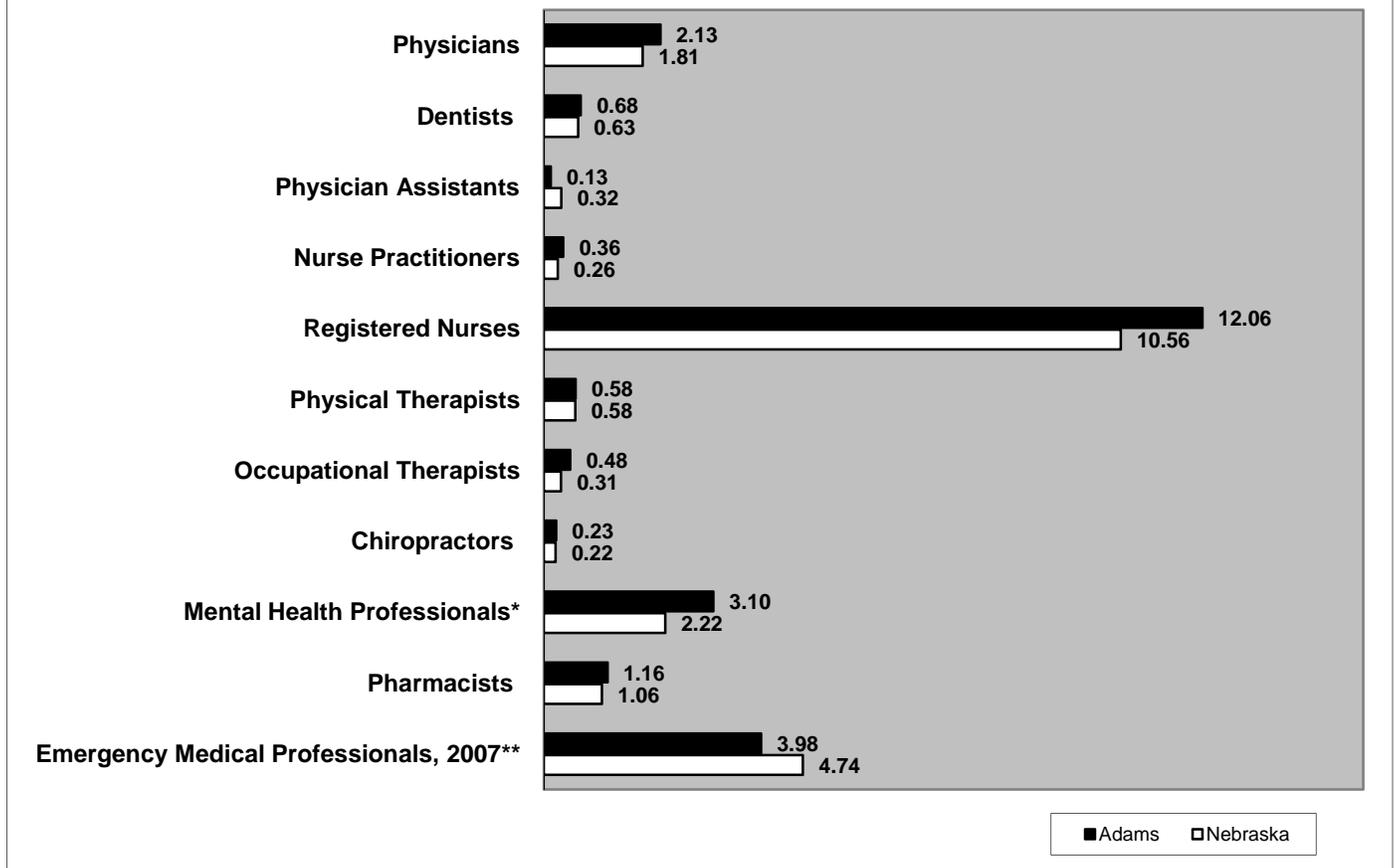

\*Hospitalizations for pregnancy and childbirth were excluded from this analysis.

\*\*Defined as the proportion of inpatient hospital discharges to a population within clearly specified geographic boundaries, age adjusted per 100,000 population. Source: Nebraska Health and Human Services County Profiles. <http://www.hhs.state.ne.us/profiles/index.htm#County>.

## VI. HEALTH CARE PROFESSIONALS

Adams County is federally designated as a mental health professional shortage area. In addition, the Medicaid eligible population in Adams County has been federally designated as a Medically Underserved Population. The state government has designated Adams County as a health professional shortage area in the specialties of general surgery, internal medicine, pediatrics, OB/GYN, and psychiatry. Adams County has a higher professional-to-population ratio than the state for physicians, dentists, nurse practitioners, registered nurses, occupational therapists, chiropractors, mental health professionals, and pharmacists, but the same or lower ratio for other health professionals shown in Figure 11.

**Figure 11. Number of Practicing Health Professionals Per 1,000 Population, Adams County and Nebraska, 2005**

\*Mental Health Professionals include Psychiatrists, Licensed Psychologists, Master Social Workers, Certified Professional Counselors, Licensed Mental Health Practitioners, and Marriage and Family Therapists.  
 \*\* Emergency Medical Professionals include Emergency Medical Technician (EMT) Paramedic, EMT-Intermediate, EMT-Basic, and First Responders.

## VII. HOSPITAL AND LONG-TERM CARE BEDS

Table 4 shows that Adams County’s hospital has a higher bed-to-population ratio than the state. As a result, the need for hospital inpatient care (for the general public) should be met within the county.

**Table 4. Selected Health Care Facility Bed-to-Population Ratios for Adams County and Nebraska**

	Adams County	Nebraska
Number of hospital beds per 1,000 population (2007)	5.59**	3.47*
Number of Long Term Care beds per 1,000 elderly population (65+) 2005	64.1*	73.9*

## Data Notes

Using IMPLAN software and IMPLAN data for Nebraska's five health-related economic subsectors, we predict changes in overall economic activity as a result of change in health care subsectors. The IMPLAN software is based on an economic input-output model. To improve the accuracy of the dataset in order to better estimate health sector impact, we also use information from the U.S. Census Bureau's *County Business Patterns 2006* and the *American Hospital Association Annual Survey Database: Fiscal Year 2006*. Analysis is only performed at the county level.

## Acknowledgments

We would like to thank Dennis Berens, at the Nebraska Office of Rural Health, for his enthusiastic support of the Nebraska Rural Health Works Project. We would also like to thank Nicole Van Osdel at the Nebraska Center for Rural Health Research for making the maps.

## About the Nebraska Rural Health Works Project

The Nebraska Rural Health Works Project is made possible with the financial support of the Nebraska Office of Rural Health and through additional personnel and resources provided by the College of Public Health at the University of Nebraska Medical Center. The brief reports are designed to inform opinion leaders (from general business, health care, and government) in rural communities about the contribution health care makes to the county economy, both directly and indirectly. We use IMPLAN software, which uses an economic input-output model, to predict changes in overall economic activity as a result of change in the health care sector. In addition to the analysis of the economic impact of the health sector on a specific county, other information, such as demographics, socio-economic and health status indicators, health care professionals and facility bed capacity, are reported for a county.

If you would like to view additional County Profiles for Nebraska, please visit our Nebraska Rural Health Works website: <http://www.unmc.edu/rural/NeRHW>.

If you would like additional information regarding Nebraska's health care financing, health professionals, health status and health care delivery systems, visit the Nebraska Health Information Project website: <http://www.unmc.edu/nebraska>.

County Health Economic Profiles can be prepared upon request. At this time, we only perform analysis at the county level. If you are interested in this project, you can request a profile by contacting the Project Director, Li-Wu Chen, Ph.D. ([liwuchen@unmc.edu](mailto:liwuchen@unmc.edu)), or Michelle Mason, M.A. ([mmason@unmc.edu](mailto:mmason@unmc.edu)) at the Nebraska Center for Rural Health Research, College of Public Health, University of Nebraska Medical Center, (402)559-5260.
