

Nebraska Rural Health Works Health Economic Profile for Dawson County, Nebraska

Prepared by
Li-Wu Chen, Ph.D., Project Director
Michelle Lampman, M.A., Health Data Analyst
Liyan Xu, M.S., Health Data Analyst
Celeste Pierce, Project Assistant

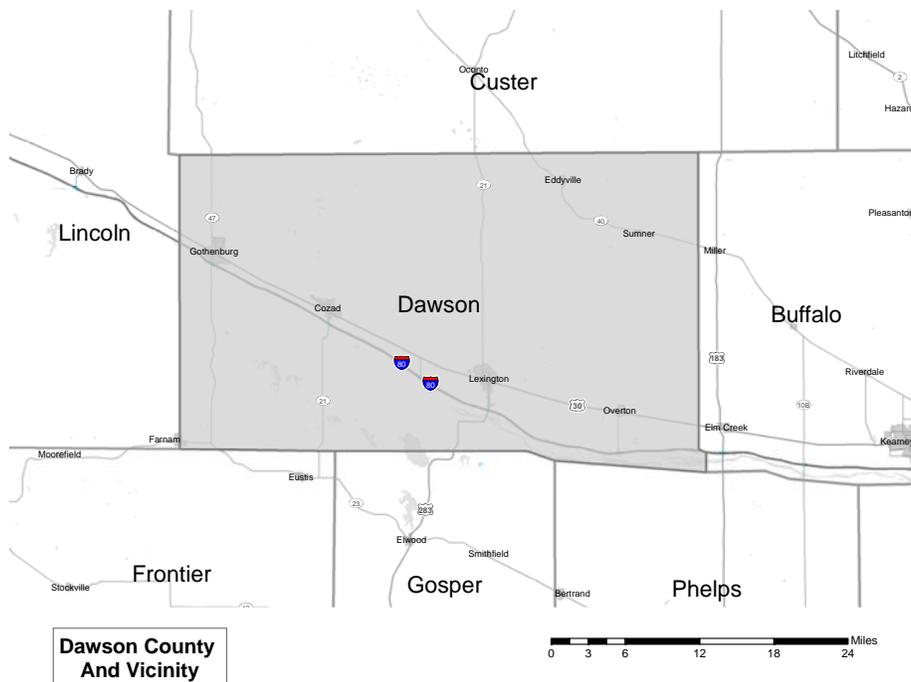

June 2009

Executive Summary on the Economic Impact of the Health Care Sector

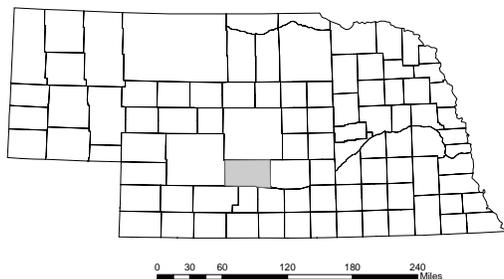

- ◆ One job created in the health care sector of Dawson County would lead to the creation of another 0.32 job in other sectors of the county's economy.
- ◆ One dollar of income earned in the health care sector of Dawson County would lead to another \$0.24 of income earned in other sectors of the county's economy.
- ◆ One dollar spent in the health care sector of Dawson County would lead to another \$0.37 spent in other sectors of the county's economy.
- ◆ The overall job creation due to health care (directly and indirectly) in Dawson County is estimated at 1,287 jobs, which accounts for 8.9% of the county's total employment.
- ◆ The overall income earned due to health care (directly and indirectly) in Dawson County is estimated at \$39.2 million, which accounts for 8.1% of the county's total income.
- ◆ The overall spending due to health care (directly and indirectly) in Dawson County is estimated at \$94.8 million, which accounts for 3.7% of the county's total economic output.

I. GEOGRAPHY

Dawson County is located in central Nebraska. The county has a total of 1,012.92 square miles with a population density of 24.1 people per square mile (Nebraska: 22.3 per square mile). The county seat of Dawson County is Lexington, Nebraska.

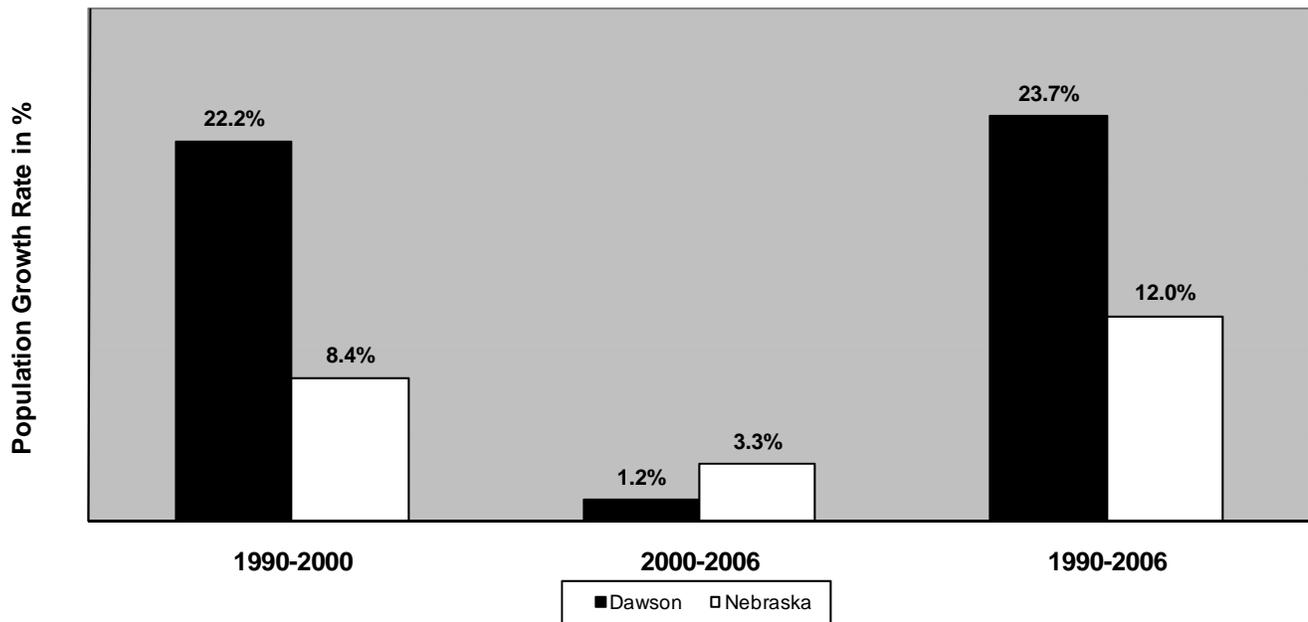

Dawson County, Nebraska

II. POPULATION

The population for Dawson County was 24,663 in 2006. The county experienced a positive population change of 23.7% (compared to +12.0% statewide) during 1990-2006 (Figure 1). The white population represented the majority of county's population in 2006 (96.3% vs. 91.8% statewide). In addition, the percentage of population reporting a Hispanic origin is much higher in Dawson County than the state overall (30.5% vs. 7.5% statewide, Table 1). Dawson County's population is slightly older than the state's, with the elderly (aged 65+) representing 15.6% (compared to 13.9% statewide) of the population in 2006 (Table 2).

Sources: U.S. Bureau of the Census. Census 1990 and Census 2000, Summary Tape File 1. <http://factfinder.census.gov>. 2006 population: 2006 Estimates 2011 project by Geolytics Inc.

Table 1. Population by Race for Dawson County and Nebraska, 2000 and 2006

	Dawson County 2000	Nebraska 2000	Dawson County 2006	Nebraska 2006
White	82.3% (20,058)	89.6% (1,533,261)	96.3% (23,749)	91.8% (1,624,120)
Black	0.3% (76)	4.0% (68,541)	1.5% (370)	4.4% (77,379)
American Indian Eskimo and Aleut	0.7% (164)	0.9% (14,896)	0.9% (226)	1.0% (17,276)
Asian or Pacific Islander	0.7% (164)	1.3% (22,204)	0.8% (207)	1.7% (30,454)
Other Race	14.5% (3,530)	2.8% (47,845)	0.5% (114)	1.1% (20,321)
Hispanic*	25.4% (6,178)	5.5% (94,425)	30.5% (7,519)	7.5% (131,904)

* Hispanic individuals were allowed to identify race alone or in combination with one or more other races, therefore totals will be more than 100

Table 2. Population by Age for Dawson County and Nebraska, 2000 and 2006

Age	Dawson County 2000	Nebraska 2000	Dawson County 2006	Nebraska 2006
0-4	8.4% (2,043)	6.8% (117,048)	8.1% (2,006)	7.1% (125,258)
5-24	29.2% (7,125)	29.7% (507,619)	28.8% (7,095)	28.0% (495,930)
25-64	48.2% (11,754)	49.9% (854,401)	47.5% (11,723)	51.1% (903,564)
65-84	12.0% (2,930)	11.6% (198,242)	12.6% (3,115)	11.5% (202,653)
85+	2.1% (513)	2.0% (33,953)	3.0% (730)	2.4% (42,308)
TOTAL	100.0% (24,365)	100.0% (1,711,263)	100.0% (24,663)	100.0% (1,768,331)

III. ECONOMIC IMPACT OF THE HEALTH CARE SECTOR

Manufacturing is the largest employer within Dawson County, followed by retail trade, health care and social assistance, accommodation and food services, and construction. The health care sector of Dawson County includes three hospitals, nine nursing and residential care facilities, ten physician practices, thirteen dentist practices, three chiropractor practices, four optometry practices, two PT/OT/Speech/Audiologists and six pharmacies.

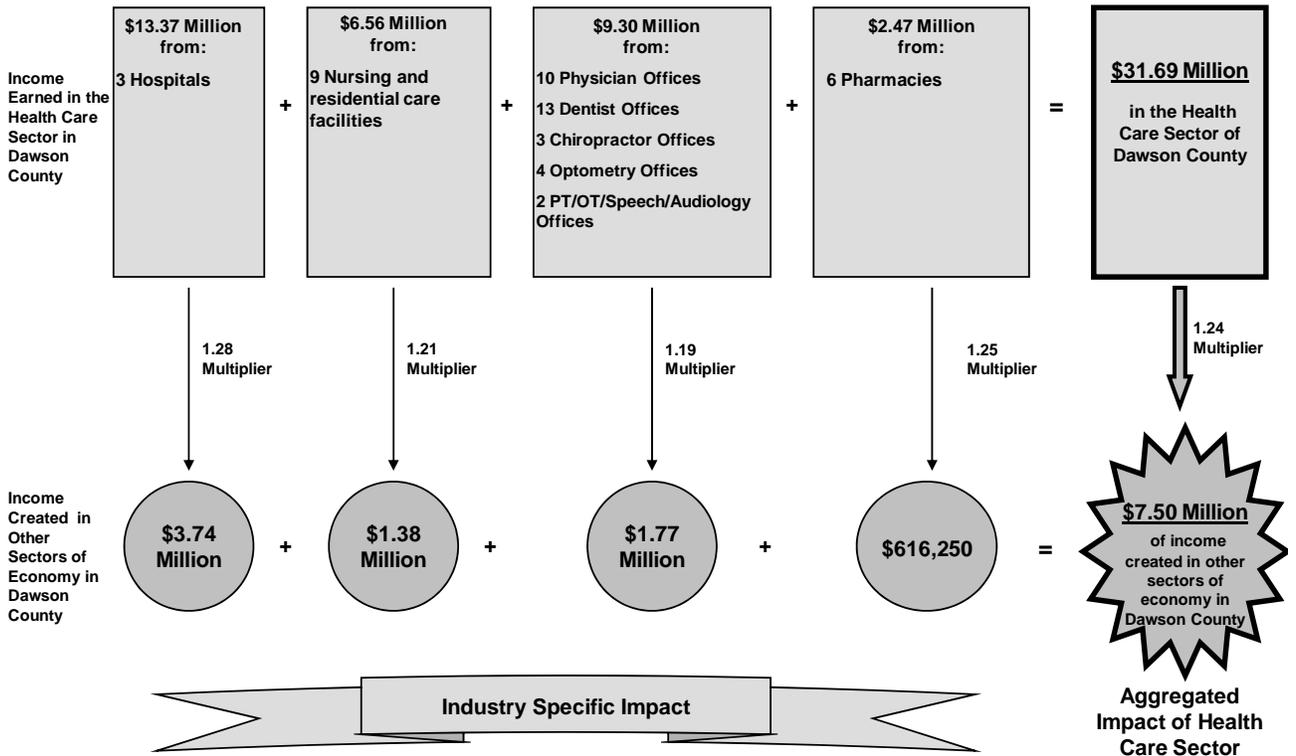

- ◆ The 972 jobs in the health care sector of Dawson County created (through a 1.32 multiplier) another 315 jobs in other sectors of the county's economy (Figure 2). Therefore, the combined effect represents 8.9% of the county's total employment (i.e., 1,287 out of 14,520 jobs).
- ◆ The \$31.69 million of income earned in the health care sector of Dawson County has created (through a 0.24 multiplier) another \$7.50 million of income in other sectors of the county's economy (Figure 3). Therefore, the combined effect represents 8.1% of the county's total income (i.e., \$39.69 million out of \$486.31 million).
- ◆ The \$69.24 million spent in the health care sector of Dawson County created (through a 1.37 multiplier) another \$25.56 million of spending in other sectors of the county's economy (Figure 4). Therefore, the combined effect represents 3.7% of the county's total economic output (i.e., \$94.79 million out of \$2.56 billion).

IV. SOCIO-ECONOMIC INDICATORS

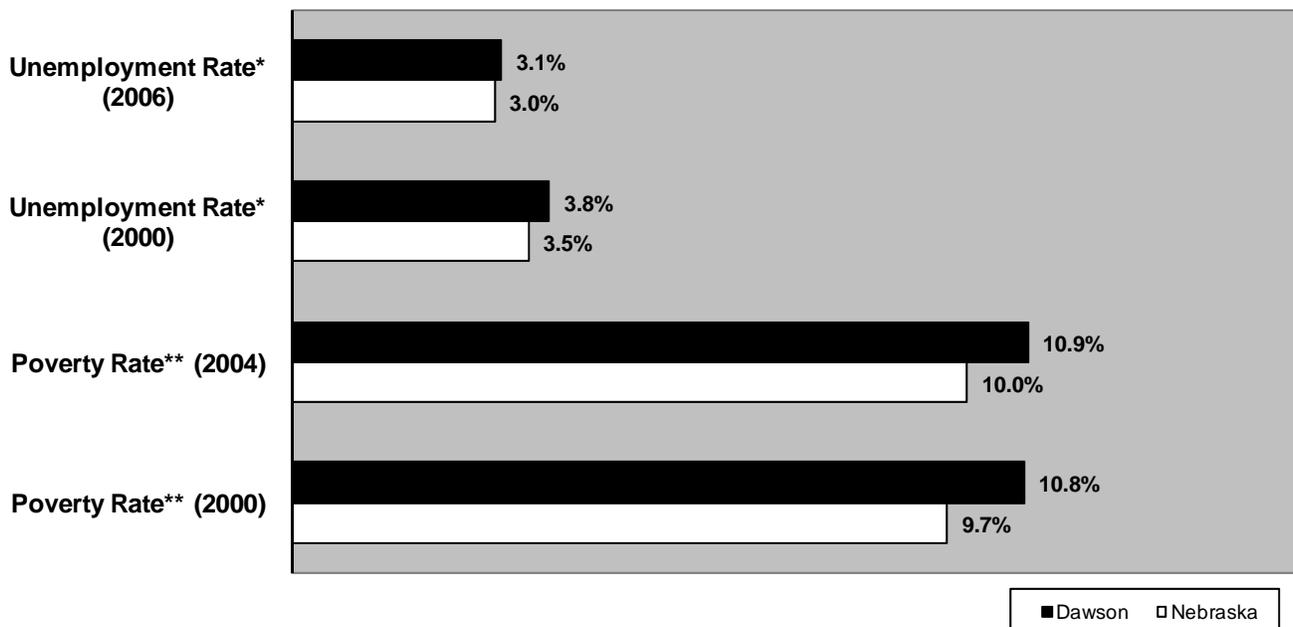

The median household income of the county increased since 2000 by 1.12% to \$36,542 in 2004 (compared to \$42,166 statewide), and the per capita income of the county increased since 2000 by 33.99%, to \$24,199 in 2005 (compared to \$32,923 statewide) (Figure 5). Dawson County experienced a decline in the unemployment rate between 2000 and 2006 to a rate similar to the state (3.1% vs. 3.0 statewide in 2006). The poverty rate in Dawson County was higher than the state in 2004 (10.9% vs. 10.0% statewide) (Figure 6). The county out-performed the state in one of the four social indicators shown in Table 3, with a lower crime arrest rate per 1,000 (46.6 vs. 54.2 statewide).

Table 3. Selected Social Indicators for Dawson County and Nebraska

	Dawson County	Nebraska
Percent of residents aged 25 and older who did not graduate from high school (2000)	26.4%	13.4%
Percent of 7-12th graders who dropped out of school (2003-2004)	2.6%	1.9%
Percent of first births born to unmarried women, younger than 20, with less than a high school education (2000-2004)	15.0%	9.0%
Crime arrest rate per 1,000 population (2004)	46.6	54.2

V. HEALTH STATUS INDICATORS

Dawson County had a higher infant mortality rate, unintentional injury death rate, motor vehicle death rate, and overall death rate compared with the state between 2000 and 2004 (Figure 7). For selected maternal and child health indicators, Dawson County out-performed the state in one of the four areas with a lower percentage of pregnant women who smoke when compared to the state (Figure 8). Among the top 5 leading causes of death of Dawson County residents, the county had a higher death rate due to unintentional injuries than the state (Figure 9). Among the top 5 leading causes of hospitalization of Dawson County residents between 2003 and 2004, the county had a higher hospitalization rate than the state for all injuries, heart disease, and digestive diseases (Figure 10).

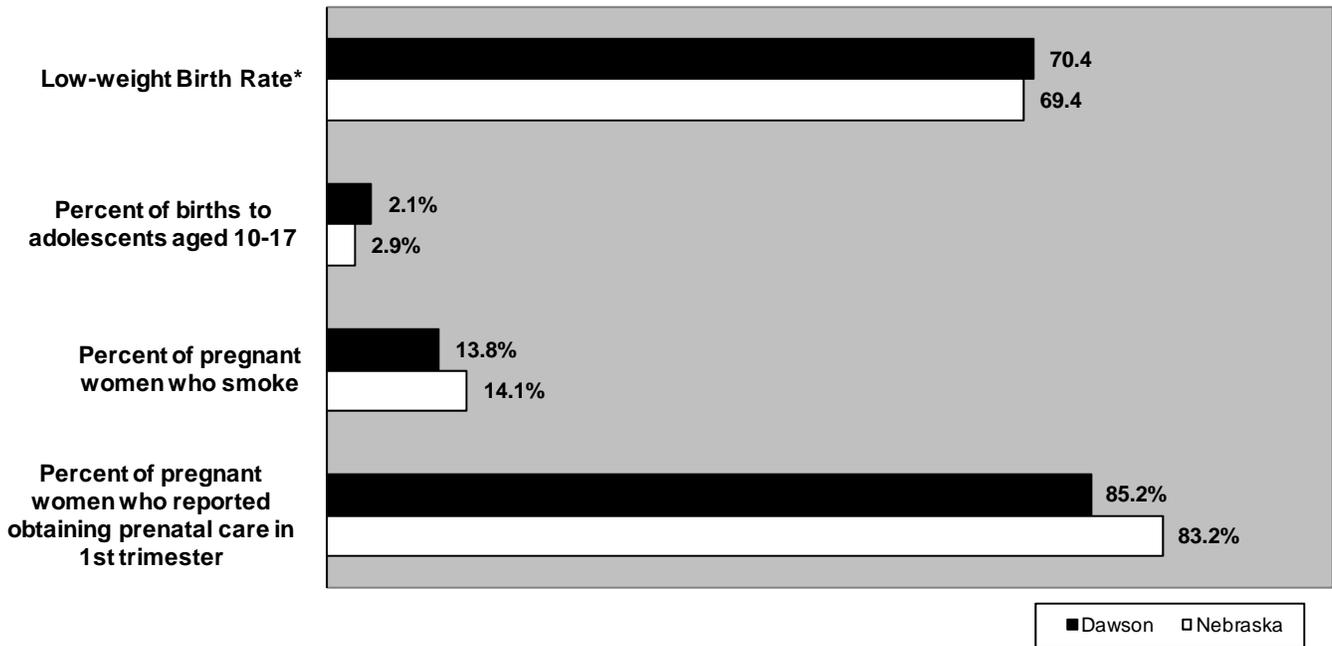

*Number of deaths per 100,000 populations (age-adjusted).

**Number of deaths per 1,000 live births.

Figure 10. Top 5 Leading Causes of Hospitalization* for Dawson County and the Corresponding Hospitalization Rates for the County and Nebraska, 2003-2004**

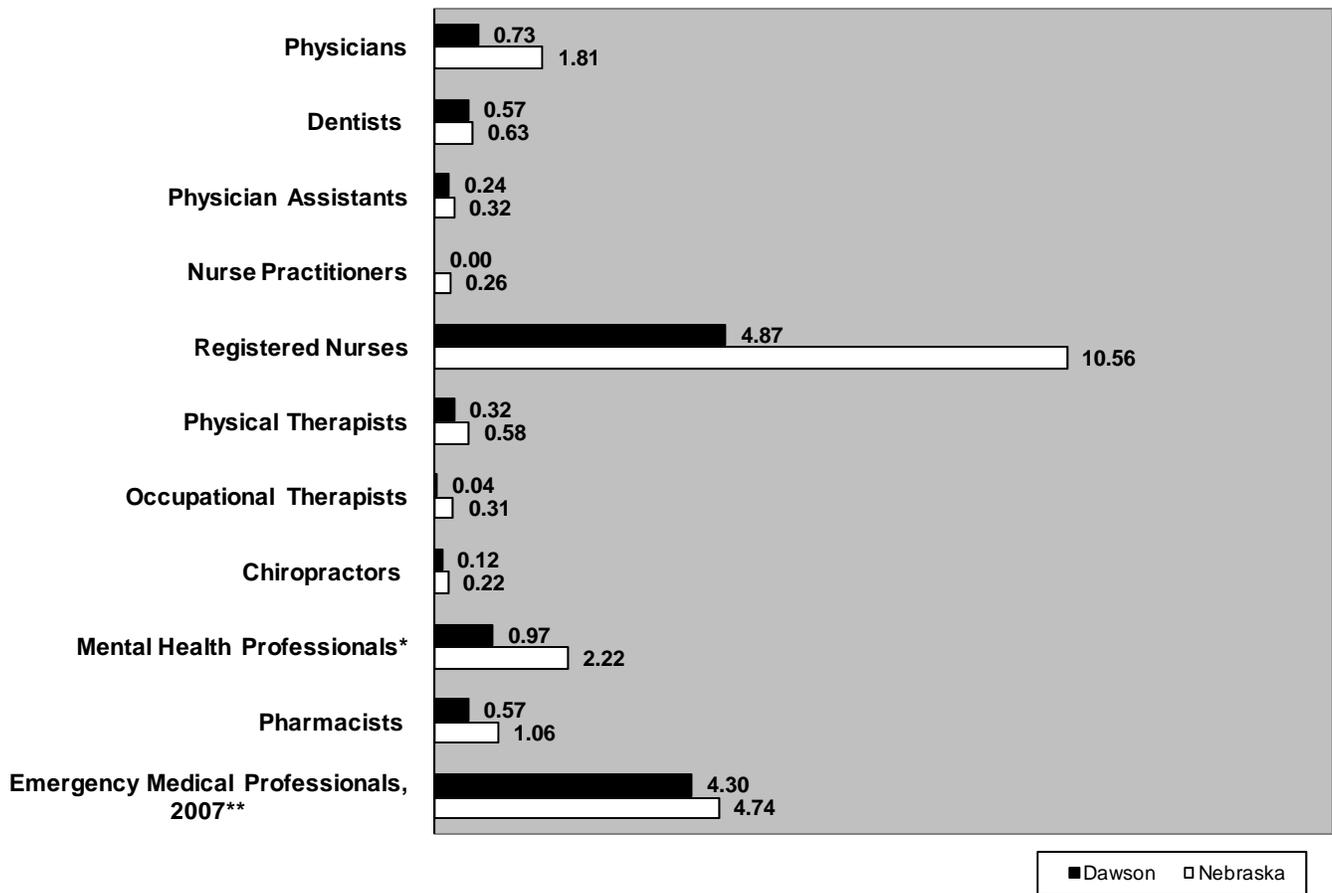

*Hospitalizations for pregnancy and childbirth were excluded from this analysis.

**Defined as the proportion of inpatient hospital discharges to a population within clearly specified geographic boundaries, age adjusted per 100,000 population.
 Source: Nebraska Health and Human Services County Profiles. <http://www.hhs.state.ne.us/profiles/index.htm#County>.

VI. HEALTH CARE PROFESSIONALS

Dawson County is federally designated as a mental health professional shortage area. The state government has designated Dawson County as a health professional shortage area in the specialties of general surgery, internal medicine, pediatrics, OB/GYN, dental/oral surgery, pharmacy, occupational therapy, and mental health. Dawson County has a lower professional-to-population than the state for all the health care professions listed in Figure 11.

Figure 11. Number of Practicing Health Professionals Per 1,000 Population, Dawson County and Nebraska, 2005

*Mental Health Professionals include Psychiatrists, Licensed Psychologists, Master Social Workers, Certified Professional Counselors, Licensed Mental Health Practitioners, and Marriage and Family Therapists.
 ** Emergency Medical Professionals include Emergency Medical Technician (EMT) Paramedic, EMT-Intermediate, EMT-Basic, and First Responders.
 Source: *The Nebraska Health Information Project: 2006 Databook*. (2007) Nebraska Center for Rural Health Research, University of Nebraska Medical Center

VII. HOSPITAL AND LONG-TERM CARE BEDS

Table 4 shows that Dawson County has a lower bed-to-population ratio than the state for inpatient and long term care. As a result, the need for hospital inpatient care (for the general public) and long term care (for the elderly) may not be met within the county.

Table 4. Selected Health Care Facility Bed-to-Population Ratios for Dawson County and Nebraska

	Dawson County	Nebraska
Number of hospital beds per 1,000 population (2007)	2.39**	3.47*
Number of Long Term Care beds per 1,000 elderly population (65+) 2005	72.8*	73.9*

Data Notes

Using IMPLAN software and IMPLAN data for Nebraska's five health-related economic subsectors, we predict changes in overall economic activity as a result of change in health care subsectors. The IMPLAN software is based on an economic input-output model. To improve the accuracy of the dataset in order to better estimate health sector impact, we also use information from the U.S. Census Bureau's *County Business Patterns 2006* and the *American Hospital Association Annual Survey Database: Fiscal Year 2006*. Analysis is only performed at the county level.

Acknowledgments

We would like to thank Dennis Berens, at the Nebraska Office of Rural Health, for his enthusiastic support of the Nebraska Rural Health Works Project. We would also like to thank Nicole Van Osdel at the Nebraska Center for Rural Health Research for making the maps.

About the Nebraska Rural Health Works Project

The Nebraska Rural Health Works Project is made possible with the financial support of the Nebraska Office of Rural Health and through additional personnel and resources provided by the College of Public Health at the University of Nebraska Medical Center. The brief reports are designed to inform opinion leaders (from general business, health care, and government) in rural communities about the contribution health care makes to the county economy, both directly and indirectly. We use IMPLAN software, which uses an economic input-output model, to predict changes in overall economic activity as a result of change in the health care sector. In addition to the analysis of the economic impact of the health sector on a specific county, other information, such as demographics, socio-economic and health status indicators, health care professionals and facility bed capacity, are reported for a county.

If you would like to view additional County Profiles for Nebraska, please visit our Nebraska Rural Health Works website: <http://www.unmc.edu/rural/NeRHW>.

If you would like additional information regarding Nebraska's health care financing, health professionals, health status and health care delivery systems, visit the Nebraska Health Information Project website: <http://www.unmc.edu/nebraska>.

County Health Economic Profiles can be prepared upon request. At this time, we only perform analysis at the county level. If you are interested in this project, you can request a profile by contacting the Project Director, Li-Wu Chen, Ph.D. (liwuchen@unmc.edu), or Michelle Lampman, M.A. (mlampman@unmc.edu) at the Nebraska Center for Rural Health Research, College of Public Health, University of Nebraska Medical Center, (402)559-5260.
