

Nebraska Rural Health Works Health Economic Profile for Box Butte County, Nebraska

Prepared by
Li-Wu Chen, Ph.D., Project Director
Michelle Lampman, M.A., Health Data Analyst
Liyan Xu, M.S., Health Data Analyst
Celeste Pierce, Project Assistant

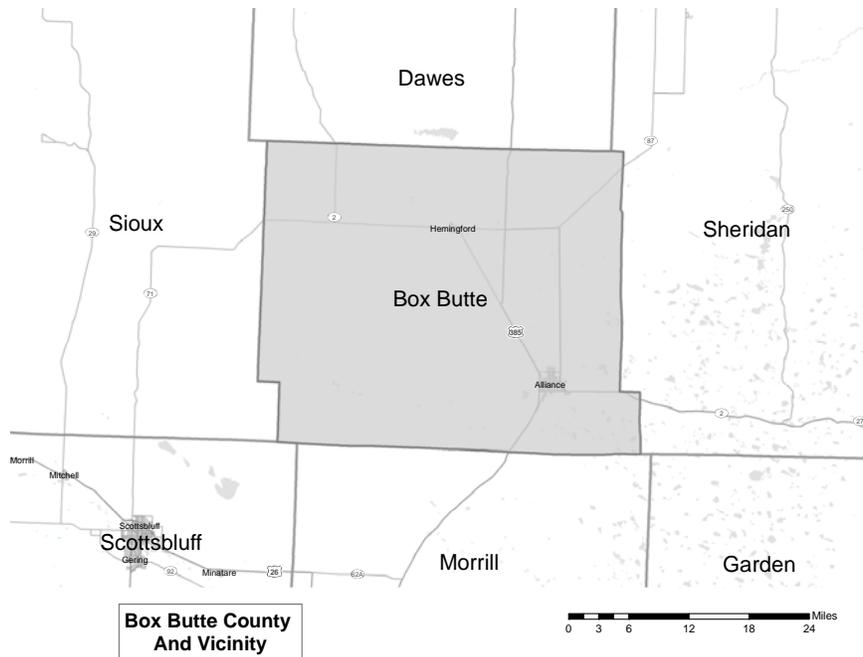

June 2009

Executive Summary on the Economic Impact of the Health Care Sector

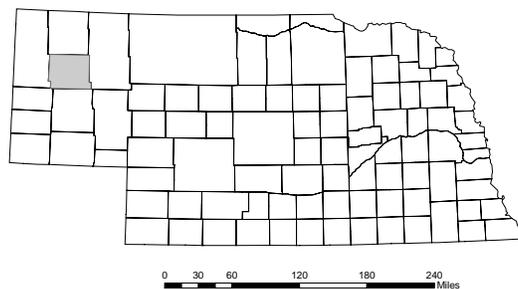

- ◆ One job created in the health care sector of Box Butte County would lead to the creation of another 0.31 job in other sectors of the county's economy.
- ◆ One dollar of income earned in the health care sector of Box Butte County would lead to another \$0.23 of income earned in other sectors of the county's economy.
- ◆ One dollar spent in the health care sector of Box Butte County would lead to another \$0.37 spent in other sectors of the county's economy.
- ◆ The overall job creation due to health care (directly and indirectly) in Box Butte County is estimated at 799 jobs, which accounts for 10.9% of the county's total employment.
- ◆ The overall income earned due to health care (directly and indirectly) in Box Butte County is estimated at \$23.1 million, which accounts for 7.9% of the county's total income.
- ◆ The overall spending due to health care (directly and indirectly) in Box Butte County is estimated at \$56.2 million, which accounts for 6.2% of the county's total economic output.

I. GEOGRAPHY

Box Butte County is located in the panhandle region of Nebraska. The county has a total of 1,075.29 square miles with a population density of 11.3 people per square mile (Nebraska: 22.3 per square mile). The county seat of Box Butte County is Alliance, Nebraska.

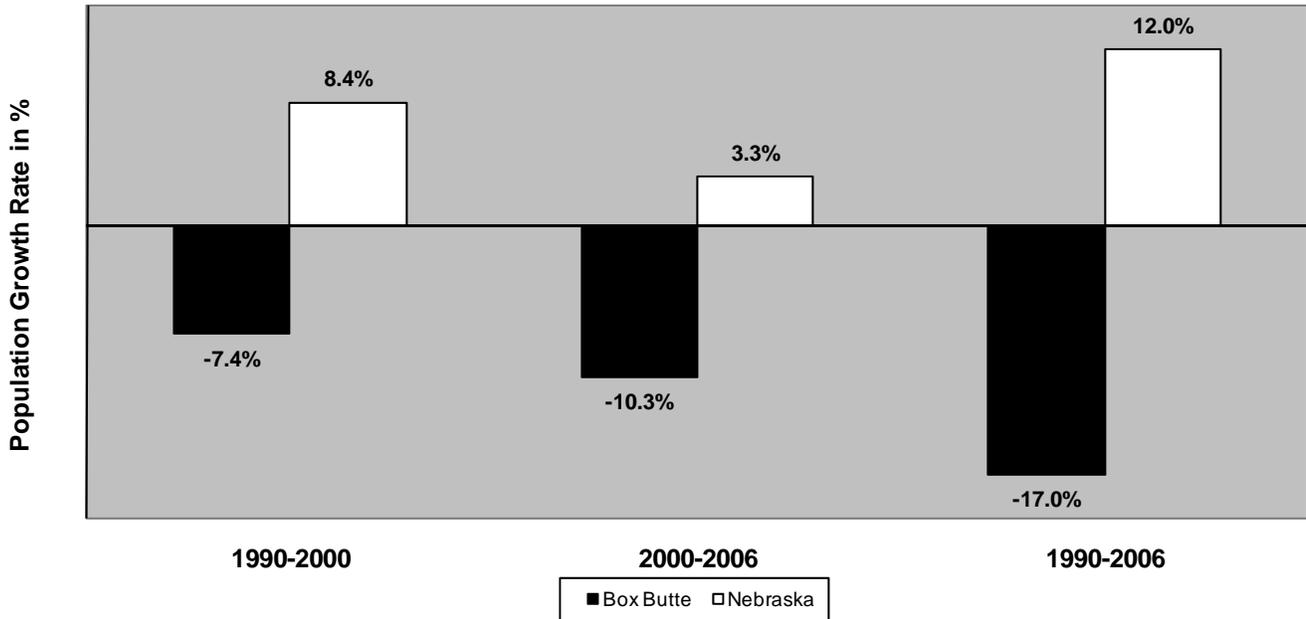

Box Butte County, Nebraska

II. POPULATION

The population for Box Butte County was 10,904 in 2006. The county experienced a negative population change of 17.0% (compared to +12.0% statewide) during 1990-2006 (Figure 1). The white population represented the majority of county's population in 2006 (93.7% vs. 91.8% statewide, Table 1). In addition, the county's population is slightly older than the state's, with the elderly (aged 65+) representing 14.2% (compared to 13.9% statewide) of the population in 2006 (Table 2).

III. ECONOMIC IMPACT OF THE HEALTH CARE SECTOR

Health care and social assistance is the largest employer within Box Butte County, followed by retail trade, manufacturing, accommodation and food services, and other services. The health care sector of Box Butte County includes one hospital, four nursing and residential care facilities, four physician offices, three dentist offices, three chiropractor offices, two optometry offices, two outpatient care centers, and three pharmacies.

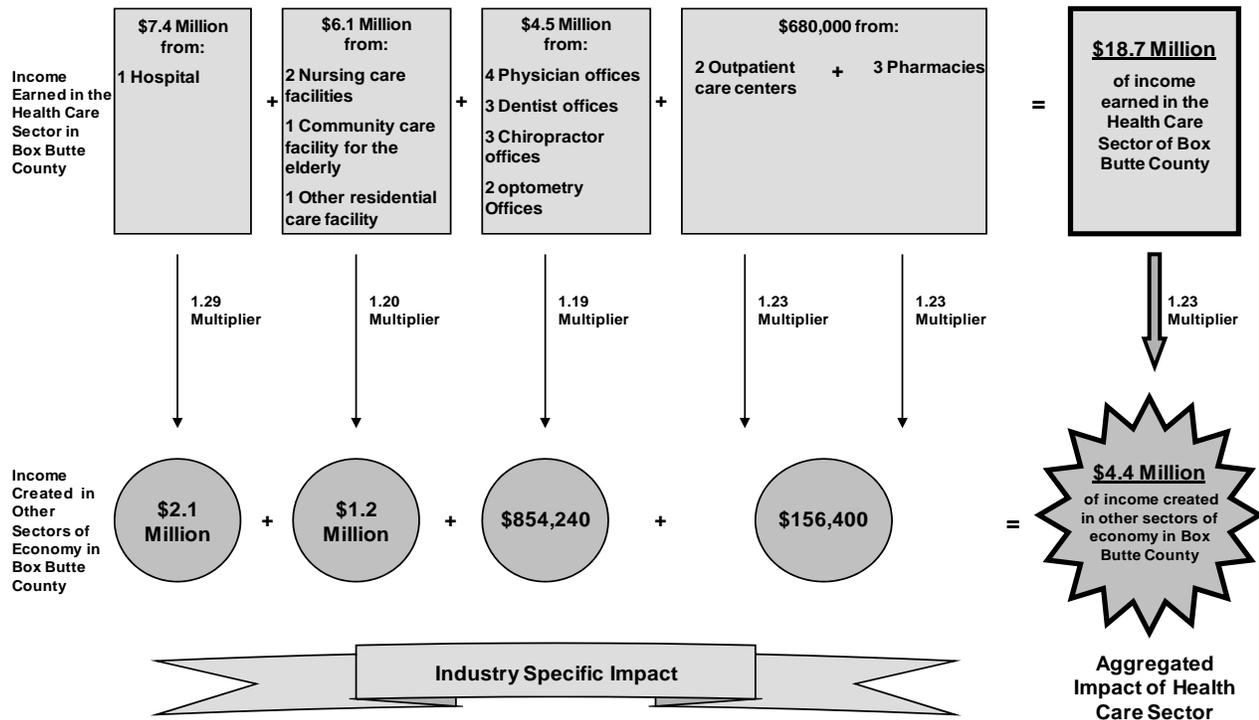

- ◆ The 609 jobs in the health care sector of Box Butte County created (through a 1.31 multiplier) another 190 jobs in other sectors of the county's economy (Figure 2). Therefore, the combined effect represents 10.9% of the county's total employment (i.e., 799 out of 7,303 jobs).
- ◆ The \$18.7 million of income earned in the health care sector of Box Butte County has created (through a 1.23 multiplier) another \$4.4 million of income in other sectors of the county's economy (Figure 3). Therefore, the combined effect represents 7.9% of the county's total income (i.e., \$23.1 million out of \$292.0 million).
- ◆ The \$40.9 million spent in the health care sector of Box Butte County created (through a 1.37 multiplier) another \$15.3 million of spending in other sectors of the county's economy (Figure 4). Therefore, the combined effect represents 6.2% of the county's total economic output (i.e., \$56.2 million out of \$914.7 million).

IV. SOCIO-ECONOMIC INDICATORS

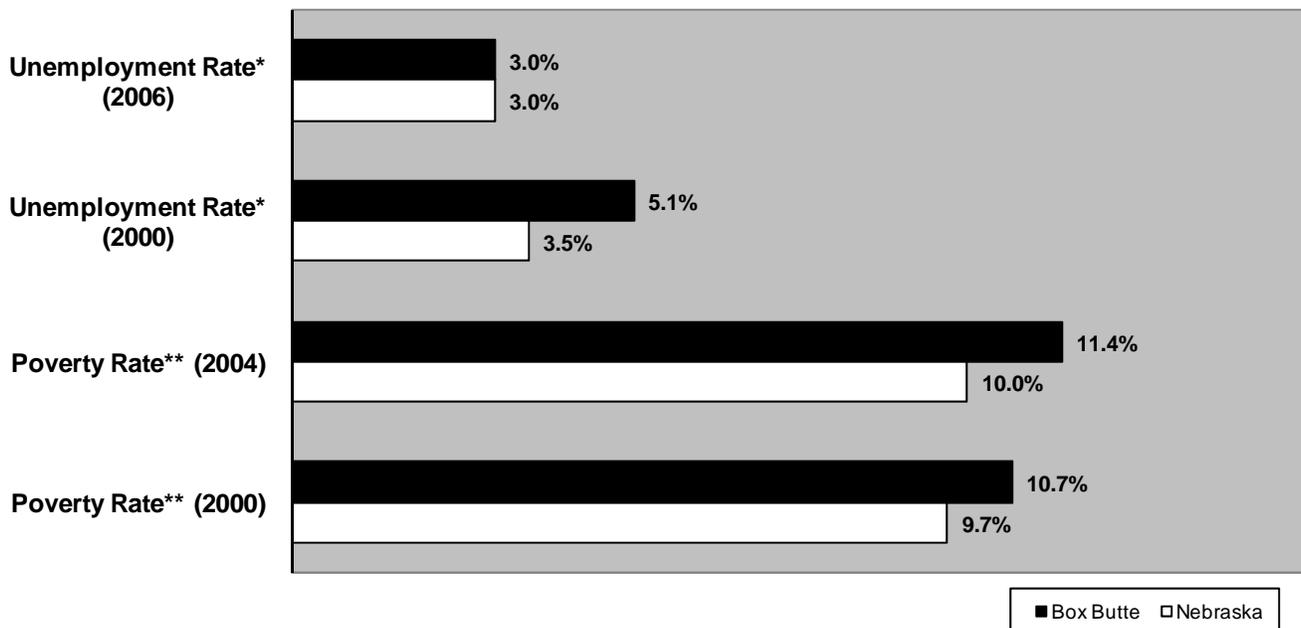

The median household income of the county increased since 2000 by 6.2% to \$41,980 in 2004 (compared to \$42,166 statewide), and the per capita income of the county increased since 2000 by 36.6%, to \$29,023 in 2005 (compared to \$32,923 statewide) (Figure 5). Box Butte County has experienced a decline in the unemployment rate since 2000 to the same unemployment rate as the state in 2006 (5.6% in 2000 to 3.0% in 2006). However, Box Butte County continued to have a higher poverty rate than the state in 2004 (11.4% vs. 10.0% statewide) (Figure 6). The county outperformed the state in three of the four social indicators shown in Table 3, with a lower percentage of residents aged 25 and older who did not graduate from high school, a lower percentage of 7-12th graders who dropped out of high school, and a lower percentage of first births to unmarried women who were under the age of 20, with less than a high school education.

V. HEALTH STATUS INDICATORS

Box Butte County had a lower infant mortality rate compared with the state between 2000 and 2004 (Figure 7). Box Butte County out-performed the state in three of the four selected maternal and child health indicators with a lower low-weight birth rate, a lower percentage of births to adolescents aged 10-17, and a higher percentage of pregnant women who reported obtaining prenatal care in the 1st trimester compared to the state (Figure 8). Among the top 5 leading causes of death of Box Butte County residents, the county had a higher death rate than the state for all five leading causes (Figure 9). Among the top 5 leading causes of hospitalization of Box Butte County residents between 2003 and 2004, the county had a higher hospitalization rate than the state for all injuries, diabetes related diseases, digestive diseases, and pneumonia (Figure 10).

VI. HEALTH CARE PROFESSIONALS

Box Butte County is federally designated as a mental health professional shortage area. The state government has designated Box Butte County as a health professional shortage area in the specialties of family practice, general surgery, internal medicine, pediatrics, OB/GYN, dental/oral surgery, pharmacy, occupational therapy, and mental health. Box Butte County has a lower professional-to-population than the state for all professions listed except physician assistants and EMS professionals, as shown in Figure 11.

Figure 11. Number of Practicing Health Professionals Per 1,000 Population, Box Butte County and Nebraska, 2005

*Mental Health Professionals include Psychiatrists, Licensed Psychologists, Master Social Workers, Certified Professional Counselors, Licensed Mental Health Practitioners, and Marriage and Family Therapists.
 ** Emergency Medical Professionals include Emergency Medical Technician (EMT) Paramedic, EMT-Intermediate, EMT-Basic, and First Responders.

VII. HOSPITAL AND LONG-TERM CARE BEDS

Table 4 shows that Box Butte County’s hospital has a lower bed-to-population ratio than the state. As a result, the need for inpatient hospital care (for the general public) may not be completely met within the county.

Table 4. Selected Health Care Facility Bed-to-Population Ratios for Box Butte County and Nebraska

	Box Butte County	Nebraska
Number of hospital beds per 1,000 population (2007)	2.29**	3.47*
Number of Long Term Care beds per 1,000 elderly population (65+) 2005	98.10*	73.9*

Data Notes

Using IMPLAN software and IMPLAN data for Nebraska's five health-related economic subsectors, we predict changes in overall economic activity as a result of change in health care subsectors. The IMPLAN software is based on an economic input-output model. To improve the accuracy of the dataset in order to better estimate health sector impact, we also use information from the U.S. Census Bureau's *County Business Patterns 2006* and the *American Hospital Association Annual Survey Database: Fiscal Year 2006*. Analysis is only performed at the county level.

Acknowledgments

We would like to thank Dennis Berens, at the Nebraska Office of Rural Health, for his enthusiastic support of the Nebraska Rural Health Works Project. We would also like to thank Nicole Van Osdel at the Nebraska Center for Rural Health Research for making the maps.

About the Nebraska Rural Health Works Project

The Nebraska Rural Health Works Project is made possible with the financial support of the Nebraska Office of Rural Health and through additional personnel and resources provided by the College of Public Health at the University of Nebraska Medical Center. The brief reports are designed to inform opinion leaders (from general business, health care, and government) in rural communities about the contribution health care makes to the county economy, both directly and indirectly. We use IMPLAN software, which uses an economic input-output model, to predict changes in overall economic activity as a result of change in the health care sector. In addition to the analysis of the economic impact of the health sector on a specific county, other information, such as demographics, socio-economic and health status indicators, health care professionals and facility bed capacity, are reported for a county.

If you would like to view additional County Profiles for Nebraska, please visit our Nebraska Rural Health Works website: <http://www.unmc.edu/rural/NeRHW>.

If you would like additional information regarding Nebraska's health care financing, health professionals, health status and health care delivery systems, visit the Nebraska Health Information Project website: <http://www.unmc.edu/nebraska>.

County Health Economic Profiles can be prepared upon request. At this time, we only perform analysis at the county level. If you are interested in this project, you can request a profile by contacting the Project Director, Li-Wu Chen, Ph.D. (liwuchen@unmc.edu), or Michelle Lampman, M.A. (mlampman@unmc.edu) at the Nebraska Center for Rural Health Research, College of Public Health, University of Nebraska Medical Center, (402)559-5260.
