Liyan Xu, M.S., Health Data Analyst
Celeste Pierce, Project Assistant

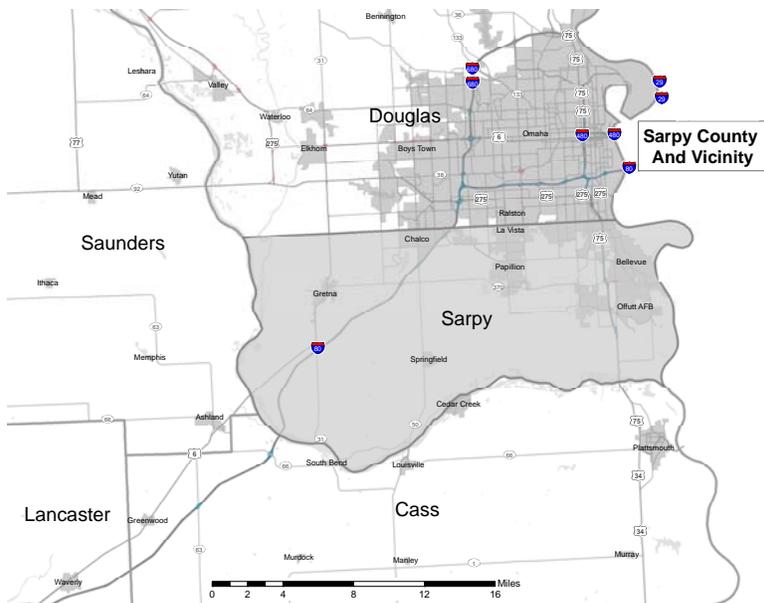

June 2009

Executive Summary on the Economic Impact of the Health Care Sector

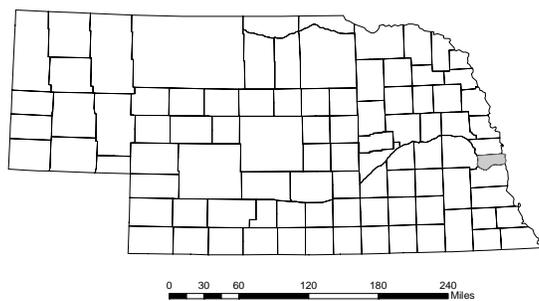

- ◆ One job created in the health care sector of Sarpy County would lead to the creation of another 0.39 job in other sectors of the county's economy.
- ◆ One dollar of income earned in the health care sector of Sarpy County would lead to another \$0.31 of income earned in other sectors of the county's economy.
- ◆ One dollar spent in the health care sector of Sarpy County would lead to another \$0.50 spent in other sectors of the county's economy.
- ◆ The overall job creation due to health care (directly and indirectly) in Sarpy County is estimated at 4,015 jobs, which accounts for 5.5% of the county's total employment.
- ◆ The overall income earned due to health care (directly and indirectly) in Sarpy County is estimated at \$150.3 million, which accounts for 4.5% of the county's total income.
- ◆ The overall spending due to health care (directly and indirectly) in Sarpy County is estimated at \$338.1 million, which accounts for 4.2% of the county's total economic output.

I. GEOGRAPHY

Sarpy County is located centrally in the Eastern border of Nebraska. The county has a total of 240.52 square miles with a population density of 508.7 people per square mile (Nebraska: 22.3 per square mile). The county seat of Sarpy County is Papillion, Nebraska.

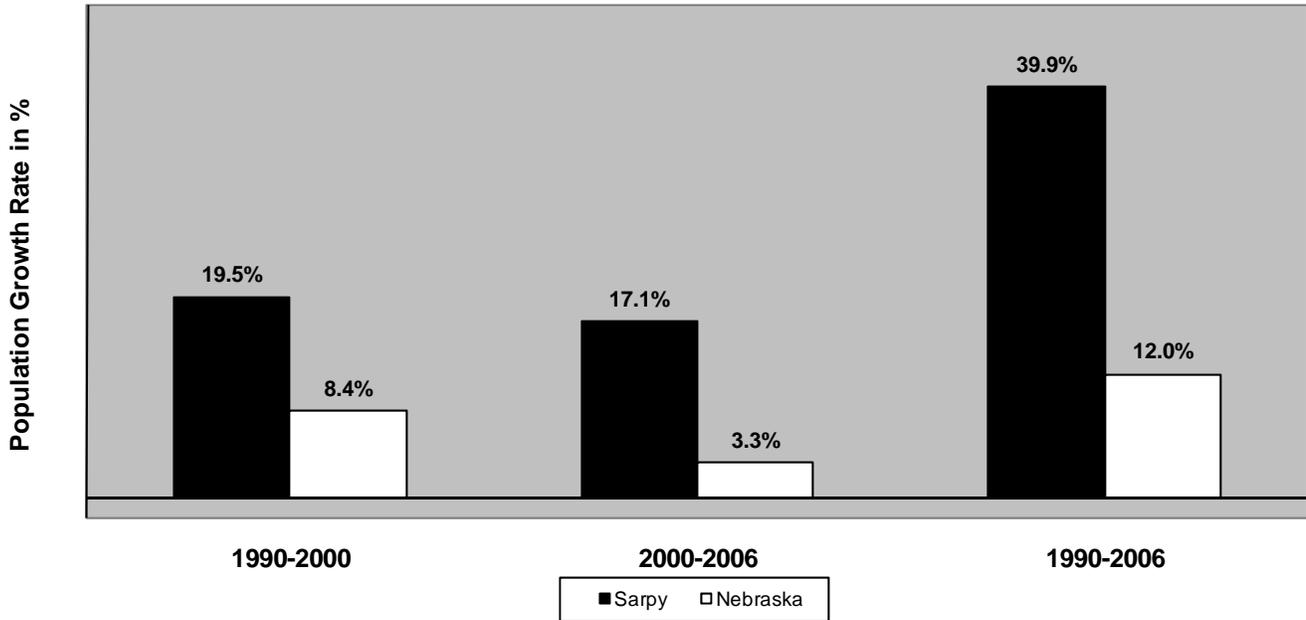

Sarpy County, Nebraska

II. POPULATION

The population for Sarpy County was 143,580 in 2006. The county experienced a positive population change of 39.9% (compared to +12.0% statewide) during 1990-2006 (Figure 1). The white population represented the majority of county's population in 2006 (91.3% vs. 91.8% statewide, Table 1). In addition, the county's population is younger than the state's, with the elderly (aged 65+) representing 8.3% (compared to 13.9% statewide) of the population in 2006 (Table 2).

Table 1. Population by Race for Sarpy County and Nebraska, 2000 and 2006

	Sarpy County 2000	Nebraska 2000	Sarpy County 2006	Nebraska 2006
White	89.2% (109,335)	89.6% (1,533,261)	91.3% (131,078)	91.8% (1,624,120)
Black	4.4% (5,340)	4.0% (68,541)	3.9% (5,558)	4.4% (77,379)
American Indian Eskimo and Aleut	0.4% (515)	0.9% (14,896)	0.5% (677)	1.0% (17,276)
Asian or Pacific Islander	2.0% (2,439)	1.3% (22,204)	2.3% (3,346)	1.7% (30,454)
Other Race	1.9% (2,275)	2.8% (47,845)	2.0% (2,934)	1.1% (20,321)
Hispanic*	4.4% (5,358)	5.5% (94,425)	5.4% (7,710)	7.5% (131,904)

* Hispanic individuals were allowed to identify race alone or in combination with one or more other races, therefore totals will be more than 100

Table 2. Population by Age for Sarpy County and Nebraska, 2000 and 2006

Age	Sarpy County 2000	Nebraska 2000	Sarpy County 2006	Nebraska 2006
0-4	8.2% (10,112)	6.8% (117,048)	8.3% (11,922)	7.1% (125,258)
5-24	31.6% (38,772)	29.7% (507,619)	30.7% (44,053)	28.0% (495,930)
25-64	53.5% (65,588)	49.9% (854,401)	52.7% (75,691)	51.1% (903,564)
65-84	6.0% (7,392)	11.6% (198,242)	7.5% (10,704)	11.5% (202,653)
85+	0.6% (731)	2.0% (33,953)	0.8% (1,202)	2.4% (42,308)
TOTAL	100.0% (122,595)	100.0% (1,711,263)	100.0% (143,580)	100.0% (1,768,331)

III. ECONOMIC IMPACT OF THE HEALTH CARE SECTOR

Retail trade is the largest employer within Sarpy County, followed by professional, scientific and technical services, construction, health care and social assistance, and accommodation and food services. The health care sector of Sarpy County includes two hospitals, fourteen nursing and residential care facilities, one hundred fourteen physician, dentist, and other health professional offices, thirteen other ambulatory health care services, and twenty-eight pharmacies.

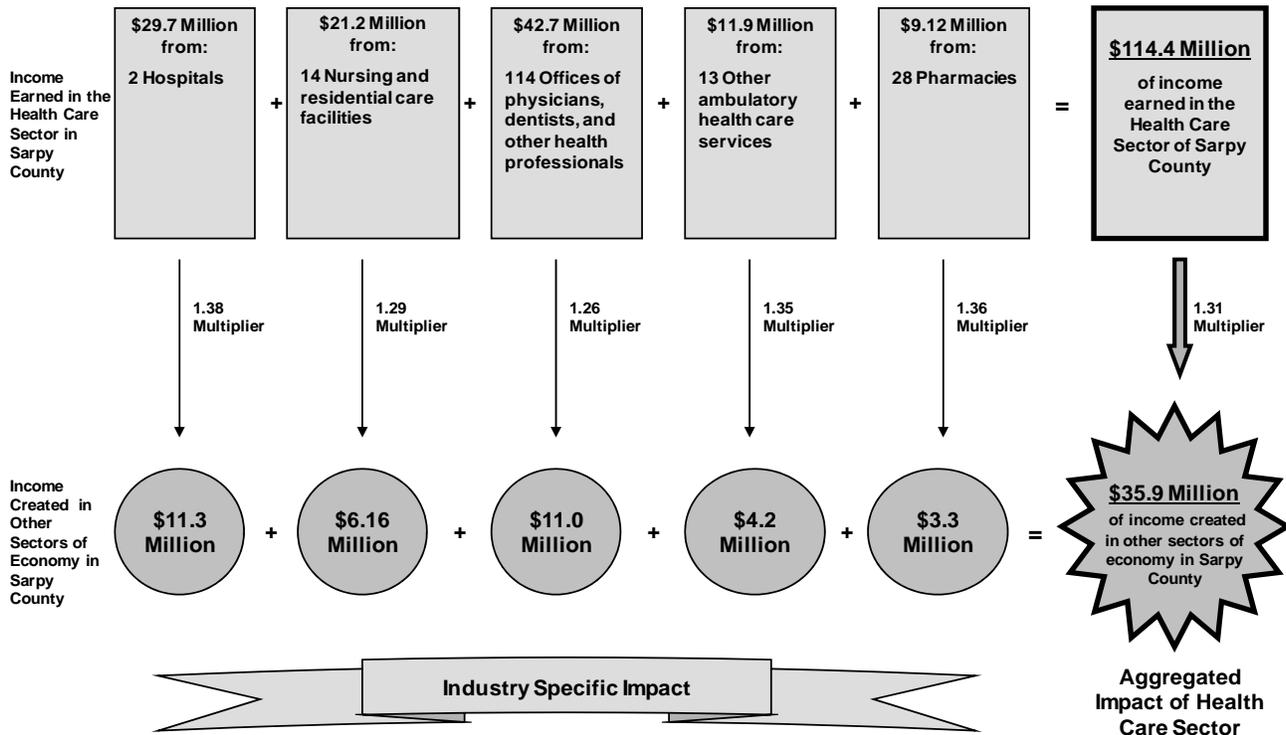

- ◆ The 2,890 jobs in the health care sector of Sarpy County created (through a 1.39 multiplier) another 1,125 jobs in other sectors of the county's economy (Figure 2). Therefore, the combined effect represents 5.5% of the county's total employment (i.e., 4,015 out of 73,693 jobs).
- ◆ The \$114.4 million of income earned in the health care sector of Sarpy County has created (through a 1.31 multiplier) another \$35.9 million of income in other sectors of the county's economy (Figure 3). Therefore, the combined effect represents 4.5% of the county's total income (i.e., \$150.3 million out of \$3.3 billion).
- ◆ The \$225.5 million spent in the health care sector of Sarpy County created (through a 1.50 multiplier) another \$112.6 million of spending in other sectors of the county's economy (Figure 4). Therefore, the combined effect represents 4.2% of the county's total economic output (i.e., \$338.1 million out of \$7.9 billion).

IV. SOCIO-ECONOMIC INDICATORS

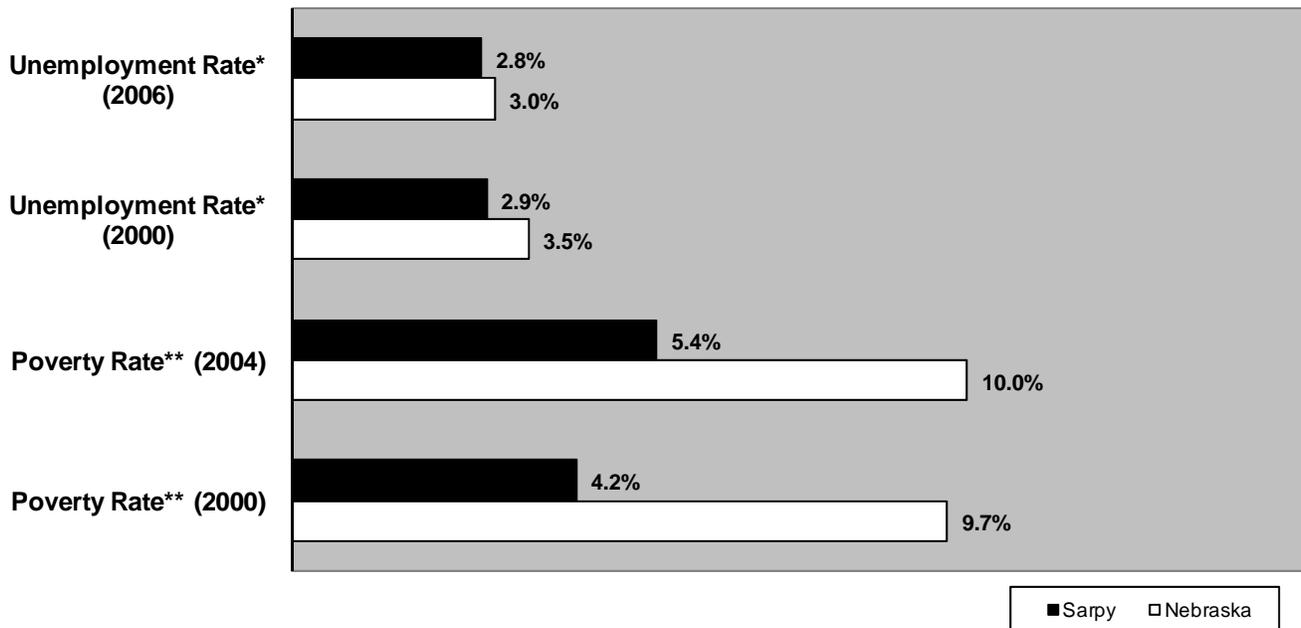

The median household income of the county increased since 2000 by 11.5% to \$60,782 in 2004 (compared to \$42,166 statewide), and the per capita income of the county increased since 2000 by 33%, to \$32,657 in 2005 (compared to \$32,923 statewide) (Figure 5). Sarpy County experienced a slightly lower unemployment rate than the state in 2006 (2.8% vs. 3.0% statewide) and also a lower poverty rate than the state in 2004 (5.4% vs. 10.0% statewide) (Figure 6). The county out-performed the state in all four of the social indicators shown in Table 3.

Table 3. Selected Social Indicators for Sarpy County and Nebraska

	Sarpy County	Nebraska
Percent of residents aged 25 and older who did not graduate from high school (2000)	6.7%	13.4%
Percent of 7-12th graders who dropped out of school (2003-2004)	0.6%	1.9%
Percent of first births born to unmarried women, younger than 20, with less than a high school education (2000-2004)	4.3%	9.0%
Crime arrest rate per 1,000 population (2004)	42.6	54.2

V. HEALTH STATUS INDICATORS

Sarpy County had a lower infant mortality rate, unintentional injury death rate, and motor vehicle death rate compared with the state between 2000 and 2004, but had a higher overall death rate (Figure 7). Sarpy County out-performed the state in selected maternal and child health indicators with a lower low-weight birth rate, a lower percentage of pregnant women who smoke, a lower percentage of births to adolescents aged 10-17, and a higher percentage of pregnant women who reported obtaining prenatal care in the 1st trimester when compared to the state (Figure 8). Among the top 5 leading causes of death of Sarpy County residents, the county had a higher rate of death for heart disease, cerebrovascular disease and chronic lung disease than the state (Figure 9). Among the top 5 leading causes of hospitalization of Sarpy County residents between 2003 and 2004, the county had a higher hospitalization rate than the state for heart disease (Figure 10).

Figure 7. Selected Mortality Rates for Sarpy County and Nebraska, 2000-2004

Figure 10. Top 5 Leading Causes of Hospitalization* for Sarpy County and the Corresponding Hospitalization Rates for the County and Nebraska, 2003-2004**

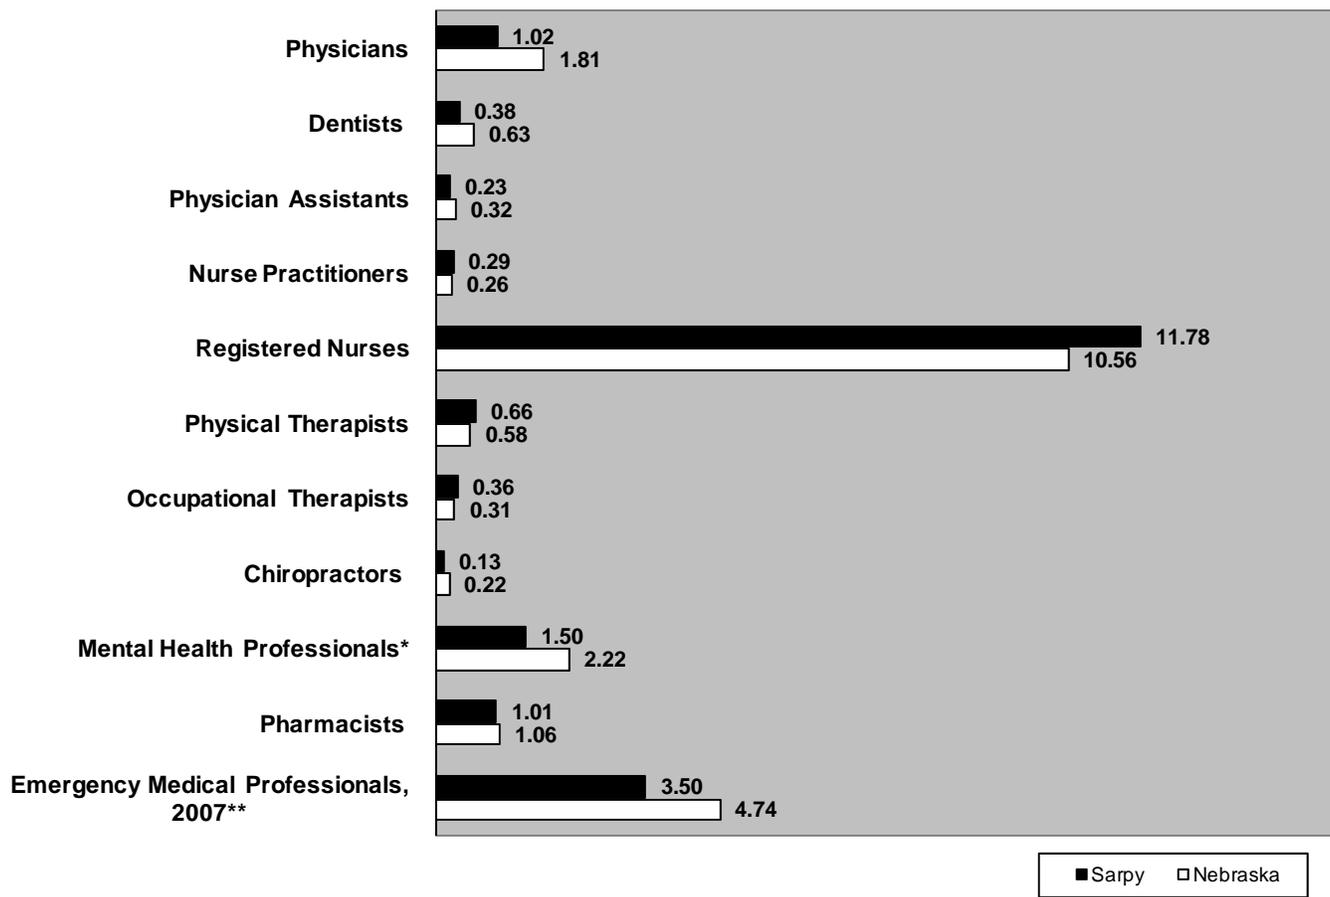

*Hospitalizations for pregnancy and childbirth were excluded from this analysis.

**Defined as the proportion of inpatient hospital discharges to a population within clearly specified geographic boundaries, age adjusted per 100,000 population.
 Source: Nebraska Health and Human Services County Profiles. <http://www.hhs.state.ne.us/profiles/index.htm#County>.

VI. HEALTH CARE PROFESSIONALS

Sarpy County has no federal or state designations for health professional shortage areas. However, Sarpy County has a lower professional-to-population ratio than the state for physicians, dentists, physician assistants, chiropractors, mental health professionals, pharmacists, and emergency medical professionals (Figure 11).

Figure 11. Number of Practicing Health Professionals Per 1,000 Population, Sarpy County and Nebraska, 2005

*Mental Health Professionals include Psychiatrists, Licensed Psychologists, Master Social Workers, Certified Professional Counselors, Licensed Mental Health Practitioners, and Marriage and Family Therapists.
 ** Emergency Medical Professionals include Emergency Medical Technician (EMT) Paramedic, EMT-Intermediate, EMT-Basic, and First Responders.
 Source: *The Nebraska Health Information Project: 2006 Databook*. (2007) Nebraska Center for Rural Health Research, University of Nebraska Medical Center

VII. HOSPITAL AND LONG-TERM CARE BEDS

Table 4 shows that Sarpy County has a lower bed-to-population ratios than the state. As a result, the need for hospital inpatient beds (for the general public) and long term care beds (for the elderly) may not be met within the county.

Table 4. Selected Health Care Facility Bed-to-Population Ratios for Sarpy County and Nebraska

	Sarpy County	Nebraska
Number of hospital beds per 1,000 population (2007)	0.84**	3.47*
Number of Long Term Care beds per 1,000 elderly population (65+) 2005	39.6*	73.9*

Data Notes

Using IMPLAN software and IMPLAN data for Nebraska's five health-related economic subsectors, we predict changes in overall economic activity as a result of change in health care subsectors. The IMPLAN software is based on an economic input-output model. To improve the accuracy of the dataset in order to better estimate health sector impact, we also use information from the U.S. Census Bureau's *County Business Patterns 2006* and the *American Hospital Association Annual Survey Database: Fiscal Year 2006*. Analysis is only performed at the county level.

Acknowledgments

We would like to thank Dennis Berens, at the Nebraska Office of Rural Health, for his enthusiastic support of the Nebraska Rural Health Works Project. We would also like to thank Nicole Van Osdel at the Nebraska Center for Rural Health Research for making the maps.

About the Nebraska Rural Health Works Project

The Nebraska Rural Health Works Project is made possible with the financial support of the Nebraska Office of Rural Health and through additional personnel and resources provided by the College of Public Health at the University of Nebraska Medical Center. The brief reports are designed to inform opinion leaders (from general business, health care, and government) in rural communities about the contribution health care makes to the county economy, both directly and indirectly. We use IMPLAN software, which uses an economic input-output model, to predict changes in overall economic activity as a result of change in the health care sector. In addition to the analysis of the economic impact of the health sector on a specific county, other information, such as demographics, socio-economic and health status indicators, health care professionals and facility bed capacity, are reported for a county.

If you would like to view additional County Profiles for Nebraska, please visit our Nebraska Rural Health Works website: <http://www.unmc.edu/rural/NeRHW>.

If you would like additional information regarding Nebraska's health care financing, health professionals, health status and health care delivery systems, visit the Nebraska Health Information Project website: <http://www.unmc.edu/nebraska>.

County Health Economic Profiles can be prepared upon request. At this time, we only perform analysis at the county level. If you are interested in this project, you can request a profile by contacting the Project Director, Li-Wu Chen, Ph.D. (liwuchen@unmc.edu), or Michelle Lampman, M.A. (mlampman@unmc.edu) at the Nebraska Center for Rural Health Research, College of Public Health, University of Nebraska Medical Center, (402)559-5260.
